

# Vontobel Fund (CH) - Pension Invest Yield I

Approved for institutional investors in: CH.

## Investment objective

This multi-asset fund aims to achieve steady capital growth, while considering specific sustainability criteria and respecting risk diversification.

## Key features

The fund invests worldwide across multiple asset classes, predominantly in bonds and equities of quality issuers which fulfill strict environmental, social and governance criteria. The equity portion of the fund may not exceed 35%. The fund complies with Switzerland's regulatory investment restrictions for pension funds.

## Approach

The investment team of seasoned multi-asset specialists adheres to a rigorous process to identify the most promising opportunities within the investment universe. Convinced to reach the best results by pairing human skills with quantitative excellence, the analysts combine their qualitative research with cutting-edge technology. To measure sustainability the team draws upon an independent specialist, which evaluates how good human needs like food, energy, mobility, etc. are serviced. The team manages both the asset allocation and individual positions in the fund actively to seize attractive new opportunities whenever they occur, while keeping the risks under permanent control.

#### Important legal information:

This marketing document is produced for institutional investors for distribution: CH.

This document is for information purposes only and does not constitute an offer, solicitation or recommendation to buy or sell shares of the fund/fund units or any investment instruments, to effect any transactions or to conclude any legal act of any kind whatsoever. Subscriptions of shares of the fund should in any event be made solely on the basis of the fund's current sales prospectus (the "Sales Prospectus"), the Key Investor Information Document («KIID»), its articles of incorporation and the most recent annual and semi-annual report of the fund and after seeking the advice of an independent finance, legal, accounting and tax specialist.

This document is directed only at recipients who are qualified investors as defined by Switzerland's Collective Investment Schemes Act («CISA»).

In particular, we wish to draw your attention to the following risks: Investments in the securities of emerging- market countries may exhibit considerable price volatility and – in addition to the unpredictable social, political and economic environment – may also be subject to general operating and regulatory conditions that differ from the standards commonly found in industrialised countries. The currencies of emerging-market countries may exhibit wider fluctuations. Investments in derivatives are often exposed to the risks associated with the underlying markets or financial instruments, as well as issuer risks. Derivatives tend to carry more risk than direct investments. Investment universe may involve investments in countries where the local capital markets may not yet qualify as recognised capital markets. There is no guarantee that all sustainability criteria will always be met for every investment. Negative impact on subfund's performance possible due to pursuing sustainable economic activity rather than a conventional investment policy. Investment universe may involve investments in countries where the local stock exchanges may not yet qualify as recognised stock exchanges. Money market investments are associated with risks of a money market, such as interest rate fluctuations, inflation risk and economic instability.

Past performance is not a reliable indicator of current or future performance. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable. The return of the fund may go down as well as up due to changes in rates of exchange between currencies. The value of the money invested in the fund can increase or decrease and there is no guarantee that all or part of your invested capital can be redeemed.

Refer for more information on the fund to the latest prospectus, annual and semi-annual reports as well as the key investor information documents ("KIID"). These documents may also be downloaded from our website at [vontobel.com/am](http://vontobel.com/am).

## Glossary

### Benchmark

An index that is used to measure the performance of an investment fund with the purpose of tracking the return of such index or of defining the asset allocation of a portfolio or of computing the performance fees.

### Beta

A measure of sensitivity - given as the average percentage change in the price of a fund when the market (benchmark) rises or falls by 1%. A value over (under) 1 means that on average the fund exhibits more (less) volatility than the benchmark. The figure is calculated on a 3-yearly basis.

### Duration (Modified Duration)

Duration is an indication of how much a bond's price could be affected by a change in interest rates.

### Effective Duration

Is a measure of the potential impact on a bond or portfolio price of a 1% change in interest rates across all maturities.

### Hedging

Where a Class of Shares is described as hedged ("Hedged Share Class"), the intention is to hedge the Net Asset Value in the Reference Currency of the Sub/Fund into the Currency of the Hedged Share Class.

### Information ratio

The information ratio (IR) is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns

### Jensen's Alpha

Yield indicator. If the average return on a security or portfolio is larger than its expected return, the alpha is positive. If the average return is smaller than expected, the alpha is negative.

### Management Fee

Is a fee which covers all costs relating to possible services rendered in connection with investment management and distribution. Please refer to the fund's prospectus for a complete description.

### NAV

The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding.

### Performance Fee

The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's prospectus for a complete description.

### Reference Index

The difference to benchmark is that the reference index is not used for calculation of performance fees.

### Sharpe Ratio

The Sharpe ratio indicates the additional reward per unit of risk compared to a risk-free investment. It reveals how much performance was achieved at what level of risk.

### TER

The fees and incidental costs charged on the management of collective investment schemes are to be disclosed using the internationally recognized Total Expense Ratio (TER). This ratio expresses the sum of all fees and incidental costs charged on an ongoing basis to the collective investment scheme's assets (operating expenses) taken retrospectively as a percentage of the net assets

### Tracking error

Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error.

### Volatility

Volatility (or risk or standard deviation) is an indicator of the range of fluctuation of the annualized performance of a fund over a certain period.

### Weighted Average Coupon (WAC)

The coupon is the annual interest rate paid by a bond issuer on the face value of the bond.

### Yield to Maturity

The rate of return anticipated on a bond if it is held until the maturity date.

### Yield to Worst

The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions are used by the issuer.
