Vontobel

Fund Factsheet / 31.10.2026

Vontobel Fund - US Dollar Money B, USD

Marketing document for retail investors in: CH

Investment objective
This actively managed bond fund aims to achieve good investment returns in US dollars.

Key features
While respecting risk diversification, the fund invests worldwide predominantly in US-dollar-denominated short-term bonds, notes, and similar interest-bearing securities and money-market instruments of sovereign and corporate issuers rated investment grade (S&P ratings AAA to BBB-, or similar). Specific limits apply for certain instruments, including convertible or warrant bonds, ABS, and MBS. The residual maturity of the bonds held in the portfolio shall not exceed 3 years, and the average portfolio maturity shall not exceed 1 year. The fund may use derivatives to achieve its investment objective. It uses its benchmark for performance comparison. The investment team has full discretion.

Approach
The investment team takes high-conviction decisions based on in-depth economic, relative-value, and issuer analyses. It continuously evaluates inefficiencies across global markets to identify opportunities across interest rates, credit spreads, and currencies. With the focus on risk/return optimization, it dynamically adapts the portfolio, striving to seize opportunities and control risk.

Summary Risk Indicator (SRI)

The SRI is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

1	2	3	4	5	6	7

◄ Lower risk — Higher risk ►

The risk indicator assumes you keep the product for 3 years.

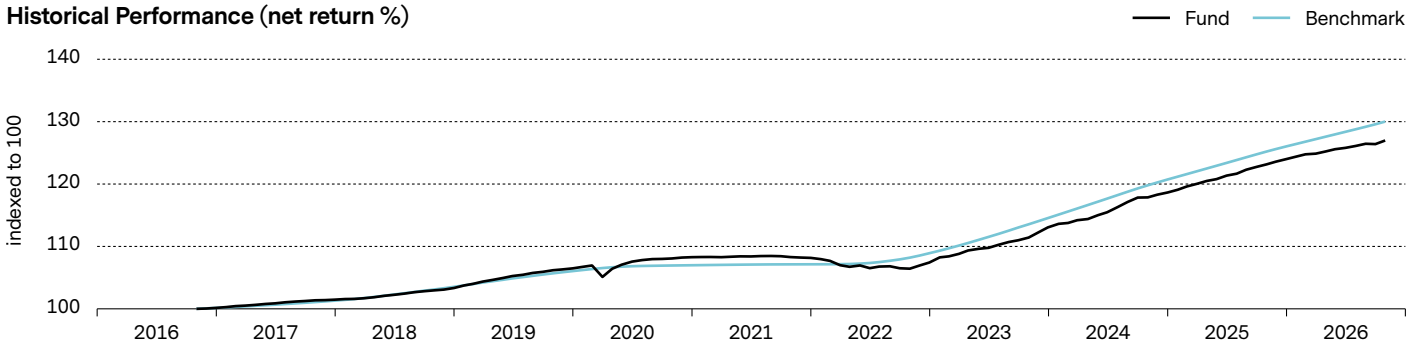

Portfolio management	Daniel Karnaus

Risks

Investing in the Sub-Fund implies the following risks which are described in detail in the section “Risks” of the Sales Prospectus. The table below explains which risks are specifically related to the Sub-Fund and could affect an investment in the Sub-Fund.

Investment Fund Risks	Investment Management Risks	Other Risks
– Performance Risk	– Fixed Income Risk	– Sustainability Risk
– Market Risk	– Credit Risk	
– Operational Risk	– Interest Rate Risk	
– Liquidity Risk	– Financial Derivative Instruments Risks	
	– Currency Risk	
	– Currency Trading Risk	

Any of these risks could cause a Sub-Fund to lose money, to perform less well than similar investments, to experience high volatility of the Share price, or to fail to meet its investment objective over any period of time. It cannot be guaranteed that the investor will recover the capital invested.

Glossary

Alpha, or Jensen's Alpha, is a measurement of the performance of a fund relative to its reference index. Alpha is positive (or negative) when the relative performance is larger (or smaller) than that of the reference index. **Average Maturity** indicates the length of time until the initial investment amount of a bond is due to be repaid. "Average maturity" is calculated on a bond portfolio by weighting each bond's residual maturity by its relative size. **Average Rating**, or credit rating, assesses a bond issuer's ability to repay on time all its debt (interest and principal). High ratings, like AAA or Aaa, indicate low risk (i.e., low probability of default), while ratings such as BBB- or Baa3 indicate a higher risk. **Benchmark** is an index, a rate, or a combination thereof, to which funds are compared in order to measure the relative performance of a fund. **Beta** is a measure of a fund's sensitivity compared to a market (represented by its reference index). A beta of 1.05 means that a fund’s prices move 5% more than the index when the market rises or falls. **Coupon** is a payment to holders of bonds on a pre-defined basis, normally with a specific periodicity and percentage. Average Coupon for a bond fund is calculated as capital-weighted average of the coupon rates of all bonds in a portfolio. **Distribution policy** of a fund defines the dividend distribution for its share classes to investors. Accumulating share classes reinvest the income received from the fund holdings back into the fund and do not distribute to shareholders. Distributing shares typically make cash payments to shareholders on a periodic basis. **Effective duration**, also called option-adjusted duration, is used to calculate the interest rate sensitivity of bonds that have uncertain cash flows due to embedded options. **Information ratio** is a measurement of portfolio returns in excess of the reference index per unit of return volatility. It is used to measure a portfolio manager's ability to generate excess returns relative to a reference index. **ISIN** (International Securities Identification Number) is a unique code that identifies a specific financial security. It is assigned by a country's respective national numbering agency (NNA). **Management fee** is a fee which covers the costs charged to a fund relating to portfolio management services and, if applicable, to distribution services. **Net Asset Value** (**NAV**) / **share** also known as the share price of a fund, represents the value per share of the fund. It is calculated by dividing the fund’s assets less its liabilities by the number of shares outstanding. For most funds it is calculated and reported daily. **Ongoing charges** expresses the sum of the costs of running a fund on an ongoing basis, like the management fee and various legal and operating costs. It is calculated retroactively over a period of 12 months as a percentage of the fund assets. If the available data is insufficient, for example, for newly launched funds, ongoing charges may be estimated using data from funds with similar characteristics. **Share class** is a compartment of a fund with a distinct client type, distribution policy, fee structure, currency, minimum investment, or other characteristics. The characteristics of each share class are described in the fund prospectus. **Sharpe ratio** measures excess return per unit of risk. The ratio is the average return earned in excess of the risk-free rate per unit of volatility. A portfolio with a higher Sharpe ratio is considered superior relative to its peers. **SRI** (Summary Risk Indicator) is a guide to the level of risk of this fund compared to other products. For details on the SRI, please refer to the KID. The risks relevant for the fund are detailed in its sales prospectus. **Swing Pricing eligible** is an industry standard mechanism to protect long term investors in a fund against trading costs occurring when investors enter or exit the fund. This is achieved by adjusting the NAV upwards or downwards respectively so that the additional trading costs caused by subscriptions or redemptions are borne by investors trading in the fund. Full details of the Swing Pricing mechanism are given in the fund prospectus. **Tracking error** is the standard deviation of the difference between the returns of a fund and its reference index, expressed as a percentage. The more actively a fund is managed, the higher the tracking error. **VALOR** is an identification number issued by SIX Financial Information and assigned to financial instruments in Switzerland. **Volatility** measures the fluctuation of a fund's performance over a certain period. It is most commonly expressed using the annualized standard deviation. The higher the volatility, the riskier a fund tends to be. **WKN** (or Wertpapierkennummer) is an identification code of securities registered in Germany, issued by its Institute for Issuance and Administration of Securities. **Yield to maturity** (**YTM**) measures the return of the fund if all the bonds in the portfolio of the fund were held to maturity. The ratio is expressed as an annual return in percent.

Important information

This marketing document was produced by one or more companies of the Vontobel Group (collectively "Vontobel") for retail clients for distribution in CH.

This document is for information purposes only and does not constitute an offer, solicitation or recommendation to buy or sell shares of the fund/fund units or any investment instruments, to effect any transactions or to conclude any legal act of any kind whatsoever. Subscriptions of shares of the fund should in any event be made solely on the basis of the fund's current sales prospectus (the "Sales Prospectus"), the Key Information Document ("KID"), its articles of incorporation and the most recent annual and semi-annual report of the fund and after seeking the advice of an independent finance, legal, accounting and tax specialist. Furthermore and before entering into an agreement in respect of an investment referred to in this document, you should consult your own professional and/or investment advisers as to its suitability for you. Furthermore and before entering into an agreement in respect of an investment referred to in this document, you should consult your own professional and/or investment advisers as to its suitability for you.

For products with the ESG SFDR Category Art. 6, the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Past performance is not a reliable indicator of current or future performance. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable. The return of the fund may go down as well as up due to changes in rates of exchange between currencies. The value of the money invested in the fund can increase or decrease and there is no guarantee that all or part of your invested capital can be redeemed.

Interested parties may obtain the above-mentioned documents free of charge from the authorised distribution agencies and from the offices of the fund at 17, Boulevard de Kockelscheuer, L-1821 **Luxembourg**, in **Switzerland**, from the representative Vontobel Fonds Services AG and the paying agent Bank Vontobel AG, both at Gotthardstrasse 43, 8022 Zurich. Refer for more information on the fund to the latest Sales Prospectus, annual and semi-annual reports, available in English and German. The Key Information Document ("KID") is made available in the local language of each European country where the fund is distributed. These documents may also be downloaded from our website at vontobel.com/am. A summary of investor rights is available in English under the following link: Information on Investor Protection. Vontobel may decide to terminate the arrangements made for the purpose of marketing its funds in any country at any given time. Appropriate information will be communicated to investors.
