## Vontobel Fund (CH) - Ethos Equities Swiss Mid & Small A, CHF

Morningstar Rating as of 30.04.2021 ★★★★★

Marketing document for retail investors in: CH

### Investment objective

This equity fund aims to generate long-term capital growth while considering specific sustainability criteria and respecting risk diversification.

### Key features

The fund invests mainly in stocks of smaller, innovative Swiss companies which are among the leaders in their industry, offer interesting profitability growth potential, and whose stock prices have attractive upside potential versus the estimated enterprise values at the time of the investment. The fund exercises shareholder voting-rights systematically in accordance with the guidelines of Ethos, the Swiss Foundation for Sustainable Development.

### Approach

Ethos determines the investable universe based on specific environmental, social and governance criteria and keeps stimulating the companies for enhanced sustainability ratings. Within this universe, the specialized and seasoned investment team takes long-term high-conviction investment decisions based on in-depth research. The team actively adapt portfolio positions to seize attractive new opportunities and control risks always in line with their latest assessment of investment conditions. They may use derivative financial instruments as well.

**Geographical breakdown (%)****Currency breakdown (%)****Sector breakdown (%)****Risks**

- Limited participation in the potential of single securities.
- Success of single security analysis and active management cannot be guaranteed.
- It cannot be guaranteed that the investor will recover the capital invested.
- Derivatives entail risks relating to liquidity, leverage and credit fluctuations, illiquidity and volatility.
- Price fluctuations of investments due to market, industry and issuer linked changes are possible.
- Investments in mid and small cap companies may be less liquid than investments in large cap companies.
- The Sub-Fund's investments may be subject to sustainability risks. The sustainability risks that the Sub-Fund may be subject to are likely to have an immaterial impact on the value of the Sub-Funds' investments in the medium to long term due to the mitigating nature of the Sub-Fund's ESG approach.
- The Sub-Funds' performance may be positively or negatively affected by its sustainability strategy.
- The ability to meet social or environmental objectives might be affected by incomplete or inaccurate data from third-party providers.
- Information on how environmental and social objectives are achieved and how sustainability risks are managed in this Sub-Fund may be obtained from [Vontobel.com/SFDR](http://Vontobel.com/SFDR).

**Glossary**

**Benchmark:** An index that is used to measure the performance of an investment fund with the purpose of tracking the return of such index or of defining the asset allocation of a portfolio or of computing the performance fees. **Beta:** A measure of sensitivity - given as the average percentage change in the price of a fund when the market (benchmark) rises or falls by 1%. A value over (under) 1 means that on average the fund exhibits more (less) volatility than the benchmark. The figure is calculated on a 3-yearly basis. **Duration (Modified Duration):** Duration is an indication of how much a bond's price could be affected by a change in interest rates. **Effective Duration:** Is a measure of the potential impact on a bond or portfolio price of a 1% change in interest rates across all maturities. **Hedging:** Where a Class of Shares is described as hedged ("Hedged Share Class"), the intention is to hedge the Net Asset Value in the Reference Currency of the Sub/Fund into the Currency of the Hedged Share Class. **Index:** Is a characteristic portfolio considered representative of a particular market or a portion of it, and serves as a performance measurement for such a market. An index, or combination thereof, used as reference for performance comparison, is then called "reference index". **Information ratio:** The information ratio (IR) is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns. **Jensen's Alpha:** Yield indicator. If the average return on a security or portfolio is larger than its expected return, the alpha is positive. If the average return is smaller than expected, the alpha is negative. **Management Fee:** Is a fee which covers all costs relating to possible services rendered in connection with investment management and distribution. Please refer to the fund's prospectus for a complete description. **NAV:** The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding. **Ongoing charges:** Expresses the sum of the costs of running a fund on an ongoing basis, like management fee and various legal and operating costs. It is calculated retroactively over a period of 12 months as a percentage of the fund assets. When insufficient data is available, Ongoing Charges may be estimated using data of funds with similar characteristics. **Performance Fee:** The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's prospectus for a complete description. **Sharpe Ratio:** The Sharpe ratio indicates the additional reward per unit of risk compared to a risk/free investment. It reveals how much performance was achieved at what level of risk. **Tracking error:** Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error. **Volatility:** Volatility (or risk or standard deviation) is an indicator of the range of fluctuation of the annualized performance of a fund over a certain period. **Weighted Average Coupon (WAC):** The coupon is the annual interest rate paid by a bond issuer on the face value of the bond. **Yield to Maturity:** The rate of return anticipated on a bond if it is held until the maturity date. **Yield to Worst:** The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions are used by the issuer.

**Important information**

This marketing document is produced for Wholesale/Retail clients for distribution in CH.

This document is for information purposes only and does not constitute an offer, solicitation or recommendation to buy or sell shares of the fund/fund units or any investment instruments, to effect any transactions or to conclude any legal act of any kind whatsoever. Subscriptions of shares of the fund should in any event be made solely on the basis of the fund's current sales prospectus (the "Sales Prospectus"), the Key Investor Information Document («KIID»), its articles of incorporation and

the most recent annual and semi-annual report of the fund and after seeking the advice of an independent finance, legal, accounting and tax specialist. Furthermore and before entering into an agreement in respect of an investment referred to in this document, you should consult your own professional and/or investment advisers as to its suitability for you.

In particular, we wish to draw your attention to the following risks: Investments in the securities of emerging- market countries may exhibit considerable price volatility and – in addition to the unpredictable social, political and economic environment – may also be subject to general operating and regulatory conditions that differ from the standards commonly found in industrialised countries. The currencies of emerging-market countries may exhibit wider fluctuations. Investments in derivatives are often exposed to the risks associated with the underlying markets or financial instruments, as well as issuer risks. Derivatives tend to carry more risk than direct investments. Investment universe may involve investments in countries where the local stock exchanges may not yet qualify as recognised stock exchanges. This financial product promotes environmental or social characteristics but does not have sustainable investment as its objective. Neither the Sub-Fund, nor the Management Company nor the Investment Manager make any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of an assessment of ESG research and the correct execution of the ESG strategy. Money market investments are associated with risks of a money market, such as interest rate fluctuations, inflation risk and economic instability.

Past performance is not a reliable indicator of current or future performance. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable. The return of the fund may go down as well as up due to changes in rates of exchange between currencies. The value of the money invested in the fund can increase or decrease and there is no guarantee that all or part of your invested capital can be redeemed.

Refer for more information on the fund to the latest prospectus, annual and semi-annual reports as well as the key investor information documents (“KIID”). These documents may also be downloaded from our website at [vontobel.com/am](http://vontobel.com/am).
