

Vontobel Fund – Global Active Bond

Marketing document for institutional investors in: AT, CH, DE, ES, FI, FR, GB, IT, LI, LU, NL, NO, PT, SE, SG (Professional Investors only).

Investors in France should note that, relative to the expectations of the Autorité des Marchés Financiers, this fund presents disproportionate communication on the consideration of non-financial criteria in its investment policy.

Market developments

July was a month of competing forces for global markets, with re-escalation between the US and Iran driving oil sharply higher and leaving Brent crude the best-performing major asset, up +23.6%. US President Donald Trump declared June's memorandum of understanding with Iran "over," and as both sides resumed strikes, Brent climbed from USD 71 per barrel at the start of the month to just over USD 100 per barrel on July 23 amid renewed Strait of Hormuz disruption, before retreating to USD 90 per barrel into month-end as signs of a pause emerged. Geopolitical risks around Iran and Russia-Ukraine, along with El Niño concerns, also lifted agricultural prices, with wheat and corn up +10.1% and +6.8%, respectively.

The reflationary backdrop weighed on global bonds even as major central banks held rates steady. The US Federal Reserve's (Fed) decision to leave rates unchanged offered little clarity from Chair Kevin Warsh on the reaction function, driving sharp Treasury curve steepening: the 30-year yield reached a post-2007 high of 5.27%, while the 10-year yield rose +27 basis points (bps) to 4.74%, helped only partly by a soft June core CPI print (0.0%, month over month). The US dollar lost ground against every G10 currency. The European Central Bank (ECB) also held rates steady, but struck a notably more hawkish tone, signaling that a September hike was probable amid inflationary risks from higher energy prices. Supported by a solid Eurozone Q2 GDP print (+0.4%), that guidance pushed the 10-year Bund up +35bps to a post-2011 high of 3.20%, an even larger move than in the US. The Bank of England's steadier, more dovish tone still saw gilts rise +29bps, with Governor Andrew Bailey stressing the Bank was not "edging towards a hike." In Japan, apparent FX intervention on July 30 (seemingly US-coordinated) drove a yen rebound after it hit its weakest level against the dollar since 1986, making it the best-performing G7 currency (+3.3%). Japanese Government Bonds outperformed (10Y +12bps to 2.81%) as the Bank of Japan signaled an autumn hike.

Equities were dominated by a sharp reassessment of the AI trade, as valuation, Chinese competition, capex intensity, and supply concerns hit the sector. The Philadelphia Semiconductor index slumped -20.6%, its worst month since 2008, and Korea's KOSPI fell -22.2% despite a +17.9% rebound on July 30, though both remain up over +50% year to date. A late-month recovery followed "Magnificent 7" earnings, with Microsoft posting its best day since 2008 and a record USD 450 billion market-cap gain. Breadth was more balanced than headlines suggested: the equal-weighted S&P 500 Index hit a record on July 28, while it closed essentially

flat (-0.1%) versus the Nasdaq (-3.2%). European equities held up better on the solid Eurozone Q2 GDP print, with the STOXX 600 up +1.3% (+12.4% YTD) and the FTSE 100 up +3.6%. Asia lagged, with the Nikkei down -8.1% and Shanghai Composite down -5.9%.

In fixed income and credit markets, July was a month of divergence, with EUR investment grade (IG) the clear outperformer. EUR IG tightened -1bp (BBB: -1bp) as European spreads ground tighter across most sectors, while USD IG widened +3bps (BBB: +4bps), dragged by rate-sensitive, longer-duration names as the curve steepened; US media (+12bps), technology & electronics (+12bps), and telecoms (+9bps) led the widening in US/global IG. Subordinated segments were more resilient: European Bank Co-Cos tightened -6bps and Euro LT2 -4bps, while global hybrids were broadly flat (+1bp). BBs were mixed, with US BBs +9bps wider, while Euro BBs tightened -7bps, underscoring the continued European outperformance across the credit spectrum.

Portfolio review

The portfolio continues to be highly barbelled, with a higher allocation to short-dated risk instruments. During the month, we actively managed overall risk, reducing beta into market rallies while selectively adding exposure during periods of weakness. We reduced our cash level over the month to add exposure in the technology sector following the sell-off, focusing on names where we saw attractive mean-reversion potential. In our view, technicals within fixed-income markets are strong, and we believe it is likely that our micro-arbitrage positions, where we select securities that trade wide of the remainder of the issuer complex, will continue to drive our turnover. Our primary risk allocations continue to be into European financials and CDS indices given the steeper roll-down profile versus cash, but even within those broad universes we tend to see a higher degree of dispersion in our portfolio allocations. This means that the aggregate level of risk at a sub-asset class level as well as at a fund level is best described as cautious.

Performance analysis

The Vontobel Fund – Global Active I was down -1.14% in June, in line with its benchmark.

Outlook

While all-in yields are still the dominating driver for fixed-income technicals, we believe that dispersion will go higher given the overall rather tight valuations and market complacency. The fund seeks to extract value from these appearing pockets of volatility while not attempting to "time" the drawdowns. Trading the ebbs

and flows of the market both at an aggregate risk level and in terms of our sub-asset class allocations feels to us like the best return-for-risk approach for these markets.

Fund characteristics

Fund name	Vontobel Fund – Global Active Bond
ISIN	LU1112751067
Share class	I EUR
Benchmark	Bloomberg Global Aggregate Index (EUR Hedged)
Inception date	3.10.2014

Past performance is not a reliable indicator of current or future performance.

Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable. The return of the fund may go down as well as up, e.g. due to changes in rates of exchange between currencies. The value of the money invested in the fund can increase or decrease and there is no guarantee that all or part of your invested capital can be redeemed.

Investment risks

- Securities with a lower credit quality means a higher risk that an issuer may fail to meet its obligations. The investment value may fall if an issuer's credit rating is downgraded.
- Asset-backed and mortgage-backed securities, and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
- Distressed securities have a higher credit and liquidity risk as well as uncertainty in any potential bankruptcy proceedings.
- The sub-fund entails a higher degree of liquidity risk, because lower trading volumes on capital markets can lead to a situation where securities cannot be sold at all or can only be sold at less favorable terms.
- CoCo-Bonds may entail significant risks such as coupon cancellation risk, capital structure inversion risk, call extension risk.
- Using derivatives creates significant leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
- The overall strategy may be volatile and the risk of a substantial loss cannot be ruled out. Active currency and volatility trading may be very speculative. The leverage achieved for investment purposes in the Sub-Fund through the use of derivative financial instruments is calculated using the notional approach. The sum of notionals leverage achieved over the course of the year is expected to be around 700% or less of the net assets of the Sub-Fund. However, the actual sum of notionals leverage achieved on average may be above or below this value.
- The sub-fund's investments may be subject to sustainability risks. The sustainability risks that the sub-fund may be subject to are likely to have an immaterial impact on the value of the sub-fund's investments in the medium to long term due to the mitigating nature of the sub-fund's ESG approach. The sub-fund's performance may be positively or negatively affected by its sustainability strategy. The ability to meet social or environmental objectives might be affected by incomplete or inaccurate data from third-party providers. Information on how environmental and social objectives are achieved and how sustainability risks are managed in this sub-fund may be obtained from vontobel.com/sfdr.

Important legal information

This marketing document was produced by one or more companies of the Vontobel Group (collectively "Vontobel") for institutional clients, for distribution in AT, CH, DE, ES, FI, FR, GB, IT, LI, LU, NL, NO, PT, SE, SG (Professional Investors only). This document is for information purposes only and does not constitute an offer, solicitation or recommendation to buy or sell shares of the fund/fund units or any investment instruments, to effect any transactions or to conclude any legal act of any kind whatsoever. Subscriptions of shares of the fund should in any event be made solely on the basis of the fund's current sales prospectus (the "Sales Prospectus"), the Key (Investor) Information Document ("K(I)ID"), its articles of incorporation and the most recent annual and semi-annual report of the fund and after seeking the advice of an independent finance, legal, accounting and tax specialist. This document is directed only at

recipients who are institutional clients, such as eligible counterparties or professional clients as defined by the Markets in Financial Instruments Directive 2014/65/EC ("MiFID") or similar regulations in other jurisdictions, or as qualified investors as defined by Switzerland's Collective Investment Schemes Act ("CISA").

Neither the fund, nor the Management Company nor the Investment Manager make any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of an assessment of ESG research and the correct execution of the ESG strategy. As investors may have different views regarding what constitutes sustainable investing or a sustainable investment, the fund may invest in issuers that do not reflect the beliefs and values of any specific investor. ESG investing and criteria employed may be subjective in nature. The considerations assessed as part of ESG

processes may vary across types of investments and issuers and not every factor may be identified or considered for all investments. Information used to evaluate ESG components may vary across providers and issuers as ESG is not a uniformly defined characteristic. ESG investing may forego market opportunities available to strategies which do not utilize such criteria. There is no guarantee the criteria and techniques employed will be successful. Note: Unless otherwise stated in Fund documentation or included within the Fund's investment objective, information herein does not imply that the Fund has an ESG-aligned investment objective, but rather describes how ESG criteria and factors are considered as part of the overall investment process.

Past performance is not a reliable indicator of current or future performance.

Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable.
