

PUBLIC TRANSPARENCY REPORT **2025**

Vontobel Holding AG

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

At Vontobel, our commitment to ESG investing is rooted in our belief that these considerations are vital for long-term value creation for our clients. Over the past year, we have continued to embed ESG considerations across our investment processes and formalized our stance on climate and nature. As a fiduciary, we act on behalf of our clients, who entrust us with their capital. Our duty is to help clients meet their goals and we do so by offering the knowledge, tools, and investment solutions that empower investors to consider sustainability in their financial strategies. As a global investment firm, Vontobel plays a responsible, active role in the sustainable transformation of our society and economy.

We reflect this in our governance, investment philosophy and operational processes. Many of our investment solutions focus on companies and industries that contribute to sustainable transformation and manage associated risks. In this way, Vontobel helps create new opportunities for investors. Each of our boutiques draws on specialist investment talent, a strong performance culture, and robust risk management. Each boutique has therefore developed an ESG approach, detailed below, which is relevant to their asset class, beliefs and style of investing. Vontobel offers a range of ESG solutions. To ensure transparency and comparability, we have grouped all our investment solutions that incorporate ESG considerations into three categories: Integrated ESG Risk, Promote ESG, Sustainable.

This Vontobel nomenclature, is not necessarily aligned to any specific regulatory nomenclature. We are committed to incorporate ESG consideration into active investment decisions. We believe that ESG consideration is part of our fiduciary duty, requires investment team accountability and demands transparency. For this reason, our investment teams subscribe to four ESG Investment Principles. This foundation enables us to offer a wide range of ESG solutions, in response to our clients' desired investment objective(s), which can be any one, or a balance of, the following: – optimizing risk adjusted performance through the consideration of financially material ESG issues. – mitigating negative environmental and social impact from investments; and – investing in companies providing products and services that aim to actively and positively contribute to the UN Sustainable Development Goals (SDGs). For more information, see our Integration and Stewardship Report: www.vontobel.com/esg-library.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

As a global investment firm, Vontobel plays a responsible, active role in the sustainable transformation of our society and economy. We reflect this in our governance, investment philosophy and operational processes. Our focus in 2024 was on further enhancing sustainability oversight capabilities at Vontobel. The review of the six Sustainability Commitments, with a focus on detailing our targets and sharpening key performance indicators (KPIs), played a pivotal role in this endeavour. This review equips our oversight bodies, such as the Board of Directors (BoD), with the necessary tools to perform their oversight functions. Furthermore, the Board of Directors nominated a BoD member as Sustainability Spokesperson. The Sustainability Spokesperson takes on the role of “spiritus rector” on sustainability-related topics and is the Board’s point of contact on the subject. While the entire Board of Directors maintains overall responsibility for sustainability-related topics, we believe that this dedicated role will further strengthen our oversight and focus on this critical area. In 2024, we also joined UN PRI Spring, an engagement initiative focusing on biodiversity and Vontobel published position statements on climate and nature, outlining why these topics matter to us, what our beliefs are, and how we support these beliefs through our actions. More information on our voting and engagement activities can be found in our Voting and Engagement Reports and in our Voting Records under www.vontobel.com/esg-library.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

In 2024, we published our climate change and nature positions statements, outlining our beliefs about both topics as well as pillars of consideration of climate change-related risks and opportunities. We are mindful of industries with high greenhouse gas emissions and some investment strategies therefore exclude carbon intensive and extractive investments altogether while others consider risks of these investments on a case-by-case basis as an integrated part of their investment process. For a number of products, we actively monitor and regularly disclose specific ESG information including a carbon footprint and other climate related performance indicators. In 2025, we will also start to assess and monitor physical and transition climate-related risks as part of the Investment risk monitoring process.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Andrew Jackson

Position

Head Investments

Organisation's Name

Vontobel Holding AG

● A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.
