Vontobel Fund - US Equity AI

Vontobel

Approved for institutional investors in: AT, CH, CL, DE, LU, SG (professional investors).

Investment objective

This equity fund aims to provide strong returns over a market cycle with considerably less business risk than the US equity market.

Key features

The fund invests in US-domiciled domestic and multinational companies. It aims to invest in a concentrated portfolio of stocks of high-quality growth companies at sensible prices. The selected companies should exhibit relatively stable and predictable earnings growth that can be sustained for extended periods.

Approach

The highly experienced and stable investment specialist team adheres to a clearly defined, bottom-up approach that focuses on in-depth company research. The team manages the portfolio actively with the aim to participate in rising markets and protect capital during declining markets.

Major Sectors

- + "Quality growth" investment style aimed at the preservation of capital
- + nvests primarily in securities of companies that have relatively high longterm earnings growth and above-average profitability
- + Broad diversification across numerous securities
- + Possible extra returns through single security analysis and active management
- + Gains on invested capital possible
- + Use of derivatives for hedging purposes may increase subfund's performance and enhance returns
- + Price increases of investments based on market, sector and company developments are possible.

Risks

- This investment style may lead to more heavily concentrated positions in individual companies or sectors
- Limited participation in the potential of single securities
- Success of single security analysis and active management cannot be guaranteed
- It cannot be guaranteed that the investor will recover the capital invested
 Derivatives entail risks relating to liquidity, leverage and credit fluctuations, illiquidity and volatility.
- Price fluctuations of investments due to market, industry and issuer linked changes are possible.

Important legal information:

This marketing document is produced for institutional investors for distribution: CH.

This document is for information purposes only and does not constitute an offer, solicitation or recommendation to buy or sell shares of the fund/fund units or any investment instruments, to effect any transactions or to conclude any legal act of any kind whatsoever. Subscriptions of shares of the fund should in any event be made solely on the basis of the fund's current sales prospectus (the "Sales Prospectus"), the Key Investor Information Document («KIID»), its articles of incorporation and the most recent annual and semi-annual report of the fund and after seeking the advice of an independent finance, legal, accounting and tax specialist.

This document is directed only at recipients who are qualified investors as defined by Switzerland's Collective Investment Schemes Act («CISA»).

In particular, we wish to draw your attention to the following risks: Investments in derivatives are often exposed to the risks associated with the underlying markets or financial instruments, as well as issuer risks. Derivatives tend to carry more risk than direct investments.

Past performance is not a reliable indicator of current or future performance. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable. The return of the fund may go down as well as up due to changes in rates of exchange between currencies. The value of the money invested in the fund can increase or decrease and there is no guarantee that all or part of your invested capital can be redeemed.

Interested parties may obtain the above-mentioned documents free of charge from the authorised distribution agencies and from the offices of the fund at 11-13 Boulevard de la Foire, L-1528 Luxembourg. Glossary

Benchmark

An index that is used to measure the performance of an investment fund with the purpose of tracking the return of such index or of defining the asset allocation of a portfolio or of computing the performance fees.

Beta

A measure of sensitivity - given as the average percentage change in the price of a fund when the market (benchmark) rises or falls by 1%. A value over (under) 1 means that on average the fund exhibits more (less) volatility than the benchmark. The figure is calculated on a 3-yearly basis.

Duration (Modified Duration)

Duration is an indication of how much a bond's price could be affected by a change in interest rates.

Effective Duration

Is a measure of the potential impact on a bond or portfolio price of a 1% change in interest rates across all maturities.

Hedging

Where a Class of Shares is described as hedged ("Hedged Share Class"), the intention is to hedge the Net Asset Value in the Reference Currency of the Sub/Fund into the Currency of the Hedged Share Class.

Information ratio

The information ratio (IR) is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns

Jensen's Alpha

Yield indicator. If the average return on a security or portfolio is larger than its expected return, the alpha is positive. If the average return is smaller than expected, the alpha is negative.

Management Fee

Is a fee which covers all costs relating to possible services rendered in connection with investment management and distribution. Please refer to the fund's prospectus for a complete description.

NAV

The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding.

Performance Fee

The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's prospectus for a complete description.

Reference Index

The difference to benchmark is that the reference index is not used for calculation of performance fees.

Sharpe Ratio

The Sharpe ratio indicates the additional reward per unit of risk compared to a risk/free investment. It reveals how much performance was achieved at what level of risk.

TER

The fees and incidental costs charged on the management of collective investment schemes are to be disclosed using the internationally recognized Total Expense Ratio (TER). This ratio expresses the sum of all fees and incidental costs charged on an ongoing basis to the collective investment scheme's assets (operating expenses) taken retrospec-tively as a percentage of the net assets

Tracking error

Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error.

Volatility

Volatility (or risk or standard deviation) is an indicator of the range of fluctuation of the annualized performance of a fund over a certain period.

Weighted Average Coupon (WAC)

The coupon is the annual interest rate paid by a bond issuer on the face value of the bond.

Yield to Maturity

The rate of return anticipated on a bond if it is held until the maturity date.

Yield to Worst

The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions are used by the issuer.
