What were the Fund costs for the period?

(based on a hypothetical \$10,000 investment)

<u>Fund Name</u>	<u>Costs of a \$10,000 investment*</u>	<u>Costs paid as a percentage of a \$10,000 investment</u>
Vontobel International Equity Fund, Class Y Shares	\$0	0.00% [^]

[^] The ratio appears lower due to the relative net asset value of Class Y. Prospectively, it is expected that the ratio of net expenses to average net assets would be approximately 0.75% (1.14% excluding waiver).

* Costs shown not annualized. If the Fund had been open for the full fiscal year, costs shown would have been higher for the period ended.

How did the Fund perform in the period?

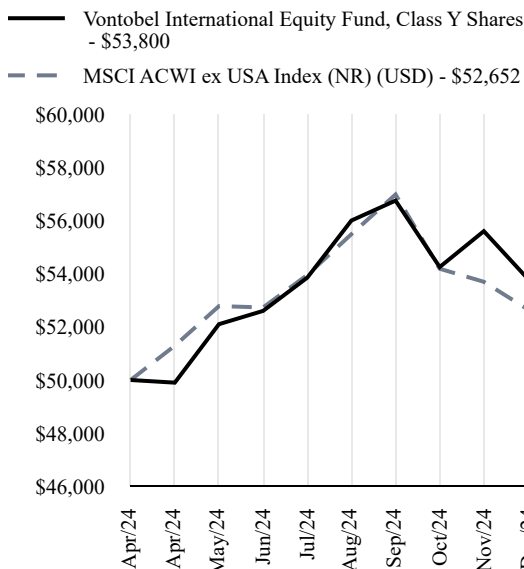

Class Y Shares delivered 7.60% during the period and outpaced the MSCI ACWI Ex-USA Index, the benchmark index, which delivered 5.30%. International Equity markets delivered positive results for the period, as investors managed through a year of record global elections, AI exuberance and the implications of Trump Whitehouse on markets. Financials was the top performing sector benefiting from the higher for longer interest rate environment, whereas Energy was the weakest performer. Seven out of the eleven GICS sectors ended the period in positive territory.

Relative outperformance during the period was driven by a combination of strong stock selection and positive sector allocation. The positioning within the Information Technology sector was most additive, with the overweight to the strongly performing sector and selection within the sector additive. The positions in SAP and TSMC were most additive. SAP continued to benefit from the transition to the cloud and TSMC has benefitted from AI related tailwinds. Stock selectin within Health Care was also positive for results, with the underweight to Novo Nordisk and the overweight to Galderma contributing the most.

In contrast, the underweight position in Financials detracted from results given the sector posted strong results in the higher for longer rate environment. Stock selection within Consumer Staples was also negative, with positions in AAK and Loreal detracting the most. We have since exited in our position in AAK in favor of more attractive opportunities elsewhere. Shares of Loreal sold off due to a softer

Householding

Rule 30e-1 of the Investment Company Act of 1940 permits funds to transmit only one copy of a proxy statement, annual report or semi-annual report to shareholders (who need not be related) with the same residential, commercial or electronic address, provided that the shareholders have consented in writing and the reports are addressed either to each shareholder individually or to the shareholders as a group. This process is known as “householding” and is designed to reduce the duplicate copies of materials that shareholders receive and to lower printing and mailing costs for funds. Once implemented, if you would like to discontinue householding for your accounts, please call toll-free at 877-734-6278 to request individual copies of these documents. Once the Fund receives notice to stop householding, we will begin sending individual copies 30 days after receiving your request.
