ZugerKB Fonds - Obligationen ESG (CHF) I

Investment objective

The ZugerKB bond fund strives to consistently generate income and deliver superior investment returns throughout a complete economic cycle. It places importance on incorporating environmental and social factors into its investment decisions and ensures risk diversification.

Key features

The ZugerKB bond fund invests mainly in bonds in Swiss francs with various maturities from diverse issuers of good quality (investment grade). It may have limited exposure to such instruments and bonds in other currencies or from issuers of lesser quality. The currency risk is fully hedged. The fund seeks to promote environmental and social characteristics.

Approach

The investment manager utilises a rigorous and comprehensive approach, called the ZugerKB FTV approach, to make high-conviction decisions. This involves conducting thorough macroeconomic, relative-value and issuer analyses. Additionally, the manager employs a proprietary model to screen out issuers that do not meet specific environmental, social and governance (ESG) criteria. The investment manager consistently monitors global markets to identify lucrative opportunities across interest rates, credit spreads and currencies. Through a focus on risk/reward optimisation, the team proactively adjusts the portfolio in order to participate in favourable markets while mitigating vulnerability in unfavourable ones. By effectively combining these strategies, the investment manager aims to consistently deliver strong returns while adhering to strong ESG principles.
