Annual report including audited financial statements as of August 31, 2025

This document does not constitute an offer to purchase or subscribe to shares. Subscription to shares of the Sub-Funds of Vontobel Fund, a Luxembourg SICAV, should always be undertaken only on the basis of the Sales Prospectus, the Key Information Document (KID), the Articles of Association, and the annual and semi-annual reports (plus, in the case of Italy, the Modulo di Sottoscrizione). We also recommend that you contact your relationship manager or other advisors prior to each investment. An investment in Sub-Funds of Vontobel Fund involves risks, which are explained in the Sales Prospectus. All the above-mentioned documents and a list of the changes in the portfolio during the financial year and the composition of the benchmarks are available free of charge from Vontobel Fonds Services AG, Gotthardstrasse 43, CH-8022 Zurich, as representative in Switzerland; Bank Vontobel AG, Gotthardstrasse 43, CH-8022 Zurich, as paying agent in Switzerland; Erste Bank der oesterreichischen Sparkassen AG, Am Belvedere 1, A-1100 Vienna, as facilities agent for Austria; PwC Tax and Advisory, Société coopérative - GFD, 2, Rue Gerhard Mercator, L-2182 Luxembourg as facilities agent for Germany; authorized distribution agencies and the registered office of the Fund, 49, Avenue J.F. Kennedy, L-1855 Luxembourg, or at www.vontobel.com/am.

The shareholders agree that Vontobel Fonds Services AG, Zurich, may consult entries in the register of shareholders in order to offer services to shareholders.

Report of the Board of Directors for the financial year from September 1, 2024 to August 31, 2025

Dear investors,

During the financial year under review, the assets of Vontobel Fund increased by 5.91%, from CHF 29,879.06 million to CHF 31,645.37 million. This increase in assets is primarily due to increase in net inflows.

The following Sub-Fund was launched during the financial year:

Vontobel Fund –	Currency	Launch date
European Equity Income Plus	EUR	25.03.2025

The following Share Classes were launched during the financial year:

Please find detailed information on the individual Share Classes and their respective performance during the financial year under review in the respective reports and statements.

For information on the events during and after the financial year, see points 17 and 18 of the Notes to the financial statements.

The Board of Directors points out that the statements contained in the auditor's opinion with respect to the statutory responsibility of the Board of Directors are exclusively those of the auditor. The responsibilities and obligations of the Board of Directors are regulated by law. The Board of Directors considers that it has met these obligations in their entirety.

The Board of Directors

Notes to the Financial Statements

1 General information

Vontobel Fund (hereinafter referred to as the "Fund") is an open-ended investment company with variable capital under Luxembourg law, incorporated on October 4, 1991 for an indefinite duration as a "Société d'Investissement à Capital Variable" ("SICAV") in accordance with the provisions of Part I of the amended Luxembourg Law of December 17, 2010 on Undertakings for Collective Investment. The Fund's financial year ends on August 31.

The legal basis for the Fund is laid down by the Articles of Association of the Fund. The Fund's Articles of Association were published for the first time on November 18, 1991 in the Luxembourg Official Gazette ("Mémorial C, Recueil des Sociétés et Associations-Mémorial") and last amended on April 30, 2016. They are filed with the Trade and Companies Register of the District Court of Luxembourg where they may be consulted and copies thereof may be obtained.

The Fund is registered in the Luxembourg Trade and Companies Register with registration number B38170.

The Fund is composed of several sub-funds ("Sub-Funds"), each of which represents a specific portfolio of assets and liabilities and is managed in accordance with its own specific investment objectives.

As at August 31, 2025, the Fund had the following Sub-Funds and Share Classes available:

Vontobel Fund –	Sub-Fund Currency	Distributing and accumulating Share Classes
Swiss Money	CHF	A, B, I, N, R
Euro Short Term Bond	EUR	A, AN, B, C, HN (CHF), HNG (CHF), I, N, NG, R

The Articles of Association permit the Fund's board of directors ("Board of Directors") at any time to issue various share classes ("Share Classes") within a Sub-Fund, the assets of these Share Classes being managed jointly. The Share Classes may, however, differ in their specific characteristics, e.g. with respect to their investor profile, fee structure, minimum investment amount, taxation and their distribution policy.

The Board of Directors may at any time decide to issue the Share Classes listed below for each Sub-Fund. Share classes may be issued in the reference currency of the Sub-Fund or in alternative currencies. If the alternative currency is hedged against currency fluctuations with respect to the reference currency of the Sub-Fund, this will be indicated by the addition of the letter "H" and the term "hedged" to the name of the Share Class. The net asset value and, accordingly, the performance of the corresponding hedged shares may differ from the net asset value of the corresponding shares in the reference currency.

Further details of available Share Classes can be obtained from the registered office of the Fund or the Management Company and are available along with current prices and KIDs at vontobel.com/am at any time. As noted below, certain Share Classes are reserved for specific investors. Not all Share Classes are available in all countries in which the Fund has been approved for distribution:

a) Share classes with entitlement to distributions:

- A shares may be subscribed by any type of investor and distribute annually.
- AM shares may be subscribed by any type of investor and distribute monthly.
- AQ shares may be subscribed by any type of investor and distribute quarterly.
- AS shares may be subscribed by any type of investor and distribute semi-annually.

The Board of Directors may, at its sole discretion, resolve on the amounts to be distributed to the shareholders.

The Board of Directors may decide to issue gross distributing share classes which may pay out distributions gross of fees and expenses. To achieve this, all or part of their fees and expenses may be paid out of capital, resulting in an increase in distributable income for the payment of dividends to such classes of shares. This may result in distribution of income and, in addition, both realized and unrealized capital gains, if any, and capital attributable to such Shares within the limits set up by Luxembourg law. Distribution of capital represents a withdrawal of part of an investor's original investment. Such distributions may result in a reduction of the net asset value per Share over time and the net asset value per Share may fluctuate more than other Share Classes. These gross distributing share classes will be indicated by the addition of the term "Gross" to the name of the Share Class entitled to distributions.

The use of income, and in particular any final distribution amount to be paid out, will be decided for each Share Class by the general meeting of Shareholders of the Fund, which may override the distribution provisions set out in the Sales Prospectus.

The Board of Directors may at any time decide to issue Share Classes with entitlement to distribution which are combined with characteristics of the following accumulation Share Classes (e.g. "AQG" share classes). These Share Classes will be entitled to distributions but provide apart from that the same characteristics as accumulation shares.

b) Share classes not entitled to distributions (accumulation shares):

- B shares may be subscribed by any type of investor and are accumulating (no distribution).
- C shares may be subscribed by any type of investor and are accumulating (no distribution). They are only available through specific distributors.
- E shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the Law of 2010 and are accumulating (no distribution). The Board of Directors may at any time decide to close E shares for subscriptions by further investors upon reaching a certain amount of subscription monies. Such amount will be determined per Share Class per Sub-Fund. The Board of Directors reserves the right to determine the Management Fee per Share Class per Sub-Fund.
- F shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the Law of 2010, which invest and hold at least 20 million in the currency of the Sub-Fund or who have concluded a corresponding agreement with a company in the Vontobel Group. F shares are accumulating (no distribution) and shall be issued only by Sub-Funds which envisage a Performance Fee in the Special Part of the Sales Prospectus applicable to the relevant Sub-Fund; F shares shall provide a higher management fee than other share classes for institutional investors whereas a Performance Fee shall not be calculated for and not be charged to the F shares.

Notes to the Financial Statements

1 General information (continued)

- G shares are reserved exclusively for institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which invest and hold at least 50 million in the currency of the Sub-Fund. An investor is still considered eligible for this Share Class if the value of his holdings falls below the above minimum holding threshold due to market movements. G Shares are accumulating (no distribution).
- H (hedged) shares may be subscribed by any type of investor and are accumulating (no distribution) and are issued in a currency other than the reference currency of the relevant Sub-Fund. The subscription currency of the Share Class is always hedged against the reference currency of the relevant Sub-Fund. However, the extent of the hedge may slightly fluctuate around the full hedge level.
- PH (partially hedged) shares may be subscribed by any type of investor, are accumulating (no distribution) and are issued in a currency other than the reference currency of the relevant Sub-Fund. PH (partially hedged) shares will seek to hedge only exposure to the proportion of the main investment currency of the portfolio of a Sub-Fund against the currency of the Share Class. Investors should be aware that these Share Classes will retain a level of currency exposure to the other investment currencies of the Sub-Fund portfolio other than the main investment currency. This exposure can be significant. For example: The Reference Currency of a Sub-Fund is USD, the Share Class currency is CHF and the main part of the Sub-Fund's assets is invested in EUR. This PH CHF Share Class seeks to hedge only the proportion of the EUR portion of the Sub-Fund's portfolio against CHF. The PH CHF share class thus will retain currency exposure to the other investment currencies of the Sub-Fund's portfolio.
- I shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law and are accumulating (no distribution).
- N shares may be subscribed only:
 - by investors who are prohibited from accepting and retaining inducements from third parties under applicable laws and regulations or court rulings, such as in the United Kingdom and the Netherlands and
 - by investors with separate fee arrangements with their clients for the provision of discretionary portfolio management services or independent advice services or who have a separate fee arrangement with their clients for the provision of non-independent advice in cases in which they have agreed not to accept and retain inducements from third parties.

The shares are accumulating (no distribution) and do not grant any rebates or retrocessions.

- R shares may be subscribed only by investors who are entitled, according to staff regulations of a Vontobel company, to hold shares in their respective account / deposit at Bank Vontobel AG, Zurich, according to employee terms or who have concluded a special agreement with a Vontobel company. It is therefore possible that these shares will be subscribed and held by persons who have access to non-public, material information in relation to the relevant Sub-Fund. In order to prevent conflicts of interest, the Vontobel Group and associated companies have issued corresponding directives, compliance with which is constantly monitored.
- S shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which have concluded a corresponding agreement with a company in the Vontobel Group (including the Management Company) and are accumulating (no distribution). Neither management fee nor performance fee are charged for the S Share Class; Fees, if any, are charged directly by the contracting company in the Vontobel Group to the investor under the aforementioned corresponding agreement.
- U shares may be subscribed by any type of investor and are accumulating (no distribution). Provisions governing issuance of fractions of shares are not applicable to U Shares. Converting U Shares into Shares of other Share Classes in the Fund is not permitted.
- V shares are reserved exclusively for institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law, who are a company in the Vontobel Group, or have a cooperation agreement with a company of the Vontobel Group. V Shares are accumulating (no distribution) and do not grant any rebates or retrocessions to the investors;
- X shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which invest at least 50 million in the currency of the Share Class per initial subscription and who have concluded a corresponding agreement with a company belonging to the Vontobel Group. X shares are accumulating (no distribution).
- Y shares are reserved exclusively for institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which invest and hold at least 500 million in the currency of the Sub-Fund. An investor is still considered eligible for this Share Class if the value of his holdings falls below the above minimum holding threshold due to market movements. Y Shares are accumulating (no distribution).

The Board of Directors may at any time decide to issue Share Classes which provide a combination of various characteristics of Share Classes.

The above-mentioned Share Class types or combinations thereof may contain the additional denominations from "1" to "10". These Shares shall have the same architecture as the Share Classes from which they have been derived, but shall have one or another feature distinguishing them from the Share Classes from which they have been derived. Such special feature may include distributors who are domiciled in certain countries or carry out their business in those countries and who act on behalf of their own clients (who may be any type of investor) providing they fulfill the general eligibility criteria for the relevant Share Class, investors who have concluded a corresponding agreement with a company belonging to the Vontobel Group or similar.

Notes to the Financial Statements

1 General information (continued)

There is a required minimum investment and/or holding amount for the acquisition and/or holding of Shares in several Shares Classes as set out above. The Board of Directors or the Management Company, after taking into consideration the equal treatment of the shareholders, have discretion to permit a lower minimum investment/holding amount in qualifying cases.

If a shareholder of any Share Class does not or does no longer fulfil the criteria provided for an investor in this Share Class, the Fund shall be entitled to repurchase the shares concerned in accordance with the provisions for redemption in the Sales Prospectus. The shareholder shall be informed that such measure has been taken. Alternatively, the Board of Directors may offer to such investor to convert the shares concerned into shares of another Share Class for which the investor fulfils all the eligibility criteria.

A number of different Share Classes may be issued within a single Sub-Fund.

2 Accounting principles

a) Financial statements

The financial statements have been drawn up in accordance with Luxembourg legal provisions relating to investment funds.

The financial statements for the Fund have been prepared on a going concern basis, with the exception of the sub-fund Vontobel Fund - Eastern European Bond, which has been prepared on a non-going concern basis. For this latter sub-fund, the assets and liabilities as of August 31, 2025 have been presented at their net realizable values and estimated settlement values respectively, being deemed to equate to their fair values/nominal values as appropriate as of August 31, 2025.

As of August 31, 2025, the NAVs of these financial statements were determined for each of the Sub-Funds on the basis of the valuation of the underlying assets at the latest prices available as of August 29, 2025.

b) Valuation of the assets

- i. The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforementioned and not yet received shall be deemed to be the full amount thereof, unless it is possible that the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at by deducting a sum that the Company considers appropriate in such case to reflect the true value thereof.
- ii. The value of all securities and/or derivative financial instruments listed or traded on the exchange is based on the last-known price on the day before the valuation day. Exceptions to this are the securities and/or derivative financial instruments held by the Sub-Funds specified in the Special Part of the Sales Prospectus, which, in accordance with their investment policy, are invested in Asia and the Far East and the value of which is measured on the basis of the last-known price at the time of valuation on the valuation day.
- iii. The value of securities and/or derivative financial instruments traded on other regulated markets shall be calculated on the basis of the closing price on the day preceding the valuation day.
- iv. If any of the securities and/or derivative instruments in the Fund's portfolio on the relevant valuation day are neither listed or traded on any official stock exchange nor on any other regulated market or if, the price as determined pursuant to paragraphs ii. and iii. is not representative of the fair market value of the relevant securities and/or derivative instruments listed or traded on an official stock exchange or other regulated market, the value of these securities and/or derivative instruments shall be determined prudently and in good faith based on a value resulting from the application of the recognized valuation rules or models.
- v. For fixed-income or variable-rate money market paper and securities with a residual term to maturity of less than three months, the valuation price may be successively adjusted to the redemption price, taking the net purchase price as a starting point, while maintaining the resulting yield. The valuation price calculated using this method may differ from the actual market price, if it can be ensured that this will not lead to a material difference between the actual value of the security and the adjusted valuation price. Where significant differences in market conditions exist, the basis for valuing the individual investments will be adapted in line with new market yields.
- vi. Units or shares in undertakings for collective investment shall be valued at the last available net asset value.
- vii. In the event that the above valuation methods should prove inappropriate or misleading, the Board of Directors may adjust the value of the investments or allow the use of a different valuation method for the Fund's assets.

The Board of Directors is entitled to temporarily apply other generally recognized valuation methods that are used in good faith and are verifiable by the Fund's auditors in order to calculate the assets of the Fund and/or the assets of a Sub-Fund if the aforementioned valuation criteria appear to be impossible or inexpedient due to exceptional circumstances, or if this is in the interests of the Fund or a Sub-Fund and/or shareholders (e.g. to avoid market timing) to achieve an appropriate valuation of the Fund and/or the Sub-Fund concerned.

c) Net realized gain/loss on the sale of securities

Realized net profits and net losses from the sale of securities are calculated on the basis of average costs. Realized profits and losses are reported in the statement of operations and changes in net assets under "Net realized gain/loss on investments".

Notes to the Financial Statements

2 Accounting principles (continued)

Changes in unrealized gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealized appreciation/depreciation on investments".

d) Income

Dividends are recognised as income in the statement of net income / loss on the day on which the security is first listed as ex-dividend, provided this information is available to the Fund. Accrued interest is allocated on a daily basis. Coupons received from the issuers of the underlying securities are included in the position "Net interests on bonds". Dividends received from the issuers of the underlying securities are included in the position "Net dividends". Interests and dividends receivable for the Fund are booked to "Net receivable on interests and dividends".

e) Valuation of futures

Futures are valued on the basis of the last available price. Realized net profits and net losses from the sale of futures are calculated according to the FIFO-principle. Net profits and net losses are reported net in the statement of operations and changes in net assets under "Net realized gain/loss on futures".

Changes in unrealized gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealized appreciation/depreciation on Futures".

The outstanding futures are shown in Note 10.

f) Valuation of forward foreign exchange contracts

Forward foreign exchange contracts are valued on the basis of the forward foreign exchange rates on the valuation date. Realized net profits and net losses are reported in the statement of operations and changes in net assets under "Net realized gain/loss on forward foreign exchange contracts".

Changes in unrealized gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealized appreciation/depreciation on forward foreign exchange contracts".

The outstanding forward foreign exchange contracts are shown in Note 10.

g) Valuation of options

Options are valued on the basis of the last available price. Realized net profits and net losses are reported in the statement of operations and changes in net assets under "Net realized gain/loss on options".

Changes in unrealized gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealized appreciation/depreciation on options".

The outstanding options are shown in Note 10.

h) Valuation of swaps

The value of the traded swaps is calculated by State Street Bank International GmbH, Luxembourg Branch on the basis of the net asset value of all monetary flows, both inflows and outflows. This valuation method is used with the Fund's consent. If extraordinary circumstances render a valuation in accordance with the aforementioned method impracticable or inadequate, the Fund is authorized to use other generally accepted and auditable valuation methods in good faith in order to achieve an appropriate valuation of the net assets.

Profits and losses are reported in the statement of operations and changes in net assets under "Net realized gain/loss on swaps / contracts for difference". Interest is recognised as income or expenses and recorded in the Statement of Net Income / Loss under "Net interests on swaps".

Changes in unrealized appreciation and depreciation are reported in the statement of operations and changes in net assets under "Change in unrealized appreciation/depreciation on swaps / contracts for difference".

The outstanding swaps are shown in Note 10.

i) Other assets/liabilities

Other assets arise mainly from recoverable taxes and costs.

Other liabilities arise mainly from provisions for general tax advice, other costs, clearing brokerage costs and legal fees.

j) Combined financial statements

The reference currencies of the Sub-Funds are converted into Swiss francs to produce combined financial statements (annual and semi-annual reports) that comply with provisions under Luxembourg Law.

Notes to the Financial Statements

2 Accounting principles (continued)

k) Conversion of items in foreign currencies

Cash at banks, financial instruments as well as other assets / liabilities that are expressed in currencies other than the reference currency of the different Sub-Funds, are converted at the last known exchange rate on the valuation day. Income and expenses expressed in currencies other than the reference currency of the different Sub-Funds are converted at the exchange rate on the transaction day. Realized profits and losses on currency exchanges are reported in the statement of operations and changes in net assets under "Net realized gain/loss on currency exchange".

The acquisition cost of securities expressed in currencies other than the reference currency of the different Sub-Funds are converted at the exchange rate of the acquisition date.

l) Formation expenses

The formation expenses for the Fund have been allocated to the individual Sub-Funds in proportion to their initial subscription amounts and were written off in full over a period of five years.

m) Taxation

With the exception of the "taxe d'abonnement" (subscription tax) listed under Note 4, the Fund is not subject to any Luxembourg taxes. However, in accordance with the applicable foreign legislation, the Fund may be subject to capital gains taxes and withholding tax on interest and dividend income at differing rates.

For the purpose of disclosure, non-refundable withholding taxes are deducted from the gross dividends/interest amounts. Capital gains taxes are deducted from sales proceeds as a reduction in realized profits.

Tax implications for direct investments: Some Sub-Funds may invest directly in India. In case of direct investments in India, the relevant Sub-Funds may be subject to taxes on revenue and/or capital gains as well as potentially other taxes or levies due in accordance with applicable Indian legislation. Some or all of such amounts due may not be recoverable and/or not covered by double tax treaty between the Grand Duchy of Luxembourg and India.

n) Swing pricing

Trading in a Sub-Fund (in particular subscription and redemption activities) translates as a rule in corresponding trading activities in the portfolio of the relevant Sub-Fund (i.e. purchase of additional instruments in case of subscriptions and sale of instruments held in the portfolio of the relevant Sub-Fund in case of redemptions). Such trading activities entail various costs, including but not limited to bid-ask spreads, brokerage fees, transaction taxes and similar. Frequent trading in the portfolio of a Sub-Fund arising from frequent trading in the Sub-Fund may result in transaction costs that might be non-negligible and have a detrimental financial impact on the investors in the Sub-Fund, in particular on the long-term investors. To protect those investors, the Board of Directors may decide to apply the single swing pricing mechanism (the "SSP") in any Sub-Fund. The SSP mechanism adjusts the net asset value of the affected Sub-Fund, as calculated above, if a predetermined net capital activity threshold is exceeded ("partial" SSP), to accommodate it for those transaction costs. Subsequently, the adjustment takes place at the level of the relevant Sub-Fund and not at the level of an individual investor.

The adjustments of the net asset value on any valuation day in accordance with the SSP mechanism are made as follows:

- a) the net asset value of all Share Classes of the relevant Sub-Fund shall be increased by the applicable swing factor, as defined below, if the total subscriptions less the total redemptions for all Share Classes of the Sub-Fund on the relevant transaction day results in a net asset inflow (net subscriptions). Subsequently, subscribing investors shall receive a lower number of shares than they would receive without the application of the SSP while redeeming investors shall receive a higher redemption amount than they would receive without the application of the SSP (investors subscribing for a certain number of shares shall pay a higher total subscription amount); or
- b) the net asset value of all Share Classes of the relevant Sub-Fund shall be decreased by the applicable swing factor, as defined below, if the total subscriptions less the total redemptions for all Share Classes of the Sub-Fund on the relevant transaction day results in a net asset outflow (net redemptions). Subsequently, subscribing investors shall receive a higher number of shares than they would receive without the application of the SSP while redeeming investors shall receive a lower redemption amount than they would receive without the application of the SSP (investors subscribing for a certain number of shares shall pay a lower total subscription amount); or
- c) no change shall be made if the net asset inflow or net asset outflow on the relevant transaction day does not exceed a certain threshold which may be determined by the Board of Directors for the relevant Sub-Fund (single swing pricing threshold).

The maximum adjustment that may be made to the net asset value of the relevant Sub-Fund, as described above (Single Swing Pricing Factor) has been determined by the Board of Directors to amount to 1% of the net asset value of the relevant Sub-Fund. Exceptions to the 1% maximum are listed below.

Notes to the Financial Statements

2 Accounting principles (continued)

The effects of the SSP mechanism on the Sub-Funds on August 31, 2025, were as follows (a value of 0 for the Swing pricing adjustment means that the mechanism was not applied on August 31, 2025):

Vontobel Fund –	Sub-Fund Currency	Overall net assets before application of the swing factor	Swing pricing adjustment	Overall net assets after application of the swing factor
Swiss Money	CHF	72,919,750	0	72,919,750

Asian Bond	USD	12,784,476	0	12,784,476
Emerging Markets Investment Grade	USD	82,458,068	0	82,458,068

The following Sub-Funds are subject to single swing pricing and may apply a maximum single swing pricing factor of up to 3% of the Net Asset Value:

- Vontobel Fund – Sustainable Emerging Markets Local Currency Bond
- Vontobel Fund – Emerging Markets Debt
- Vontobel Fund – Sustainable Emerging Markets Debt
- Vontobel Fund – Emerging Markets Blend
- Vontobel Fund – Emerging Markets Corporate Bond
- Vontobel Fund – Asian Bond
- Vontobel Fund – Emerging Markets Investment Grade

The Board of Directors may decide to apply Single Swing Pricing Factors beyond the maximum adjustment level to a Sub-Fund in case of exceptional market circumstances, such as periods of high volatility, reduced asset liquidity and market stress.

All Sub-Funds subject to the application of the SSP mechanism may be consulted on the Internet at vontobel.com/am.

3 Management Fee and Performance Fee

a) Management Fee

The Sub-Funds pay a "Management Fee", which covers all costs relating to possible services rendered in connection with investment management and distribution and is payable at the end of every month. The composition of this Management Fee is determined by the Investment Managers, insofar as applicable, the Sub-Investment Managers and the distributors concerned. This Management Fee is calculated based on the average of the daily net asset values of the Sub-Fund concerned during the relevant month. The applicable fee rate is confirmed by the Board of Directors. The maximum fee rates for each Sub-Fund are defined in the Special Part of the Sales Prospectus.

Notes to the Financial Statements

3 Management Fee and Performance Fee (continued)

During the financial year, the applicable rates per annum and per Share Class were as follows:

Footnotes: in the table below, the following references are used:

- (1) Management Fee until termination of the Share Class.
- (2) Management Fee since launch of the Share Class.
- (3) See note 17.
- (4) Management Fee until the merger of the Sub-Fund with Vontobel Fund – European Equity Income Plus.

b) Performance Fee

In addition, a performance-related remuneration ("Performance Fee") may be charged to the Sub-Fund assets or to the relevant Share Classes, if such a Performance Fee is envisaged in the Special Part of the Sales Prospectus applicable to the Sub-Fund in question. The Performance Fee shall be calculated separately for each Share Class.

In case a Sub-Fund applies the single swing pricing mechanism, any performance fee in this Sub-Fund will be calculated and accrued on the basis of the unswung net asset value ("NAV").

Unless the Special Part of the Sales Prospectus specifies otherwise, the following principles shall apply to the calculation of the Performance Fee:

The Performance Fee shall be calculated on each Valuation Day and accrued in accounting terms. The Performance Fee owed shall be paid on the Valuation Day on which the Performance Fee is crystallized (the "Crystallization Day").

No equalization accounting or multi-series accounting methods, etc. shall be applied in calculating the Performance Fee. This may mean that an investor does not benefit from a positive performance, depending on the point in time when said investor subscribes to shares, but is charged a Performance Fee because of the positive overall performance of the Sub-Fund over the Performance Reference Period of at least five years.

If shares are redeemed during a Performance Reference Period, that part of the Performance Fee which has been accrued during the relevant Performance Fee Period up to the Redemption Day on which the shares are redeemed (as defined in and in accordance with section 13 "Redemption of shares" of the Sales Prospectus) shall also be retained – irrespective of whether or not a Performance Fee is owed on the Crystallization Day.

The Performance Fee shall be calculated on the basis of the "High Watermark Principle" ("HWM Principle") and the "Hurdle Rate Principle". The calculation method to be applied is stipulated in the Special Part of the Sales Prospectus for the relevant Sub-Fund.

When a Share Class of a Sub-Fund is launched, the first High Water Mark ("HWM") is identical to the initial issue price of the respective Share Class.

When a Performance Fee is subsequently introduced for a Share Class, the first HWM is identical to the NAV of the relevant Share Class as calculated on the Valuation Day on which the Performance Fee for the Share Class is introduced.

During the financial year, a performance fee was applicable for the following Sub-Fund:

- Vontobel Fund – Global Active Bond

Vontobel Fund – Global Active Bond

Share Classes	Currency	Performance fee rate	Amount (in Sub-Fund currency) of performance fee charged for the year*	% on the Share Class NAV of performance fee charges for the year

N	EUR	20%	1,648	0.43
R	EUR	20%	242	0.07
S	EUR	20%	0	0.00

*A yearly provision is created for the performance fee for each calculation day. If the NAV per share decreases during the calculation period, the provisions created for the performance fee are reduced accordingly. If these provisions drop to zero, no performance fee is payable.

For Vontobel Fund – Global Active Bond, EUR 255,404 performance fee was charged during the financial year.

4 Subscription tax

The Sub-Funds are, in principle, subject to a subscription tax (taxe d'abonnement) levied at the rate of 0.05% per annum based on their net asset value at the end of the relevant quarter, calculated and paid quarterly.

Subscription tax reduction

A reduced subscription tax rate per annum may however be applicable as follows:

- (i) 0.01% for a Sub-Fund authorized as Money Market Fund pursuant to Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.
- (ii) 0.01% for a Sub-Fund or Share Class provided that their shares are reserved to one or more institutional investors within the meaning of article 174 of the 2010 Law (an "Institutional Investor").

Subscription tax exemption

A subscription tax exemption may apply to:

- (i) The portion of any Sub-Fund's assets (prorata) invested in a Luxembourg investment fund or any of its sub-funds to the extent it is subject to the subscription tax;
- (ii) Any Sub-Fund (i) whose securities are reserved to Institutional Investor(s), and (ii) authorized as Money Market Fund pursuant to Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017, and (iii) that have obtained the highest possible rating from a recognized rating agency. If several Share Classes are in issue in the relevant Sub-Fund meeting (ii) to (iii) above, only those Share Classes meeting (i) to (iii) above will benefit from this exemption;
- (iii) Any Sub-Fund only held by pension funds and assimilated vehicles whose securities are reserved for:
 - a. institutions for occupational retirement, or similar investment funds, created by one or more employers for the benefit of their employees; or
 - b. companies of one or more employers investing their funds to provide retirement benefits for their employees.

5 Service Fee

The Fund pays a "Service Fee" which covers the costs involved in central administration, management, the Depositary function and support for the Fund. This Service Fee shall be calculated on the average daily net asset value of the relevant Sub-Fund during the relevant month and charged to the assets of the relevant Sub-Fund at the end of the month. It amounts to a maximum of 1.0494 % p.a. for all Share Classes. Commissions due to the Management Company, the UCI Administrator, the Depositary, the representatives and paying agents and information agents for the countries in which the Fund is sold are paid from this Service Fee.

6 Cross investments

Some Sub-Funds of Vontobel Fund invest in other Sub-Funds of Vontobel Fund. As at August 31, 2025, the value of these investments (known as "cross investments") amounts to:

In accordance with the 2010 Law as amended, no fees were charged for the subscription or redemption of shares of target funds that are managed by the same management company or by another company that is affiliated to the management company.

7 Related parties

In accordance with the 2010 Law, no fees were charged for the subscription or redemption of shares in target funds that are managed by the same Management Company or by another company affiliated with the Management Company.

The Sub-Funds Vontobel Fund – AI Powered Global Equity, Vontobel Fund – Active Beta Opportunities Plus and Vontobel Fund – Multi Asset Defensive were invested in funds of affiliated parties at the end of the financial year (see note 3).

9 Other expenses

"Other expenses" in the Statement of Net Income / Loss as at August 31, 2025 are mainly composed of Legal fees, General Tax advice, Director fees, Clearing brokerage fees and Operating expenses.

10 Balance-sheet transactions

The collateral received per Sub-Fund for each type of balance-sheet transaction are mentioned in section 10e).

a) Forward foreign exchange contracts

In order to protect its assets against currency fluctuations, the Fund may carry out transactions to dispose of foreign exchange forward contracts and call options on currencies, and to acquire put options on currencies. The arrangement of hedging transactions is subject to the condition that there is a direct connection between the transaction and the assets to be hedged. This means that transactions concluded in a given currency must not significantly exceed the total value of the assets denominated in that currency or the period during which the assets are held.

Notes to the Financial Statements

10 Balance-sheet transactions (continued)

The counterparties for the forward foreign exchange contracts listed below are: Barclays Bank, BNP Paribas, BofA Securities Europe S.A., CACEIS Bank, Luxembourg Branch, Citigroup Global Markets Limited, Deutsche Bank AG, HSBC Bank PLC, ICBC Standard Bank PLC, JP Morgan Securities PLC, Morgan Stanley & Co International PLC, Société Générale, Standard Chartered Bank, State Street Bank International GmbH, State Street Bank London, State Street Bank Taipei and UBS AG.

13 Russia/Ukraine situation

In February 2022, a number of countries (including the US, UK and EU) imposed sanctions against certain entities and individuals in Russia as a result of the official recognition of the Donetsk People Republic and Lugansk People Republic by the Russian Federation. Additional sanctions continued to be imposed following the war initiated by Russia against Ukraine on February 24, 2022. The situation, together with growing turmoil from fluctuations in commodity prices and foreign exchange rates, has adversely impacted global economies and has driven a sharp increase in volatility across markets. The Board of Directors used fair value methodology to evaluate the impacted portfolios. For details on Sub-Funds invested in securities issued by Russian or Ukrainian entities for which a fair value was applied as a consequence of the events, please refer to note 11, Securities valuation.

The Board of Directors continues to monitor the evolving situation and its impact on the financial position of the Sub-Funds.

14 Transaction costs

Transaction costs are costs incurred by the Fund as a result of buying and selling securities and derivatives as part of portfolio management.

15 TER (Total Expense Ratio)

In accordance with the Asset Management Association Switzerland (AMAS) guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of May 16, 2008 (version dated August 5, 2021), the Fund must show a TER for the past 12-month period. This figure expresses the total fees and costs which are charged on an ongoing basis to the Sub-Fund's assets as a percentage of net Sub-Fund assets (operating expenditure), and is generally calculated according to the following formula:

$$\text{TER} = \frac{\text{Total operating expenses in CU}^*}{\text{Average net Fund assets in CU}^*} \times 100$$

* CU = currency units in Sub-Fund accounting currency

Notes to the Financial Statements

16 Contingent Assets

As of August 31, 2025, some of the Sub-Funds of the Fund are involved in some collective legal actions ("Class Actions"). In the context of these procedures, these Sub-Funds could receive, with no certainty, compensations related to losses occurred in the course of previous financial years.

17 Events during the financial year

On December 5, 2022, the Sub-Fund Vontobel Fund - Eastern European Bond was put into liquidation. The last official Net Asset Value dated as at December 13, 2022 amounted to EUR 22,468,412. On December 16, 2022, first liquidation proceeds corresponding to proceeds from the sale of the liquid assets in the Sub-Fund and amounting to EUR 18,914,439 were paid to the shareholders of the Sub-Fund. The shareholders keep holding shares representing the remaining sanctioned assets. The unofficial Net Asset Value as at August 31, 2025 was calculated for the purpose of the presentation in the financial statements. Assets and liabilities of the Sub-Fund as at August 31, 2025 and the changes in net assets (profits and losses) for the financial year then ended are presented in the Statement of Net Assets, the Statement of Operations and Changes in Net Assets and Statement of Net Income / Loss of the Sub-Fund.

The Board of Directors decided to appoint State Street Bank International GmbH, Luxembourg Branch, ("SSB") having its registered office at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, registered with the R.C.S. Luxembourg under no. B148186, the Luxembourg branch of State Street Bank International GmbH, a limited liability company (Gesellschaft mit beschränkter Haftung) incorporated and existing under the laws of Germany, having its registered office at Brienner Strasse 59, 80333 Munich, Germany and registered in the commercial register in Munich with company number HRB 42872 in replacement of CACEIS Bank, Luxembourg Branch as new Depositary and Domiciliary Agent of the Fund, and to approve the appointment of SSB by the Management Company, for the functions of UCI Administrator, including Registrar and Transfer Agent of the Fund, all with effect from October 7, 2024 (the "Effective Date").

As a result of the appointment of SSB as Domiciliary Agent, as from the Effective Date the registered office of the Fund was moved to 49, Avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg.

On March 25, 2025, the Sub-Fund Vontobel Fund – European Equity Income Plus was launched.

On March 25, 2025, the Sub-Fund Vontobel Fund – Asia ex Japan was merged into the Sub-Fund Vontobel Fund – European Equity Income Plus.

On April 25, 2025, the sub-fund Vontobel Fund II – mtX China A-Shares Leaders was merged into the Sub-Fund Vontobel Fund – mtX Sustainable Asian Leaders (ex Japan) (subsequently renamed as per the below).

Notes to the Financial Statements

17 Events during the financial year (continued)

On May 6, 2025, the following Sub-Funds were renamed:

Previous Sub-Fund name	New Sub-Fund name
Vontobel Fund –	Vontobel Fund –
Sustainable Swiss Franc Bond	Swiss Franc Bond Foreign
Energy Revolution	Transition Resources
mtx Sustainable Asian Leaders (ex Japan)	mtx Asian Leaders (ex Japan)
mtx Sustainable Emerging Markets Leaders	mtx Emerging Markets Leaders
Smart Data Equity	AI Powered Global Equity
Sustainable Global Bond	Global Bond
TwentyFour Monument European Asset Backed Securities	TwentyFour Asset Backed Securities

18 Events after the end of the financial year

On September 25, 2025, the Sub-Fund Vontobel Fund – Active Beta Opportunities Plus was merged into the sub-fund Vontobel Fund II – Active Beta Opportunities.

On November 6, 2025, the Sub-Fund Vontobel Fund – Global Bond was merged into the Sub-Fund Vontobel Fund – Global Active Bond.

Additional Unaudited Information

1 Performance

Historical performance is not an indicator of current or future performance. Performance data do not take account of any commissions and expenses charged on the issue and redemption of shares, or of possible custody fees or withholding taxes that decrease the value of the assets.

The Fund's return can rise or fall due to currency fluctuations. Investors should note that past performance is not necessarily indicative of the future performance of the various Sub-Funds.

Investors need to be aware of the following key points concerning the presentation of the benchmark performance:

1. **Single Benchmark:** For some Sub-Funds, a single benchmark applies to all Share Classes, irrespective of their currency.
2. **Hedged Benchmark:** For other Sub-Funds, which apply hedged benchmarks, the benchmark performance will be disclosed in all Share Class currencies.
3. **Conversion Indicator:** Benchmarks marked with * represent a benchmark performance value converted to the Share Class currency using the exchange rate as at the end of each reporting period.
4. **Calculation Reference:** The value of the benchmark performance is calculated from the launch date of the oldest Share Class in the Sub-Fund still active at the closing date of this report.

The performance figures have been calculated in accordance with the guidelines on the calculation and publication of performance data of the Asset Management Association Switzerland (AMAS) of May 16, 2008 (version dated August 5, 2021).

Footnotes: In the table below, the following references are used:

- (1) Performance until the termination of the Share Class.
- (2) Performance since launch of the Share Class.
- (3) Performance based on the unofficial NAV/share as at closing date. The performance based on the last official NAV/share as at 13.12.2022 were the following: A -4.65%, AM (EUR) -6.25%, AM (USD) -6.76%, AN -4.51%, B -4.65%, C -4.75%, I -4.50%, N -4.51% and R -4.42%.
- (4) Performance based on the unofficial NAV/share as at 31.08.2025. The performance based on the last official NAV/share as at 13.12.2022 were the following: A 63.41%, AM (EUR) -38.44%, AM (USD) -55.79%, AN -37.88%, B 63.39%, C -29.07%, I -16.79%, N -37.90% and R -29.55%.
- (5) Management Fee until the merger of the Sub-Fund with Vontobel Fund – European Equity Income Plus.
- (6) On May 6, 2025, the benchmark changed from MSCI All Country Asia (ex Japan) TR to MSCI AC Asia ex Japan Index 10/40 TRN USD.
- (7) On May 6, 2025, the benchmark changed from MSCI Emerging Markets TR to MSCI EM Index 10/40 USD TRN.

Additional Unaudited Information

2 Information on the remuneration (in EUR) of employees of Vontobel Asset Management S.A. for the financial year ended December 31, 2024

Number of employees on December 31, 2024	Total fixed salaries p.a. as at 2024	Total variable salary payments in 2024
69	10,562,383	6,001,228

Identified employees*:

Fixed salaries p.a. as of December 31, 2024	Variable salary payments in 2024
3,857,495	3,584,494

Identified employee categories*:

Senior Management: Executive Board, control bodies, Head of Portfolio Management

The remuneration policies and practices shall apply to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers whose professional activities have a material impact on the risk profiles of the management companies or of the UCITS that they manage.

The remuneration practice for identified employee categories is described in the remuneration policy of Vontobel Asset Management S.A. and is available to investors upon request.

Neither the Management Company nor the Fund pays remuneration to identified employees of delegates.

The annual review of the remuneration policy was completed during the year and no irregularities were identified.

The remuneration paid to staff members of the investment management delegates in charge of investment management functions for Vontobel Fund from January 1, 2024 to December 31, 2024 amounts to EUR 28,366,845 overall. For these purposes, "staff" is defined broadly and includes for example analysts of the relevant investment management delegates.

Number of employees related to Vontobel Fund on December 31, 2024	Total remuneration for financial year 2024	of which variable remuneration paid in 2024
57.6	28,366,845	17,055,313

3 Information concerning the remuneration of the members of the Board of Directors (in EUR) of the Fund for the financial year ended August 31, 2025

The members of the Board of Directors of the Fund received a total remuneration of EUR 113,005 (net amount), EUR 141,256 (gross amount) for their activities in connection with the financial year. Members of the Board of Directors who are employed by a company of the Vontobel Group do not receive any remuneration for their activities as members of the Board of Directors of the Fund.

4 Global Exposure

The commitment approach method is used for calculating global exposure for all Sub-Funds, except for the Sub-Funds mentioned below. In relation to the Sub-Funds mentioned, global exposure is instead calculated based on a VaR method. The global exposure data for the financial year ended August 31, 2025 are as follows.

Vontobel Fund -	Calculation of global exposure	Model type	Benchmark portfolio	VaR Limit	Lowest VaR in period	Highest VaR in period	Average VaR in period	Average leverage level ⁽¹⁾
Credit Opportunities	Absolute VaR	Historical Simulation ⁽²⁾	-	20%	1.49%	8.26%	3.10%	261.70%
Global Active Bond	Absolute VaR	Historical Simulation ⁽²⁾	-	20%	1.95%	6.05%	3.01%	90.83%
Commodity	Relative VaR	Historical Simulation ⁽²⁾	Bloomberg Commodity Index Total Return	200%	84.64%	129.46%	102.27%	365.30%
Emerging Markets Debt	Relative VaR	Historical Simulation ⁽²⁾	JP Morgan EMBI Global Diversified Composite	200%	76.77%	129.48%	110.12%	57.83%
Multi Asset Defensive	Absolute VaR	Historical Simulation ⁽²⁾	-	3%	1.35%	2.08%	1.65%	18.37%
Multi Asset Solution	Absolute VaR	Historical Simulation ⁽²⁾	-	12%	2.90%	5.58%	4.53%	62.33%
Non-Food Commodity	Relative VaR	Historical Simulation ⁽²⁾	Bloomberg Commodity ex-Agriculture and Livestock Capped TR Index	200%	78.18%	114.31%	91.86%	126.59%
Sustainable Emerging Markets Local Currency Bond	Relative VaR	Historical Simulation ⁽²⁾	J.P. Morgan GBI-EM Global Diversified Composite Unhedged USD	200%	76.68%	130.90%	111.68%	88.14%
TwentyFour Strategic Income Fund	Absolute VaR	Historical Simulation ⁽²⁾	-	20%	2.51%	5.11%	3.24%	87.15%
TwentyFour Sustainable Strategic Income Fund	Absolute VaR	Historical Simulation ⁽²⁾	-	20%	2.55%	5.32%	3.35%	82.84%
Active Beta Opportunities Plus	Absolute VaR	Historical Simulation ⁽²⁾	-	20%	3.10%	9.14%	5.33%	264.50%

(1) In accordance with CSSF Circular 11/512, the data published here were collected daily. Leverage is calculated using the sum of notionals approach.

(2) The VaR is calculated with a confidence level of 99% and a horizon of 20 business days.

Additional Unaudited Information

5 Securities Financing Transactions Regulation

The Management Company is required to make available an Annual Report for the financial period for each of its Funds, containing certain disclosures as set out in Article 13 of the European Commission Regulation 2015/2365 on transparency of securities financing transactions and of reuse (the “Regulation”). The disclosures set out below are included to meet the requirements of the Regulation.

Report of the Réviseur d'entreprises agréé for the financial year from September 1, 2024 to August 31, 2025

To the Shareholders of Vontobel Fund
49, avenue J.F. Kennedy
L-1855 Luxembourg

Opinion

We have audited the financial statements of Vontobel Fund (the “Fund”) and each of its Sub-Funds, which comprise the statement of net assets and the portfolio as at August 31, 2025, and the statement of operations and changes in net assets, and the statement of net income / loss for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its Sub-Funds as at August 31, 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (the “Law of July 23, 2016”) and with International Standards on Auditing (“ISAs”) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (“CSSF”). Our responsibilities under the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “responsibilities of the “réviseur d'entreprises agréé” for the audit of the financial statements” section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (“IESBA Code”) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the “réviseur d'entreprises agréé” thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its Sub-Funds or to cease operations, or has no realistic alternative but to do so.

Report of the Réviseur d'entreprises agréé for the financial year from September 1, 2024 to August 31, 2025

Responsibilities of the “réviseur d'entreprises agréé” for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d'entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its Sub-Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the “réviseur d'entreprises agréé” to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the “réviseur d'entreprises agréé”. However, future events or conditions may cause the Fund or any of its Sub-Funds (except for the Sub-Fund where a decision or an intention to close exists) to cease to continue as a going concern.
- In respect of Sub-Funds where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Fund's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our report of the “réviseur d'entreprises agréé”.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited Information)

Transparency of the promotion of environmental or social characteristics and of sustainable investments

On November 27, 2019, Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector was published (the "SFDR"). The SFDR aims to increase the harmonization of, and transparency towards the end investors with regard to, the integration of sustainability risks, the consideration of adverse sustainability impacts, the promotion of environmental or social characteristics and sustainable investment by requiring pre-contractual and ongoing disclosures to end investors.

Within the meaning of SFDR, the sub-funds which do not promote environmental and/or social characteristics nor have a sustainable investment as its objective are categorized as Article 6 products.

For the purpose of the "taxonomy" regulation (regulation EU 2020/852 of June 18, 2020 on the establishment of a framework to facilitate sustainable investment, and amending the EU regulation 2019/2088), the investments underlying the sub-funds categorized as Article 6 products do not take into account the EU criteria for environmentally sustainable economic activities.

The following Sub-Funds of Vontobel Fund are categorized as products falling under the scope of Article 6 SFDR as at August 31, 2025:

Vontobel Fund –

Swiss Money
 US Dollar Money
 Global High Yield Bond
 Eastern European Bond (in liquidation)
 Swiss Mid And Small Cap Equity
 AI Powered Global Equity
 Commodity
 Non-Food Commodity
 Credit Opportunities
 Asian Bond

In addition, the SFDR provides high-level definitions and distinguishes between several categorizations of products including "Article 8 products" which are financial products that promote, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices ("SFDR Article 8 Products") and "Article 9 products" which are products that have sustainable investment as their objective ("SFDR Article 9 Products").

The following Sub-Funds of Vontobel Fund are categorized as Article 8 and 9 products falling under the scope of the following SFDR articles as at August 31, 2025:

Vontobel Fund –

Current SFDR categorization as at August 31, 2025

Green Bond	Article 9 product
Global Environmental Change	Article 9 product
TwentyFour Sustainable Short Term Bond Income	Article 9 product
Euro Short Term Bond	Article 8 product
Swiss Franc Bond Foreign	Article 8 product
Euro Corporate Bond	Article 8 product
Global Active Bond	Article 8 product
Sustainable Emerging Markets Local Currency Bond	Article 8 product
European Equity	Article 8 product
European Equity Income Plus	Article 8 product
US Equity	Article 8 product
Global Equity	Article 8 product
Global Equity Income	Article 8 product
Emerging Markets Equity	Article 8 product
Transition Resources	Article 8 product

Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited Information)

Vontobel Fund –	Current SFDR categorization as at August 31, 2025
mtx Asian Leaders (ex Japan)	Article 8 product
mtx Emerging Markets Leaders	Article 8 product
mtx Emerging Markets Leaders ex China	Article 8 product
Emerging Markets Debt	Article 8 product
Sustainable Emerging Markets Debt	Article 8 product

Active Beta Opportunities Plus	Article 8 product
Multi Asset Defensive	Article 8 product
Emerging Markets Investment Grade	Article 8 product

All disclosures below concern the relevant Sub-Fund's investments during the Fund's financial year ending on August 31, 2025, except if specified otherwise.

For details on the exclusion approach applied by the Sub-Funds as well as the process for the monitoring of critical controversies, please refer to the Vontobel Exclusion Framework available at <https://www.vontobel.com/esg-library/>.

The disclosure of the top investments of the Sub-Funds as well as the information concerning the economic sectors in which the investments were made are based on the average of quarter-end holdings of the Sub-Funds as at November 30, 2024, February 28, 2025, May 31, 2025 and August 31, 2025.

In the context of principal adverse impacts indicators, references to "Table 1", "Table 2" and "Table 3" concern Table 1, 2 and 3 of Annex I of Commission Delegated Regulation (EU) 2022/1288.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund - Green Bond

Legal Entity Identifier: 529900SFUVZHB2Y5U19

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ YES

☒ It made sustainable investments with an environmental objective: 97.84%

☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☒ ☐ ☐ NO

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____ % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund was met.

The Sub-Fund's sustainable investment objective consisted of investing in debt instruments issued for projects and/or by issuers that contributed to pre-defined so called "Impact Pillars", with an environmental focus, based on the Investment Manager's assessment. Environmental Impact Pillars (clean and renewable energy, energy efficiency, resource efficiency, low-carbon transportation, agriculture and forestry as well as climate resilient infrastructure) were the primary focus of the Sub-Fund. In order to attain the sustainable investment objective, the Sub-Fund invested 97.84% of its assets in green bonds (sustainable investments with an environmental objective). Through these investments, the Sub-Fund invested in sustainable investments with an environmental objective as defined by the EU Taxonomy. These objectives were: "climate change mitigation", "climate change adaptation", "sustainable use and protection of water and marine resources", "transition to a circular economy", "pollution prevention and control", "protection and restoration of biodiversity and ecosystems". The Taxonomy alignment of sustainable investments was established based on reports provided by the issuers. The Sub-Fund also invested in environmentally sustainable investments that were not Taxonomy-aligned because the Investment Manager only used reported alignment data from issuers, not considering estimates provided by third-party data providers; the EU Taxonomy technical screening was still incomplete for climate change mitigation and adaptation and did not cover all environmental objectives (the remaining 4 objectives) as of the reporting date. The Investment Manager therefore performed additional analysis of the issuers. For the Sub-Fund, the Investment Manager only selected green bonds backed by a second party opinion, financing projects that contribute to the Sub-Fund's Impact Pillars.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in green bonds	100%	
Percentage of investments in debt instruments that are not green, but that are issued by issuers that contribute to an environmental objective	0%	
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager's Exclusion Framework.
Percentage of investments in securities of issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Percentage of investments in securities of corporate issuers that are not above the maximum Implied Temperature Rise, provided by a third-party ESG data provider, that has been set for this Sub-Fund.	0%	
Sub-Fund's weighted average ESG rating, provided by a third-party ESG data provider	AA (score: 8.4)	The Sub-fund must have at least a weighted average ESG rating of A
Percentage of securities covered by ESG analysis	100%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2025	2024	2023
Sustainability Indicators	Value	Value	Value
Percentage of investments in green bonds	100%	100%	100%
Percentage of investments in debt instruments that are not green, but that are issued by issuers that contribute to an environmental objective	0%	0%	0%
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%	0%
Percentage of investments in securities of issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical	0%	0%	0%

controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues			
Percentage of investments in securities of corporate issuers that are not above the maximum Implied Temperature Rise, provided by a third-party ESG data provider, that has been set for this Sub-Fund.	100%	100%	N/A
Sub-Fund's weighted average ESG rating, provided by a third-party ESG data provider	AA (score: 8.4)	AAA (score: 8.8)	N/A
Percentage of securities covered by ESG analysis	100%	100%	100%
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions *	N/A	0%	0%

*Indicator deleted as covered by the Investment Manager's Exclusion Framework.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any sustainable investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Scope 3 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	1	Total GHG emissions
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
ELIA TRANSMISSION BE	Transmission of electricity	4.13	BELGIUM
EUROGRID GMBH	Transmission of electricity	4.00	GERMANY
RTE RESEAU DE TRANSPORT	Transmission of electricity	3.48	FRANCE
STATKRAFT AS	Transmission of electricity	3.07	NORWAY
VERBUND AG	Electric power generation, transmission and distribution	2.89	AUSTRIA
NETHERLANDS GOVERNMENT	General public administration activities	2.84	NETHERLANDS (THE)
RED ELECTRICA FINANCI SA	Transmission of electricity	2.78	SPAIN
EUROFIMA	General public administration activities	2.73	SWITZERLAND
ACEA SPA	Transmission of electricity	2.66	ITALY
E.ON SE	Transmission of electricity	2.57	GERMANY
ACCIONA ENERGIA FINANCIA	Transmission of electricity	2.28	SPAIN
RTE RESEAU DE TRANSPORT	Transmission of electricity	2.16	FRANCE
RED ELECTRICA FINANCI SA	Transmission of electricity	2.03	SPAIN
E.ON SE	Transmission of electricity	1.92	GERMANY
NIAGARA MOHAWK POWER	Transmission of electricity	1.91	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 97.84% (sustainable investments).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Electricity, gas, steam and air conditioning supply	Transmission of electricity	49.64
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	23.33
Public administration and defence; compulsory social security	General public administration activities	11.91
Information and communication	Wired telecommunications activities	3.34
Electricity, gas, steam and air conditioning supply	Distribution of electricity	2.77
Electricity, gas, steam and air conditioning supply	Production of electricity	2.15

Financial and insurance activities	Other financial service activities	1.35
Financial and insurance activities	Other monetary intermediation	0.82
Financial and insurance activities	Insurance	0.79
Water supply; sewerage, waste management	Water collection, treatment and supply	0.50
Transportation and storage	Rail transport	0.33
Real estate activities	Letting of own property	0.17

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

77.89% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

85.57% of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?***¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
89.41	42.40	46.42

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 8,43% for this Sub-Fund.

For these issuers, the economic activity was not yet covered under the EU Taxonomy, the positive contribution was not (fully) aligned with the criteria for environmentally sustainable economic activities under the EU Taxonomy, or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “Not sustainable” investments represented 2.16% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (2.16%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund - Global Environmental Change **Legal Entity Identifier:** 529900ZUMAVW7HND8002

Sustainable investment objective

Did this financial product have a sustainable investment objective?

YES

☒

It made sustainable investments with an environmental objective: 98.56%

☒

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

Sustainability indicators measure how the sustainable objectives of this financial product are attained

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive more than 20% of their revenues from economic activities that contribute to at least one of the Impact Pillars. (based on a proprietary methodology)	100%	The methodology how to evaluate the impactful revenues of a company that contribute to the impact pillars is described in the pre-contractual disclosure annex for the Sub-Fund.
Percentage of investments in securities of corporate issuers that have a positive Impact Strategy score (based on a proprietary methodology)	100%	The six criteria for the Investment Manager's impact strategy assessment are described in the pre-contractual disclosure annex for the Sub-Fund.
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and / or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG score that has been set for this Sub-Fund (ESG score of B)	100%	
Percentage of investments in securities of issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Percentage of securities covered by ESG analysis	100%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any sustainable investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Scope 3 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	1	Total GHG emissions
1	2	Carbon footprint

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
LINDE PLC	Industrial gases manufacturing	3.23	UNITED STATES OF AMERICA (THE)
IBERDROLA SA	Electricity generation and distribution	2.97	UNITED STATES OF AMERICA (THE)
PRYSMIAN SPA	Cables and wiring manufacturing	2.80	SPAIN
COMPAGNIE DE SAINT GOBAIN	Building materials manufacturing	2.40	UNITED KINGDOM
XYLEM INC	Water technology and pumps manufacturing	2.26	UNITED STATES OF AMERICA (THE)
ROPER TECHNOLOGIES INC	Software-enabled industrial technology	2.21	SPAIN
NATIONAL GRID PLC	Electricity transmission and distribution	2.19	UNITED STATES OF AMERICA (THE)
NXP SEMICONDUCTORS NV	Semiconductor manufacturing	2.13	UNITED STATES OF AMERICA (THE)
NEXTERA ENERGY INC	Renewable energy generation	2.13	UNITED STATES OF AMERICA (THE)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

ECOLAB INC	Specialty chemicals and cleaning products	2.13	UNITED STATES OF AMERICA (THE)
DAIFUKU CO LTD	Automation and material-handling systems	2.07	UNITED STATES OF AMERICA (THE)
AMERICAN WATER WORKS CO INC	Water supply services	2.05	UNITED STATES OF AMERICA (THE)
UNION PACIFIC CORP	Rail freight transport	1.96	UNITED STATES OF AMERICA (THE)
ASML HOLDING NV	Semiconductor manufacturing equipment	1.92	UNITED STATES OF AMERICA (THE)
SIEMENS AG REG	Industrial engineering and automation	1.90	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.56% (sustainable investments).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Industrial gases manufacturing	5.02
Manufacturing	Semiconductor manufacturing equipment	3.70
Information and communication	Electronic design automation software	3.18
Electricity, gas, steam and air conditioning supply	Renewable energy generation	3.04
Electricity, gas, steam and air conditioning supply	Electricity generation and distribution	2.97
Manufacturing	Cables and wiring manufacturing	2.80
Manufacturing	Building materials manufacturing	2.40
Manufacturing	Electrical equipment manufacturing	2.28
Manufacturing	Water technology and pumps manufacturing	2.26
Information and communication	Software-enabled industrial technology	2.21
Electricity, gas, steam and air conditioning supply	Electricity transmission and distribution	2.19
Manufacturing	Semiconductor manufacturing	2.13
Manufacturing	Specialty chemicals and cleaning products	2.13
Manufacturing	Automation and material-handling systems	2.07
Water supply, sewerage, waste management	Water supply services	2.05
Transportation and storage	Rail freight transport	1.96
Manufacturing	Industrial engineering and automation	1.90
Construction	Electrical infrastructure construction	1.84
Transportation and storage	Rail transport	1.82
Information and communication	Other information technology and computer service activities	1.80
Manufacturing	Heating, ventilation and air-conditioning systems	1.77
Wholesale and retail trade	Distribution of plumbing and construction supplies	1.76
Manufacturing	Energy management and automation systems	1.75
Manufacturing	Paper and packaging products	1.72
Professional, scientific and technical activities	Engineering and design services	1.71
Manufacturing	Power electronics and industrial automation	1.67
Information and communication	Software publishing (design and 3D engineering)	1.61
Manufacturing	Building automation and HVAC systems	1.55

Manufacturing	Battery manufacturing	1.54
Manufacturing	Energy management and smart metering systems	1.54
Water supply, sewerage, waste management	Hazardous waste management	1.49
Manufacturing	Railway manufacturing	1.48
Manufacturing	Industrial machinery and components	1.48
Manufacturing	Barcode scanners and industrial printing equipment	1.47
Information and communication	Geospatial software and GPS technologies	1.37
Information and communication	Software publishing (CAD/PLM)	1.36
Manufacturing	Electronic testing and measurement equipment	1.33
Construction	Civil and electrical infrastructure construction	1.32
Manufacturing	Water analytics and filtration technologies	1.30
Manufacturing	Electric vehicles and batteries	1.29

Professional, scientific and technical activities	Engineering and consulting services	1.19
Water supply, sewerage, waste management	Waste collection and processing	1.17
Professional, scientific and technical activities	Testing, inspection and certification services	1.08
Manufacturing	Organic electronic materials (OLED technology)	1.03
total of remaining sectors with a proportion < 1.0%		10.28

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

8.96% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

8.70% of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 7.07 %.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
8.70	6.19	7.90

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 89.86% for this Sub-Fund.

Investee companies with an environmental sustainable objective under SFDR are contributing to support one of the six impact pillars based on defined criteria as described above and in the PCD. These criteria are not (yet) covered under the EU Taxonomy or the positive contribution was not (fully) aligned with the criteria for environmental sustainable economic activities under the EU Taxonomy or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude their assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “not sustainable” investments represented 1.44% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (1.44%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used for the selection of sustainable investments have been monitored throughout the reporting period. Their application led to the exclusion of approx. 85% of the of the investments considered prior to the application of the investment strategy (i.e. global listed equity markets).

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund - TwentyFour Sustainable Short Term Bond Income **Legal Entity Identifier:** 222100VI6EIIILFZY1V62

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
☒ YES	☐ NO
☒ It made sustainable investments with an environmental objective: 75.65% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ It made sustainable investments with a social objective: 6.36%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____ % of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund was met.

The Sub-Fund met its sustainable investment objective of investing in securities of issuers that contribute towards the Paris Agreement’s goal to hold the increase in the global average temperature to below 2°C above pre-industrial levels by investing at least 80% in sustainable investments with the objectives of “climate change mitigation” and “climate change adaptation”. The Sub-Fund also invested in sustainable investments with a social objective, namely “empowerment”. Information on the sustainable investment objective is available in the Fund Sales Prospectus, in the Annex “Sustainable investment objective” to this Sub-Fund. Additionally, the Sub-Fund excluded certain economic activities that the investment manager determines are detrimental to society or the environment and are incompatible with the sustainable investment objective of the Sub-Fund.

As at the financial year-end 31 August 2025, the Sub-Fund had 82.01% of its net assets invested in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 82.01% E: 75.65% S: 6.36%	
Percentage of investments in securities of corporate issuers that pass the minimum ESG score (set at 34 out of 100)	96.72%	
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and / or activities please refer to the Sustainability Related Disclosures.

... And compared to previous periods?

Financial year of the Fund ending on 31 August	2025	2024	2023
Sustainability Indicators	Value	Value	Value
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 82.01% E: 75.65% S: 6.36%	SI: 80.67% E: 77.20% S: 3.47%	N/A
Percentage of investments in securities of corporate issuers that pass the minimum ESG score (set at 34 out of 100)	96.72%	95.08%	96.17%
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%	0%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any sustainable investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund’s investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Scope 3 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	1	Total GHG emissions
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
BUNDESOBLIGATION	General public administration activities	4.92	GERMANY
US TREASURY N/B	General public administration activities	3.76	UNITED STATES OF AMERICA (THE)
BUNDESOBLIGATION	General public administration activities	2.51	GERMANY
BUPA FINANCE PLC	Non-life insurance	1.61	UNITED KINGDOM
BNP PARIBAS	Other monetary intermediation	1.53	FRANCE
AXA SA	Life insurance	1.40	FRANCE
US TREASURY N/B	General public administration activities	1.33	UNITED STATES OF AMERICA (THE)

VIRGIN MONEY UK PLC	Other monetary intermediation	1.09	UNITED KINGDOM
PHOENIX GRP HLD PLC	Life insurance	1.08	UNITED KINGDOM
NIE FINANCE PLC	Distribution of electricity	1.06	UNITED KINGDOM

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 82.01% (sustainable investments).

● What was the asset allocation?

Asset allocation
describes the share of
investments in specific
assets.

#1 Sustainable covers sustainable investments with environmental or social objectives

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Other monetary intermediation	30.45
Public administration and defence; compulsory social security	General public administration activities	15.54
Financial and insurance activities	Life insurance	10.90
Financial and insurance activities	Other credit granting	6.89
Electricity, gas, steam and air conditioning supply	Production of electricity	4.64
Information and communication	Wired telecommunications activities	4.12
Electricity, gas, steam and air conditioning supply	Transmission of electricity	3.93
Financial and insurance activities	Non-life insurance	3.58
Financial and insurance activities	Securitisation vehicles	3.50

Information and communication	Wireless telecommunications activities	3.21
Information and communication	Computer programming activities	2.20
Financial and insurance activities	Other financial service activities, except insurance and pension funding	1.70
Electricity, gas, steam and air conditioning supply	Distribution of electricity	1.68
Information and communication	Data processing, hosting and related activities	1.01
Water supply; sewerage, waste management and remediation activities	Water collection, treatment and supply	1.00
total of remaining sectors with a proportion < 1.0%		4.35

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

11.18% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0%.
- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 75.65% for this Sub-Fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 6.36% in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “Not sustainable” investments represented 17.99% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.28%) for liquidity management purposes
- sovereign bonds (14.71%)

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used for the selection of sustainable investments have been monitored throughout the reporting period.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Euro Short Term Bond

Legal Entity Identifier: 529900VG4MSY8YCUWQ46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 13.96% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges, selected based on the Investment Manager’s ESG framework. The Sub-Fund adhered to its exclusion criteria, maintaining no exposure (0%) to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities, and no exposure (0%) to issuers in violation of certain global norms and standards or those exposed to critical controversies. The Sub-Fund invested 99.16% of its portfolio in securities of corporate issuers assessed using the Investment Manager’s ESG framework, which incorporates third-party ESG data providers such as Sustainalytics and includes qualitative assessments. Additionally, 100% of sovereign issuers in the portfolio were assessed based on scores provided by MSCI ESG and the Investment Manager’s qualitative assessment. The Sub-Fund allocated 13.96% of its portfolio to securities of issuers providing solutions to actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment, which qualify as sustainable investments. The Sub-Fund also achieved a combined weighted average ESG rating that outperformed the benchmarks, with 104.4% of the corporate benchmark and 95.4% of the sovereign benchmark.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment)	99.16%	
Percentage of investments in securities of sovereign issuers based on the Investment Manager's assessment (based on a score provided by MSCI ESG, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment.	100%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	13.96%	
Sub-Fund's combined weighted average ESG rating provided by the above-mentioned third-party ESG data providers for corporate and sovereign issuers compared to the global bond investment universe (i.e. represented by its benchmark, Bloomberg Euro Aggregate 1-3 Year) weighted average rating.	The Sub-Fund's score is 104.4% of the corporate benchmark and 95.4% of the sovereign benchmark. The weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark is 103.6%	The weighted average ESG score (corporate and sovereign issuers combined) of the portfolio must be better than the benchmark.
Percentage of securities covered by ESG analysis.	98.87%	Some issuers were not covered by MSCI or Sustainalytics regarding controversies and ESG rating. The Investment Manager conducted additional research to

		ensure that the issuers were not involved in any controversies or violation of UNGC.

Sub-Fund's combined weighted average ESG rating provided by the above-mentioned third-party ESG data providers for corporate and sovereign issuers compared to the global bond investment universe (i.e. represented by its benchmark, Bloomberg Euro Aggregate 1-3 Year) weighted average rating.	The Sub-Fund's score is 104.4% of the corporate benchmark and 95.4% of the sovereign benchmark. The weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark is 103.6%	Sub-Fund: 64.44 Benchmark: 63.66
Percentage of securities covered by ESG analysis.	98.87%	96.24%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments made by the Sub-Fund was to invest in securities of issuers that provide solutions to environmental and social challenges, contributing to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager conducted assessments based on quantitative ESG indicators and qualitative evaluations of the issuer's products, technologies, services, or projects. The qualitative assessment considered research related to peer groups and scientific studies. To qualify as a sustainable investment, issuers were required to have a significant part of their activities linked to these solutions, meeting a minimum threshold of 20% in revenues, capital expenditure, operational expenditure, or allocated funding, depending on the nature of their activities. If this minimum requirement was met, the entire investment was considered a sustainable investment, provided it complied with the "do no significant harm" principle and, where applicable, good governance criteria. During the reporting period, the Sub-Fund allocated 13.96% of its portfolio to securities of issuers meeting these criteria, contributing to both environmental objectives such as climate change mitigation and responsible use of natural resources, and social objectives such as addressing basic needs and empowerment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
BONOS Y OBLIG DEL ESTADO	General public administration activities	3.67	SPAIN
BONOS Y OBLIG DEL ESTADO	General public administration activities	2.99	SPAIN
FINNISH GOVERNMENT	General public administration activities	2.73	FINLAND
AUTOSTRADA PER L ITALIA	Road transport	2.42	ITALY
BELFIUS BANK SA/NV	Banking	2.15	BELGIUM
ING BANK NV	Banking	2.14	NETHERLANDS (THE)
US TREASURY N/B	General public administration activities	1.92	UNITED STATES OF AMERICA (THE)
BUNDESOBLIGATION	General public administration activities	1.88	GERMANY
UNICREDIT BANK GMBH	Other monetary intermediation	1.74	GERMANY
EURO STABILITY MECHANISM	General public administration activities	1.67	LUXEMBOURG
STORA ENSO OYJ	Manufacture of paper and paper products	1.54	FINLAND
ROYAL BANK OF CANADA	Banking	1.53	CANADA

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

HEATHROW FUNDING LTD	Air transport	1.51	UNITED KINGDOM
FRANCE (GOVT OF)	General public administration activities	1.34	FRANCE
ORSTED A/S	Electric power generation	1.27	DENMARK

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 94.99% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Banking	23.54
Public administration and defence; compulsory social security	General public administration activities	19.10
Manufacturing	Manufacture of motor vehicles	8.24
Financial and insurance activities	Other monetary intermediation	8.00
Electricity, gas, steam and air conditioning supply	Electric power generation	5.45
Financial and insurance activities	Insurance	3.85
Transportation and storage	Road transport	2.42
Manufacturing	Manufacture of paper and paper products	1.54
Transportation and storage	Air transport	1.51
Electricity, gas, steam and air conditioning supply	Transmission of electricity	1.44
Transportation and storage	Road and motorway operation	1.26
Real estate activities	Real estate investment trusts	1.25
Information and communication	Telecommunications services	1.22
Manufacturing	Manufacture of chemicals	1.20
Financial and insurance activities	Financial service activities	1.01
total of remaining sectors with a proportion < 1.0%		16.81

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

10.37% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**¹*

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 12.40% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 1.56% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 5.01% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (3.92%), for liquidity management purposes.
- Investments not covered by ESG research (1.09%) for diversification purposes, environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Swiss Franc Bond Foreign

Legal Entity Identifier: 529900GTQNJG95M3H547

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 19.23% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were partially met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 19.23% in sustainable investments by investing in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities). Such controversies may be related to environmental, social or governance issues	0%	
Percentage of investments in securities of corporate and sovereign issuers that pass the minimum ESG rating by Inrate AG, a third-party ESG data provider (C-, on a scale from A+ to D-, with A+ being the best and D- being the worst rating) that has been set for this Sub-Fund	97%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	19.23%

* Indicators for corporate and sovereign issuers have been combined

** Indicator deleted as covered by the Investment Manager's Exclusion Framework.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund allocated 19.23% of its portfolio to sustainable investments as at the end of the reporting period. The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
PFANDBRIEF SCHW KANTBK	Credit granting by specialised institutions	3.23	SWITZERLAND
EBN BV	Other monetary intermediation	1.94	NETHERLANDS (THE)
KOMMUNEKREDIT	General public administration activities	1.55	DENMARK
CELLNEX FINANCE CO SA	Wireless telecommunications activities	1.55	SPAIN
KANTONSSPITAL WINTERTHUR	Hospital activities	1.25	SWITZERLAND
ASIAN DEVELOPMENT BANK	Activities of holding companies	1.16	PHILIPPINES (THE)
BNG BANK NV	Other financial service activities	1.16	NETHERLANDS (THE)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

UNI KINDERSPI TAL ZUERICH	Hospital activities	1.15	SWITZERLAND
NEDER WATERSCHAPSBANK	General public administration activities	1.14	NETHERLANDS (THE)
DIGITAL CONSTELLATION BV	Data processing, hosting and related activities	1.14	NETHERLANDS (THE)
BNP PARIBAS	Other monetary intermediation	1.10	FRANCE
MET LIFE GLOB FUNDING I	Other credit granting	1.06	UNITED STATES OF AMERICA (THE)
ASB BANK LIMITED	Other monetary intermediation	1.01	NEW ZEALAND
GRAUBUNDNER KANTONALBANK	Other monetary intermediation	0.98	SWITZERLAND
EQUINIX EUROPE FINANCING	Data processing, hosting and related activities	0.95	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 87.48% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation
describes the share of
investments in specific
assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Other monetary intermediation	38.12
Public administration and defence; compulsory social security	General public administration activities	15.85
Financial and insurance activities	Other financial service activities	7.03
Financial and insurance activities	Other credit granting	3.89
Financial and insurance activities	Credit granting by specialised institutions	3.47
Human health and social work activities	Hospital activities	3.08
Information and communication	Data processing, hosting and related activities	2.94
Information and communication	Wireless telecommunications activities	2.47
Financial and insurance activities	Activities of holding companies	1.91
Transportation and storage	Air transport	1.40
Financial and insurance activities	Covered bond issuance	1.24
Manufacturing	Manufacture of instruments and appliances for measuring, testing and navigation	1.20
Financial and insurance activities	Central banking	1.12
Real estate activities	Buying and selling of own real estate	1.09
Electricity, gas, steam and air conditioning supply	Transmission of electricity	1.08
total of remaining sectors with a proportion < 1.0%		9.30

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

2.46% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**¹*

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	2.50	3.13

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 17.08% for this Sub-Fund.

The investment manager removed the commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.15% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 12.52% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (4.48%), for liquidity management purposes.
- Investments not covered by ESG research (8.04%) for diversification purposes, environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ ☐ NO ☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 15.63% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted social transition through empowerment by focusing on pre-defined empowerment indicators such as diversity oversight by management and programs, percentage of women in the total workforce, ILO Labor Core Convention violations, and the percentage of employees receiving training provided by specialized third-party ESG research. Issuers were selected based on the Investment Manager's ESG framework, favoring those that perform well in these indicators, are on their way to performing well, or show potential for improvement. The Sub-Fund adhered to its exclusion criteria, maintaining no exposure (0%) to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities. As at the end of the reporting period, 15.81% of corporate issuers performed well in empowerment-related indicators, 61.34% were on their way to performing well, and 21.64% showed potential for improvement. Additionally, 15.63% of the portfolio was allocated to securities of issuers addressing actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment, and that qualify as sustainable investments. The Sub-Fund also achieved a weighted average UN Global Compact profile of 94.55 compared to 89.16 for the investment universe, reflecting a strong alignment with global norms and standards. Furthermore, 92.98% of securities in the portfolio were covered by ESG analysis, an increase from 90.77% in 2024.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	1 issuer was flagged with severe controversies by either MSCI or Sustainalytics: Glencore. The issuer is on watch list.
Percentage of investments in securities of corporate issuers that, in respect to the pre-defined empowerment related indicators (i.e. diversity oversight by management and programs, percentage of women in total workforce, ILO Labor core convention violations and percentage of employees to receive training provided by specialized third-party ESG research), (i) perform well, or (ii) are on their way to perform well in these indicators, or (iii) where potential for improvement has been identified, based on the Investment Manager's analysis	(i): 15.81% (ii): 61.34% (iii): 21.64%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments made by the Sub-Fund was to invest in securities of issuers that provide solutions to environmental and social challenges, contributing to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager conducted assessments based on quantitative ESG indicators and qualitative evaluations of the issuer's products, technologies, services, or projects. The qualitative assessment considered research related to peer groups and scientific studies. To qualify as a sustainable investment, issuers were required to have a significant part of their activities linked to these solutions, meeting a minimum threshold of 20% in revenues, capital expenditure, operational expenditure, or allocated funding, depending on the nature of their activities. If this minimum requirement was met, the entire investment was considered a sustainable investment, provided it complied with the "do no significant harm" principle and, where applicable, good governance criteria. During the reporting period, the Sub-Fund allocated 15.63% of its portfolio to securities of issuers meeting these criteria, contributing to both environmental objectives such as climate change mitigation and responsible use of natural resources, and social objectives such as addressing basic needs and empowerment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

----- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

----- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
VONTOBEL FUND – GLOBAL HIGH YIELD BOND *	Fund management activities	1.89	LUXEMBOURG
VONTOBEL FUND – CREDIT OPPORTUNITIES *	Fund management activities	1.26	LUXEMBOURG
BONOS Y OBLIG DEL ESTADO	General public administration activities	0.83	SPAIN
NATIONAL BANK GREECE SA	Banking	0.73	GREECE
BONOS Y OBLIG DEL ESTADO	General public administration activities	0.70	SPAIN
HEATHROW FUNDING LTD	Air transport	0.67	UNITED KINGDOM
HEATHROW FUNDING LTD	Air transport	0.62	UNITED KINGDOM
LLOYDS BANKING GROUP PLC	Banking	0.60	UNITED KINGDOM

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

ING GROEP NV	Banking	0.58	NETHERLANDS (THE)
EASYJET PLC	Air transport	0.57	UNITED KINGDOM
INTESA SANPAOLO SPA	Banking	0.56	ITALY
UNIBAIL RODAMCO WESTFLD	Real estate development	0.56	FRANCE
NATWEST GROUP PLC	Banking	0.55	UNITED KINGDOM
UNICREDIT SPA	Banking	0.54	ITALY
BARRY CALLEBAUT SVCS NV	Manufacture of food products	0.54	BELGIUM

* Indirect investments not aligned with E/S characteristics.

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 90.80% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Banking	15.73
Financial and insurance activities	Financial service activities	10.76
Financial and insurance activities	Insurance	7.28
Information and communication	Telecommunications	5.49
Transportation and storage	Air transport	4.44
Electricity, gas, steam and air conditioning supply	Electric power generation	3.68
Financial and insurance activities	Fund management activities	3.23
Public administration and defence; compulsory social security	General public administration activities	2.76
Real estate activities	Real estate activities	2.67
Manufacturing	Manufacture of motor vehicles	2.66
Financial and insurance activities	Banking activities	1.95
Transportation and storage	Land transport and pipelines	1.75
Manufacturing	Manufacture of food products	1.25
Electricity, gas, steam and air conditioning supply	Transmission of electricity	1.21
Financial and insurance activities	Insurance and pension funding	1.08
total of remaining sectors with a proportion < 1.0%		29.83

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

9.20% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 12.67% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.96% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 9.20% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.48%) and cash equivalent investments for liquidity management purposes.
- UCITS/UCIs (3.09%) for investment/ diversification purposes, of which 0.08% in one SFDR Art. 8 funds.
- Investments not covered by ESG research (2.63%) for diversification purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Global Active Bond

Legal Entity Identifier: 5299008301SVLPAHIM72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES	☒ ☐ NO
☐ It made sustainable investments with an environmental objective : ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.92% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective : ____%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund invested in issuers that the Investment Manager considers well-prepared to handle financially material environmental and/or social challenges, selected based on the Investment Manager’s ESG framework. The Sub-Fund adhered to its exclusion criteria, maintaining no exposure (0%) to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities, and no exposure (0%) to issuers in violation of certain global norms and standards or those exposed to critical controversies. The Sub-Fund invested 96.82% of its portfolio in securities of corporate issuers assessed using the Investment Manager’s ESG framework, with 5.5% of corporate issuers having a Sustainalytics score below 25, which underwent additional qualitative analysis. Additionally, 100% of sovereign issuers in the portfolio were assessed based on scores provided by MSCI ESG and the Investment Manager’s qualitative assessment. The Sub-Fund allocated 10.92% of its portfolio to securities of issuers providing solutions to actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment, which qualify as sustainable investments. The Sub-Fund also achieved a combined weighted average ESG rating that outperformed the benchmark, with 117.5% of the corporate benchmark and 79.1% of the sovereign benchmark.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues	0%	
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager’s qualitative assessment)	96.82%	5.5% of corporate issuers had a Sustainalytics score below 25. For these issuers, an additional qualitative analysis was conducted. The issuers and their respective scores are as follows: BERKSHIRE HATHAWAY INC (22.81), AFRICAN EXPORT IMPORT BA (21.26), BANQUE OUEST AFRICAINE D (14.86), MATTERHORN TELECOM SA (9.43), and PRUMO PARTICIPACOES E IN (19.49).
Percentage of investments in securities of sovereign issuers based on the Investment Manager's assessment (based on a score provided by MSCI ESG, a third-party ESG data provider and/or subject to the Investment Manager’s qualitative assessment)	100%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments made by the Sub-Fund was to invest in securities of issuers that provide solutions to environmental and social challenges, contributing to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager conducted assessments based on quantitative ESG indicators and qualitative evaluations of the issuer's products, technologies, services, or projects. The qualitative assessment considered research related to peer groups and scientific studies. To qualify as a sustainable investment, issuers were required to have a significant part of their activities linked to these solutions, meeting a minimum threshold of 20% in revenues, capital expenditure, operational expenditure, or allocated funding, depending on the nature of their activities. If this minimum requirement was met, the entire investment was considered a sustainable investment, provided it complied with the "do no significant harm" principle and, where applicable, good governance criteria. During the reporting period, the Sub-Fund allocated 10.92% of its portfolio to securities of issuers meeting these criteria, contributing to both environmental objectives such as climate change mitigation and responsible use of natural resources, and social objectives such as addressing basic needs and empowerment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
VONTOBEL FUND CREDIT OPPORTUNITIES	Financial service activities	5.72	LUXEMBOURG

BUNDESREPUB. DEUTSCHLAND	General public administration activities	0.83	GERMANY
CITIGROUP INC	Other financial service activities	0.81	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 84.40% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● **In which economic sectors were the investments made?**

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	16.83
Financial and insurance activities	Banking	16.72
Financial and insurance activities	Other monetary intermediation	9.02
Financial and insurance activities	Insurance	8.45
Financial and insurance activities	Financial service activities	7.99
Financial and insurance activities	Other financial service activities	4.17
Financial and insurance activities	Financial services	3.39
Construction	Construction of roads and railways	1.18
Manufacturing	Manufacture of wood and paper	1.16
Financial and insurance activities	Security and commodity contracts brokerage	1.01
total of remaining sectors with a proportion < 1.0%		17.95

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

4.55% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 8.79% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.13% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 15.60% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (9.66%) and cash equivalent investments, for liquidity management purposes.
- UCITS/UCIs (3.46%) for investment/diversification purposes. Minimum environmental and social safeguards did not apply (SFDR Art. 6 fund)
- Investments not covered by ESG research (2.48%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Sustainable Emerging Markets Local Currency Bond **Legal Entity Identifier:** 529900GEEVRUYGQ2C28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ ☒ NO ☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.13% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers assessed as well-prepared to address financially material environmental and social challenges, as determined by the Investment Manager’s ESG framework. As at the end of the reporting period, the Sub-Fund maintained 0% exposure to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities and 0% exposure to issuers in violation of global norms or involved in critical controversies. The Sub-Fund allocated 76.13% of its portfolio to sustainable investments, addressing actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund for sovereigns.	0%	
Percentage of investments in securities of sovereign issuers with UN or international sanctions	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in supranational issuers based on the Investment Manager’s assessment (based on a score provided by MSCI ESG and/or subject to the Investment Manager’s qualitative assessment)	100%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund allocated 76.13% of its portfolio to sustainable investments as at the end of the reporting period. These investments aim to address environmental and social challenges by focusing on actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager evaluates corporate and supranational issuers based on quantitative ESG indicators and qualitative assessments, requiring a minimum threshold of 20% of revenues, capital expenditure, operational expenditure, or allocated funding to be linked to these actionable themes. For sovereign issuers, the Sub-Fund invests in countries that efficiently utilize their natural and financial resources to improve the quality of life for their populations. Sovereign issuers are assessed using a proprietary model that evaluates factors such as gross national income per capita, life expectancy, ecological footprint, income distribution, and human rights, provided they meet the "do no significant harm" and good governance criteria. The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
MALAYSIA GOVERNMENT	General public administration activities	4.76	MALAYSIA
POLAND GOVERNMENT BOND	General public administration activities	4.52	POLAND
INTER AMERICAN DEVEL BK	Activities of holding companies	3.78	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 92.33% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	73.39
Financial and insurance activities	Activities of holding companies	16.63
Financial and insurance activities	Activities of extraterritorial organisations	2.79
Financial and insurance activities	Other financial service activities	0.26

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹***

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	4.43	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 73.14% for this Sub-Fund.

The investment manager removed the commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.99% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 7.67% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (4.96%), for liquidity management purposes.
- Investments not covered by ESG research (2.71%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – European Equity

Did this financial product have a sustainable investment objective?	
☒ ☐ YES	☒ ☐ NO
☐ It made sustainable investments with an environmental objective : ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective : ____%	☐ with a social objective
	☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
SAP SE	Software publishing	4.09	GERMANY
RELX PLC	Publishing activities	4.06	UNITED KINGDOM
GALDERMA GROUP AG	Pharmaceuticals	4.02	SWITZERLAND

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

FLUTTER ENTERTAINMENT PLC DI	Gambling and betting activities	2.74	UNITED STATES OF AMERICA (THE)
LIFCO AB B SHS	Industrial machinery	2.70	SWEDEN
BOOKING HOLDINGS INC	Travel agency and booking services	2.70	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 95.68% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Information and communication	Publishing activities	6.63
Financial and insurance activities	Banking	6.14
Wholesale and retail trade	Wholesale trade	4.73
Information and communication	Software publishing	4.09
Manufacturing	Pharmaceuticals	4.02
Financial and insurance activities	Financial service activities	3.93
Manufacturing	Luxury goods	3.74
Information and communication	Software development	3.60
Information and communication	Online services	3.47
Manufacturing	Beverages	3.11
Arts, entertainment and recreation	Recreational activities	3.11
Manufacturing	Manufacture of instruments and appliances	3.09
Manufacturing	Manufacture of optical instruments and lenses	3.02
Financial and insurance activities	Credit reporting services	2.77
Arts, entertainment and recreation	Gambling and betting activities	2.74
Manufacturing	Industrial machinery	2.70
Accommodation and food service activities	Travel agency and booking services	2.70
Manufacturing	Manufacture of chemicals and chemical products	2.52
Manufacturing	Manufacture of electronic components	2.46
Manufacturing	Manufacture of motor vehicles	2.26
Manufacturing	Manufacture of weapons and ammunition	2.19
Transportation and storage	Airport operations	2.18
Electricity, gas, steam and air supply	Transmission of electricity	2.02
Information and communication	Computer programming activities	1.88
Arts, entertainment and recreation	Music production	1.87
Manufacturing	Food products	1.71
Manufacturing	Cosmetics	1.64
Information and communication	Telecommunications infrastructure	1.64
Information and communication	Telecommunications infrastructure	1.64

Financial and insurance activities	Insurance activities	1.34
Manufacturing	Manufacture of optical instruments and photographic equipment	1.34
Manufacturing	Textiles & apparel	1.23
Information and communication	Health IT systems	1.11
Manufacturing	Manufacture of basic pharmaceutical products	1.00
total of remaining sectors with a proportion < 1.0%		4.34

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

2.02% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 4.32% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (4.32%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sub-Fund launched on March 25, 2025

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – European Equity Income Plus **Legal Entity Identifier:** 213800SJDEIJAMK1AQ11

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES	☐ ☒ NO
☐ It made sustainable investments with an environmental objective: ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☐ with a social objective
	☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

Since its launch on March 25, 2025, the Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework. The ESG approach was applied to the Sub-Fund’s securities portfolio and target funds. For the avoidance of doubt, where the exposure to an asset class was built up via derivatives, a part or all of the securities portfolio may have served as collateral for such derivative transactions.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of target funds that pass the Investment Manager’s ESG assessment	0%	
Percentage of investments in securities of issuers that pass the minimum ESG rating that has been set for this Sub-Fund based on a proprietary methodology, minimum is set at E on a scale from A-G, G being the lowest. If the issuer cannot be rated by proprietary methodology, a minimum MSCI ESG rating of BB is used.	99,01%	
Percentage of investments in securities of issuers that pass the minimum Climate score that has been set for this Sub-Fund (based on a proprietary methodology, minimum is set at 10 on a scale from 0-100, 0 being the lowest)	99,01%	
Percentage of investments in securities of issuers that are in violation of global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities). Such controversies may be related to environmental, social or governance issues.	0%	

● **... And compared to previous periods?**

Not applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
IBERDROLA SA	Production of electricity	4.66	SPAIN
ALLIANZ SE REG	Insurance	4.31	GERMANY
ASML HOLDING NV	Manufacture of computer, electronic and optical products	4.20	NETHERLANDS (THE)
AXA SA	Insurance	4.09	FRANCE
TOTALENERGIES SE	Extraction of crude petroleum and natural gas	4.07	FRANCE
ENEL SPA	Production of electricity	4.07	ITALY
UNICREDIT SPA	Banking	4.02	ITALY
BANCO BILBAO VIZCAYA ARGENTA	Banking	4.01	SPAIN

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 25/03/2025-31/08/2025

SIEMENS AG REG	Manufacture of electrical equipment	3.84	GERMANY
MUENCHENER RUECKVER AG REG	Insurance	3.77	GERMANY
INDUSTRIA DE DISENO TEXTIL	Manufacture of wearing apparel	3.68	SPAIN
INTESA SANPAOLO	Banking	3.57	ITALY
L OREAL	Manufacture of chemicals and chemical products	3.56	FRANCE
SANOFI	Manufacture of pharmaceuticals	3.55	FRANCE
ENGIE	Production of electricity	3.39	FRANCE

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (31/05/2025 and 31/08/2025) of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 99.01% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Electricity, gas, steam and air conditioning supply	Production of electricity	14.46
Financial and insurance activities	Banking	14.41
Financial and insurance activities	Insurance	12.17
Manufacturing	Manufacture of wearing apparel	9.65
Manufacturing	Manufacture of chemicals and chemical products	9.01
Manufacturing	Manufacture of electrical equipment	6.37

Manufacturing	Manufacture of computer, electronic and optical products	6.22
Manufacturing	Manufacture of motor vehicles	4.57
Mining and quarrying	Extraction of crude petroleum and natural gas	4.07
Manufacturing	Manufacture of pharmaceuticals	3.55
Manufacturing	Manufacture of non-metallic mineral products	3.37
Wholesale and retail trade	Retail trade	3.31
Manufacturing	Manufacture of optical instruments	2.61
Information and communication	Publishing activities	2.36
Transportation and storage	Postal and courier activities	2.19

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends 31/05/2025 and 31/08/2025 of the financial year.

18.53% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 0.99 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (0.99%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – US Equity

Legal Entity Identifier: 529900V0F1A5URWGJS61

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **YES**

☐ It made **sustainable investments with an environmental objective: ____%**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective: ____%**

☒ ☒ **NO**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.44% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework.

In addition, the Sub-Fund invested 39.44% of its net assets in securities of issuers that qualify as sustainable investments based on the Investment Manager’s Sustainable Development Goal (SDG) assessment.

By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects are integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanisms relate directly to one of these characteristics. The ESG assessment framework may not have included all of these characteristics as the aspects considered in this process may have depended for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Sub-Fund’s weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund’s benchmark (S&P 500 – TR).	64.12 tons CO2e/USD million revenue (Sub-Fund) vs 92.04 tons CO2e/USD million revenue (benchmark)	
Percentage of securities covered by ESG analysis	100%

Financial year of the Fund ending on 31 August	2025	2024	2023
Sustainability Indicators	Value	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%	0%
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	0%	0%
Sub-Fund’s weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund’s benchmark (S&P 500 – TR).	64.12 tons CO2e/USD million revenue (Sub-Fund) vs 92.04 tons CO2e/USD million revenue (benchmark)	58.53 tons CO2e/USD million revenue (Sub-Fund) vs 98.13 tons CO2e/USD million revenue (benchmark)	31.21 tons CO2e/USD million revenue (Sub-Fund) vs 113.83 tons CO2e/USD million revenue (benchmark)
Percentage of securities covered by ESG analysis	100%	100%	100%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that contribute to at least one of the Sustainable Development Goals (SDGs). The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment, on the one hand of “operations” (measured based on a scorecard) and on the other hand of “products and services” (measured based on revenues – if an issuer derives more than 20% of its revenues from economic activities that contribute to at least one of the SDGs, it will be considered a sustainable investment). For both aspects, the companies’ economic activities were classified in one of the following four buckets: “Significant Harm”, “Neutral”, “In transition”, “Positive contribution”. In order to qualify as a sustainable investment, and apart from following good governance, the company:

- Must not have had any aspect of its economic activities classified as “Significant Harm”
- Must have had at least one aspect of its economic activities classified as “In transition” or “Positive contribution”

The Sub-Fund did not commit to invest a minimum share in sustainable investments with an environmental objective as defined by the EU Taxonomy.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund’s investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
AMAZON.COM INC	Retail sale via mail order or internet	6.04	UNITED STATES OF AMERICA (THE)
MICROSOFT CORP	Manufacture of computer, electronic and optical products	5.79	UNITED STATES OF AMERICA (THE)
COCA COLA CO/THE	Manufacture of beverages	4.69	UNITED STATES OF AMERICA (THE)
INTERCONTINENTAL EXCHANGE IN	Other financial service activities, except insurance and pension funding n.e.c.	4.54	UNITED STATES OF AMERICA (THE)
MASTERCARD INC A	Financial service activities	4.25	UNITED STATES OF AMERICA (THE)
RB GLOBAL INC	Activities of holding companies	4.17	UNITED STATES OF AMERICA (THE)
ABBOTT LABORATORIES	Manufacture of pharmaceutical preparations	3.74	UNITED STATES OF AMERICA (THE)
ALPHABET INC CL A	Manufacture of computer, electronic and optical products	3.56	UNITED STATES OF AMERICA (THE)
CME GROUP INC	Other financial service activities, except insurance and pension funding n.e.c.	3.52	UNITED STATES OF AMERICA (THE)
INTUIT INC	Software publishing	3.26	UNITED STATES OF AMERICA (THE)
ADOBE INC	Software publishing	2.54	UNITED STATES OF AMERICA (THE)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

THERMO FISHER SCIENTIFIC INC	Pharmaceutical products manufacturing	2.48	UNITED STATES OF AMERICA (THE)
ZOETIS INC	Manufacture of pharmaceutical preparations	2.38	UNITED STATES OF AMERICA (THE)
CRH PLC	Manufacture of articles of concrete, cement and plaster	2.26	UNITED STATES OF AMERICA (THE)
META PLATFORMS INC CLASS A	Other information technology and computer service activities	2.17	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 99.16% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Other financial service activities, except insurance and pension funding n.e.c.	9.35
Manufacturing	Manufacture of computer, electronic and optical products	9.35
Information and communication	Software publishing	8.29
Manufacturing	Manufacture of pharmaceutical preparations	6.12
Wholesale and retail trade	Retail sale via mail order or internet	6.04
Manufacturing	Manufacture of beverages	5.55
Information and communication	Other information technology and computer service activities	4.35
Financial and insurance activities	Financial service activities	4.25
Financial and insurance activities	Activities of holding companies	4.17
Manufacturing	Manufacture of articles of concrete, cement and plaster	3.63
Manufacturing	Pharmaceutical products manufacturing	2.48
Manufacturing	Manufacture of instruments and appliances for measuring, testing and navigation	2.19
Real estate activities	Real estate investment trust (REIT)	2.15
Manufacturing	Manufacture of cocoa, chocolate and sugar confectionery	2.13
Manufacturing	Manufacture of electrical equipment	2.13
Transportation and storage	Rail transport	2.09
Financial and insurance activities	Non-life insurance	2.04
Manufacturing	Manufacture of medical and dental instruments	2.03
Wholesale and retail trade; repair of motor vehicles and motorcycles	Other retail sale in non-specialised stores	2.02
Manufacturing	Manufacture of soft drinks; production of mineral waters and other bottled waters	1.93
Information and communication	Computer programming activities	1.88
Manufacturing	Manufacture of soap and detergents, cleaning and polishing preparations	1.78
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale of hardware, plumbing and heating equipment	1.54
Manufacturing	Manufacture of medical and dental instruments and supplies	1.53
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale of waste and scrap	1.52

Information and communication	Travel agency, tour operator and related	1.30
Wholesale and retail trade	Retail trade	1.26
Information and communication	Computer programming, consultancy and related activities	1.08
Manufacturing	Manufacture of electronic components	1.00
total of remaining sectors with a proportion < 1.0%		2.79

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.32% for this Sub-Fund.

As a US Equity strategy, the investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment therein.

What was the share of socially sustainable investments?

The Sub-Fund invested 25.12% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 0.84% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (0.84%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Global Equity

Legal Entity Identifier: HKDKDIFFGRVL37GZF444

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ ☒ NO ☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	During the reporting period, there were two potential breaches of UNGC standards. After review, a positive outlook has been identified by the Research and ESG Analyst(s) and confirmed by Investment Risk.
Sub-Fund’s weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund’s benchmark (MSCI All Country World Index TR net).	71.91 tons CO2e/USD million revenue (Sub-Fund) vs 113.86 tons CO2e/USD million revenue (benchmark)

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Manufacture of computer, electronic and optical products	6.29	UNITED STATES OF AMERICA (THE)
COCA COLA CO/THE	Manufacture of beverages	5.05	UNITED STATES OF AMERICA (THE)
AMAZON.COM INC	Retail sale via mail order or internet	4.54	UNITED STATES OF AMERICA (THE)
ALPHABET INC CL C	Technology	4.18	UNITED STATES OF AMERICA (THE)
TAIWAN SEMICONDUCTOR SP ADR	Technology	4.01	TAIWAN (PROVINCE OF CHINA)
RELX PLC	Publishing activities	3.35	UNITED KINGDOM
MASTERCARD INC A	Financial service activities	3.22	UNITED STATES OF AMERICA (THE)

ABBOTT LABORATORIES	Healthcare	3.18	UNITED STATES OF AMERICA (THE)
CONSTELLATION SOFTWARE INC	Technology	3.05	CANADA
RB GLOBAL INC	Retail	3.02	UNITED STATES OF AMERICA (THE)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

LONDON STOCK EXCHANGE GROUP	Financial service activities	2.91	UNITED KINGDOM
CME GROUP INC	Financial markets	2.86	UNITED STATES OF AMERICA (THE)
SAP SE	Computer programming, consultancy and related activities	2.84	GERMANY
FLUTTER ENTERTAINMENT PLC DI	Gambling and betting activities	2.36	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.38% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Information and communication	Technology	15.16
Manufacturing	Manufacture of computer, electronic and optical products	6.75
Financial and insurance activities	Financial service activities	6.13
Manufacturing	Manufacture of beverages	5.05
Wholesale and retail trade	Retail sale via mail order or internet	4.54
Wholesale and retail trade	Retail	3.73
Information and communication	Computer programming, consultancy and related activities	3.63
Information and communication	Publishing activities	3.35

Transportation and storage	Freight rail transport	1.12
Information and communication	Publishing of journals and periodicals	1.11

Manufacturing	Manufacture of soft drinks; production of mineral waters and other bottled waters	1.04
Financial and insurance activities	Insurance	1.02

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.62% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (1.62%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Human health and social work activities	Health insurance	1.05
total of remaining sectors with a proportion < 1.0%		1.70

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

9.82% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and

quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.48% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (1.48%) and cash equivalent investments, for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Emerging Markets Equity

Legal Entity Identifier: ZM4Q3MBON4HNUYCJQU59

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ YES

☐ It made **sustainable investments** with an **environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** %

☒ ☐ ☒ **NO**

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	During the reporting period, there were two potential breaches of UNGC standards. After review, a positive outlook has been identified by the Research and ESG Analyst(s) and confirmed by Investment Risk.
Sub-Fund’s weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund’s benchmark (MSCI Emerging Markets TR net.)	56.61 tons CO2e/USD million revenue (Sub-Fund) vs 288.56 tons CO2e/USD million revenue (benchmark)	
Percentage of securities covered by ESG analysis	100%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Manufacture of computer, electronic and optical products	8.88	TAIWAN (PROVINCE OF CHINA)
TENCENT HOLDINGS LTD	Publishing, audiovisual and broadcasting	7.26	CHINA
AIA GROUP LTD	Insurance, reinsurance and pension funding	3.69	HONG KONG
ACCTON TECHNOLOGY CORP	Manufacture of computer, electronic and optical products	2.83	TAIWAN (PROVINCE OF CHINA)
ALIBABA GROUP HOLDING LTD	Retail trade, except of motor vehicles and motorcycles	2.50	HONG KONG
ICICI BANK LTD	Monetary intermediation	2.46	INDIA
PRESIDENT CHAIN STORE CORP	Retail trade, except of motor vehicles and motorcycles	2.00	TAIWAN (PROVINCE OF CHINA)
SAMSUNG ELECTRONICS CO LTD	Manufacture of computer, electronic and optical products	1.92	KOREA (THE REPUBLIC OF)
MERCADOLIBRE INC	Computer programming, consultancy and related activities	1.90	URUGUAY
EUROBANK ERGASIAS SERVICES A	Monetary intermediation	1.89	GREECE
HONG KONG EXCHANGES + CLEAR	Financial service activities	1.86	HONG KONG

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

TRIP.COM GROUP LTD	Information service activities	1.85	SINGAPORE
NETEASE INC	Publishing, audiovisual and broadcasting	1.81	CHINA
SK HYNIX INC	Manufacture of computer, electronic and optical products	1.76	KOREA (THE REPUBLIC OF)
EICHER MOTORS LTD	Manufacture of motor vehicles, trailers and semi-trailers	1.75	INDIA

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 97.42% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	17.91
Financial and insurance activities	Monetary intermediation	11.24
Information and communication	Publishing, audiovisual and broadcasting	10.64
Wholesale and retail trade	Retail trade, except of motor vehicles and motorcycles	8.48
Financial and insurance activities	Insurance, reinsurance and pension funding	5.42
Information and communication	Computer programming, consultancy and related activities	3.90
Manufacturing	Manufacture of electrical equipment	2.77
Human health and social work activities	Hospital activities	2.55
Financial and insurance activities	Other credit granting	1.94
Wholesale and retail trade	Other retail sale in non-specialised stores	1.87
Financial and insurance activities	Financial service activities	1.86
Information and communication	Information service activities	1.85
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.75
Real estate activities	Real estate activities with own or leased property	1.37
Manufacturing	Manufacture of electronic components	1.37
Manufacturing	Manufacture of pharmaceutical preparations	1.37
Manufacturing	Manufacture of beverages	1.35
Information and communication	Real estate activities (online platforms)	1.29
Financial and insurance activities	Other monetary intermediation	1.13
Electricity, gas, steam and air conditioning supply	Transmission of electricity	1.11
total of remaining sectors with a proportion < 1.0%		15.98

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

1.11% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**¹*

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 2.58 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (2.58%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

The Sub-Fund was merged into Vontobel Fund – European Equity Income Plus as of March 25, 2025.

Please take into consideration that the disclosure for this Sub-Fund is therefore based on data as of February 28, 2025, and not as of the Fund’s financial year-end (August 31, 2025). Where data is related to the financial year-end, “N/A” or “Not applicable” values are shown instead.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Asia ex Japan **Legal Entity Identifier:** RJECJ6V6FST1O1U2DV25

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ ☒ NO ☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met during the existence of the Sub-Fund.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund had not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	N/A	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.

1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Manufacture of computer, electronic and optical products	6.45	TAIWAN (PROVINCE OF CHINA)
TENCENT HOLDINGS LTD	Publishing, audiovisual and broadcasting	5.52	CHINA
AIA GROUP LTD	Insurance, reinsurance and pension funding	3.40	HONG KONG
HONG KONG EXCHANGES + CLEAR	Financial service activities	2.21	HONG KONG
BANK CENTRAL ASIA TBK PT	Monetary intermediation	2.18	INDONESIA
ALIBABA GROUP HOLDING LTD	Retail trade, except of motor vehicles and motorcycles	2.18	HONG KONG
PRESIDENT CHAIN STORE CORP	Other retail sale in non-specialised stores	2.16	TAIWAN (PROVINCE OF CHINA)
TRIP.COM GROUP LTD	Information service activities	1.97	SINGAPORE
UNITED OVERSEAS BANK LTD	Monetary intermediation	1.80	SINGAPORE
POWER GRID CORP OF INDIA LTD	Transmission of electricity	1.71	INDIA
ACCTON TECHNOLOGY CORP	Manufacture of computer, electronic and optical products	1.65	TAIWAN (PROVINCE OF CHINA)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-25/03/2025

ICICI BANK LTD	Monetary intermediation	1.64	INDIA
NETEASE INC	Publishing, audiovisual and broadcasting	1.61	CHINA
CIPLA LTD	Manufacture of pharmaceutical preparations	1.48	INDIA
TATA CONSULTANCY SVCS LTD	Computer programming, consultancy and related activities	1.42	INDIA

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends 30 November 2024 and 28 February 2025, only.

What was the proportion of sustainability-related investments?

Not applicable

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	11.35
Information and communication	Publishing, audiovisual and broadcasting	7.13
Financial and insurance activities	Monetary intermediation	6.24
Financial and insurance activities	Insurance, reinsurance and pension funding	4.50
Wholesale and retail trade	Other retail sale in non-specialised stores	2.49
Manufacturing	Manufacture of electronic components	2.25
Financial and insurance activities	Financial service activities	2.21
Wholesale and retail trade	Retail trade, except of motor vehicles and motorcycles	2.18
Information and communication	Information service activities	1.97
Human health and social work activities	Hospital activities	1.78
Electricity, gas, steam and air conditioning supply	Transmission of electricity	1.71
Manufacturing	Manufacture of pharmaceutical preparations	1.48
Information and communication	Computer programming, consultancy and related activities	1.42
Manufacturing	Manufacture of general-purpose machinery	1.37
Manufacturing	Manufacture of household appliances	1.37
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.36
Information and communication	Other information service activities	1.34
Manufacturing	Manufacture of electrical equipment	1.26
Information and communication	Computer programming activities	1.08
Manufacturing	Manufacture of electric domestic appliances	1.03
Financial and insurance activities	Other monetary intermediation	1.02
total of remaining sectors with a proportion < 1.0%		8.30

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends 30 November 2024 and 28 February 2025, only.

1.71% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
Not applicable
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

 **What was the share of socially sustainable investments?**

Not applicable

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Not applicable

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored during the existence of the Sub-Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund had not designated a reference benchmark to determine whether this Sub-Fund was aligned with the environmental and/or social characteristics that it promoted.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Transition Resources

Legal Entity Identifier: 5299008S6UZFDPCGIJ49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met. The Sub-Fund invested in globally listed companies that enable an orderly transition toward a net-zero world, focusing on upstream resources in materials and low-carbon energy. These investments were aligned with the pillars of "Enabling Materials" and "Low Carbon Energy" and prioritized technologies that reduce environmental impact and promote recycling. Issuers were selected based on the Investment Manager's ESG framework.

During the reporting period, the Sub-Fund underwent a repositioning and name change from "Vontobel Fund – Energy Revolution" to "Vontobel Fund – Transition Resources". This repositioning reflects an updated investment strategy that continues to focus on enabling the transition to a net-zero world but with a refined emphasis on upstream resources, particularly materials and low-carbon energy. The 20% committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy, as outlined in the Sub-Fund's pre-contractual disclosures, was removed. Additionally, the Sub-Fund introduced stricter exclusion criteria, including a 0% revenue threshold for tobacco production, in line with EU Climate Transition Benchmarks (CTB).

The Sub-Fund invests in companies that enable an orderly transition towards a net-zero world. It focuses on upstream resources, mainly materials and low carbon energy. The two investment pillars "Enabling Materials" and "Low Carbon Energy" span the entire supply chain, from basic resources to technology enablers. Downstream elements such as the production of renewable energy are no longer part of the realigned investment strategy.

These changes did not affect the Sub-Fund's SFDR classification or the environmental and social characteristics it promotes.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in issuers who contribute to the pillars "Enabling Materials" and "Low Carbon Energy".	Enabling Materials: 57.77% Low Carbon Energy: 38.46%	The remaining 3.77% is Cash.
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager's Exclusion Framework.
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (set at B)	99.72%	0.28% is invested in Carbios which does not have an MSCI ESG Rating but meets the norms-based screening criteria
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues	0%	
Percentage of securities covered by ESG analysis	99.72%	0.28% is invested in Carbios which does not have an MSCI ESG Rating but meets the norms-based screening criteria.

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2025	2024	2023
Sustainability Indicators	Value	Value	Value
Percentage of investments in issuers who contribute to the pillars "Enabling Materials" and "Low Carbon Energy".	*Enabling Materials: 57.77% Low Carbon Energy: 38.46%	Transition Materials: 20.84% Renewable Energy: 45.96% Low Carbon Energy: 31.75%	N/A
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (set at B)	99.72%	99.50%	100%

Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues	0%	0%	0%
Percentage of securities covered by ESG analysis	99.72%	99.50%	100%
Percentage of investments in issuers that focus on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes "Alternative Energy Materials", "Alternative Energy Generation" and "Energy Storage"	N/A	N/A	16.37% 'Alternative Energy Materials', 56.59% 'Alternative Energy Generation', 23.22% 'Energy Storage'

*Please note that the sub-themes have been changed in 2025 to "Enabling Materials" and "Low Carbon Energy" but the investment universe remained the same as in the previous years.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

----- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

----- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
LINDE PLC	Manufacture of industrial gases	3.96	UNITED STATES OF AMERICA (THE)
BAKER HUGHES CO	Support activities for oil and gas extraction	3.47	UNITED STATES OF AMERICA (THE)
CONTEMPORARY AMPEREX TECHN A	Manufacture of batteries and accumulators	3.41	CHINA
RIO TINTO PLC	Other mining and quarrying	3.19	UNITED KINGDOM
TECHNIP ENERGIES NV	Engineering services for energy and chemicals	2.91	FRANCE
CHART INDUSTRIES INC	Manufacture of industrial machinery	2.81	UNITED STATES OF AMERICA (THE)
NORSK HYDRO ASA	Manufacture of aluminium	2.42	NORWAY
TECK RESOURCES LTD CLS B	Extraction of metal ores	2.36	CANADA
TOTALENERGIES SE	Crude petroleum and natural gas extraction	2.35	FRANCE
FREEPORT MCMORAN INC	Extraction of copper ores	2.35	UNITED STATES OF AMERICA (THE)
CADELER A/S	Offshore wind turbine installation services	2.33	DENMARK
GAZTRANSPORT ET TECHNIGA SA	Manufacture of tanks and engineering systems	2.27	FRANCE
HEIDELBERG MATERIALS AG	Manufacture of cement and aggregates	1.81	GERMANY
COEUR MINING INC	Extraction of non-ferrous metals	1.76	UNITED STATES OF AMERICA (THE)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

SAIPEM SPA	Support activities for oil and gas extraction	1.67	ITALY

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 95.95 % (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of industrial gases	6.36
Mining and quarrying	Support activities for oil and gas extraction	5.14
Electricity, gas, steam and air conditioning supply	Production of electricity	4.42

Mining and quarrying	Crude petroleum and natural gas extraction	3.97
Manufacturing	Manufacture of batteries and accumulators	3.94
Mining and quarrying	Other mining and quarrying	3.19
Mining and quarrying	Metal ores mining	3.13
Manufacturing	Engineering services for energy and chemicals	2.91
Manufacturing	Manufacture of industrial machinery	2.81
Manufacturing	Manufacture of instruments and appliances for measuring, testing and navigation	2.63
Mining and quarrying	Precious metals mining	2.53
Manufacturing	Manufacture of aluminium	2.42
Electricity, gas, steam and air conditioning supply	Transmission of electricity	2.40
Mining and quarrying	Extraction of metal ores	2.36
Mining and quarrying	Extraction of copper ores	2.35
Construction	Offshore wind turbine installation services	2.33
Manufacturing	Manufacture of wiring devices	2.28
Manufacturing	Manufacture of tanks and engineering systems	2.27
Mining and quarrying	Uranium mining	2.25
cash	cash	2.03
Manufacturing	Manufacture of cement and aggregates	1.81
Mining and quarrying	Extraction of non-ferrous metals	1.76
Mining and quarrying	Natural gas liquefaction	1.65
Manufacturing	Manufacture of industrial tanks and gas equipment	1.60
Mining and quarrying	Support activities for petroleum and natural gas extraction	1.56
Construction	Dredging and marine construction	1.52
Manufacturing	Manufacture of steel	1.44
Electricity, gas, steam and air conditioning supply	Distribution of electricity	1.36
Mining and quarrying	Crude petroleum extraction	1.21
Manufacturing	Manufacture of explosives	1.20
Mining and quarrying	Iron ore mining	1.15
Manufacturing	Manufacture of engines and turbines, except aircraft, vehicle and cycle engines	1.14
Construction	Construction of utility projects for electricity and telecommunications	1.11
Mining and quarrying	Silver mining	1.05

Manufacturing	Manufacture of cement	1.04
Manufacturing	Manufacture of machinery for mining and construction	1.02
Manufacturing	Manufacture of turbochargers and engines	1.01
Manufacturing	Sawmilling and wood products manufacturing	1.00
total of remaining sectors with a proportion < 1.0%		14.65

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

45.35% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 4.05% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.77%) for Liquidity management purposes;
- 0.28% investment in Carbios which has no MSCI ESG Rating; Environmental and Social safeguards were applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. Their application led to the exclusion of 96% of the investments considered prior to the application of the investment strategy (i.e. global listed equity markets) using the screens pertaining to the two investable pillars: Enabling Materials and Low Carbon Energy.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – mtX Asian Leaders (ex Japan) **Legal Entity Identifier:** 529900WCEMQJF4XGP13

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐

YES

☐

It made sustainable investments with an environmental objective: ____%

☐

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

It made sustainable investments with a social objective: ____%

☒

NO

☒

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.00% of sustainable investments

☐

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

with a social objective

☐

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met and all binding criteria complied with.

The Sub-Fund promoted environmental and social characteristics by employing several safeguards and evaluating all equity investments required to be met for inclusion. The Investment Manager further promoted environmental and social criteria with an extensive ESG engagement and voting program. Integrating sustainability criteria is a central pillar in the investment process with the aim of improving the long-term risk-return characteristics of the Sub-Fund’s portfolio and supporting elevated social or environmental practices by the investee companies. The Investment Manager is motivated by the understanding that its investments have the potential to affect society and the environment, and that such investments are affected by society and the environment. The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges, having satisfied minimum pass ESG scores as well as sectoral and norms-based exclusions. It also exceeded its commitments related to carbon emissions.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Vontobel Fund – mtX Asian Leaders (ex Japan)

Page | 1

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in companies that pass the minimum ESG score (as evaluated using the “Minimum Standards Framework”, the Investment Manager’s proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	
Percentage of investments in companies evaluated as having an overriding Fail Score under the “Minimum Standards Framework” or under the “F-Score Framework”, the Investment Manager's proprietary tool for evaluating critical controversies.	0%	
Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities. Such controversies may be related to environmental, social or governance issues.	0%	During the reporting period, there were no new Critical ESG Events. The Sub-Fund continues to hold Tencent, which was flagged by one ESG rater as in breach of UNGC but was cleared by Investment Manager's Delegated Committee who opined that the allegations by the ESG rater were not substantiated.
The Sub-Fund’s carbon footprint relative to the benchmark (evaluated on the basis of each issuer’s scope 1 and 2 GHG emissions normalized by the company’s enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then compared to that of the reference benchmark (MSCI All Country Asia (ex Japan) TR net).	Sub-Fund carbon footprint: 47.75 Benchmark footprint: 96.93 The Sub-Fund's footprint was 51% below that of its reference benchmark	The Sub-fund commits to maintaining a carbon footprint that is at least 20% lower than its reference benchmark.
Companies’ carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund’s percentage of sustainable investments.	26.90%	Threshold required is 15%

Percentage of securities covered by ESG analysis	100%	
Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller subset of companies that passed the fundamental, financial assessment.	4.90% of companies were excluded via screening 18.90% of companies failed the ESG screening by Investment Manager's Analysts	4.90% and 18.90% can't be summed as they are taken from different lists. ESG analysis is only conducted on the narrower universe of companies that have passed fundamental screens

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the Sub-Fund's partial sustainable investments strategy is to support climate change mitigation and the transition to the low-carbon economy by identifying issuers that are in the lowest 30% of carbon footprint (sc.1+2) relative to their reference benchmark and maintaining a carbon footprint that is at least 20% lower than that of its reference benchmark. The Sub-Fund exceeded its targets by holding 27% of issuers with lowest (smallest 30%) carbon footprint, as against a commitment of 15%. The Sub-Fund's total carbon footprint was 51% below that of its Benchmark, and thus also exceeded its goal to beat the benchmark by 20%. Calculation approach is provided in the pre-contractual disclosures.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

----- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Manufacture of electronic components	9.13	TAIWAN (PROVINCE OF CHINA)
TENCENT HOLDINGS LTD	Other information technology and computer service activities	7.38	CHINA
SAMSUNG ELECTRONICS CO LTD	Manufacture of electronic components	4.85	KOREA (THE REPUBLIC OF)
ALIBABA GROUP HOLDING LTD	Other information technology and computer service activities	4.77	HONG KONG
AIA GROUP LTD	Other monetary intermediation	3.80	HONG KONG
NAVER CORP	Computer programming activities	3.26	KOREA (THE REPUBLIC OF)
INFOSYS LTD	Computer programming activities	3.05	INDIA
HDFC BANK LIMITED	Other monetary intermediation	2.80	INDIA
ACCTON TECHNOLOGY CORP	Manufacture of computers and peripheral equipment	2.71	TAIWAN (PROVINCE OF CHINA)
BYD CO LTD H	Manufacture of motor vehicles	2.65	CHINA
PING AN INSURANCE GROUP CO H	Non-life insurance	2.63	CHINA
TRIP.COM GROUP LTD ADR	Other information technology and computer service activities	2.50	SINGAPORE
BAJAJ FINANCE LTD	Other financial service activities, except insurance and pension funding	2.41	INDIA
ELITE MATERIAL CO LTD	Manufacture of electronic components	2.36	TAIWAN (PROVINCE OF CHINA)
KIA CORP	Manufacture of motor vehicles	2.15	KOREA (THE REPUBLIC OF)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 99.22% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of electronic components	20.56
Information and communication	Other information technology and computer service activities	16.25
Financial and insurance activities	Other monetary intermediation	13.54
Information and communication	Computer programming activities	7.12
Manufacturing	Manufacture of motor vehicles	6.86

Manufacturing	Manufacture of computers and peripheral equipment	4.77
Manufacturing	Manufacture of glass and glass products	3.58
Mining and quarrying	Mining of metal ores	2.64
Financial and insurance activities	Non-life insurance	2.63
Financial and insurance activities	Other financial service activities, except insurance and pension funding	2.41
Financial and insurance activities	Security and commodity contracts brokerage	1.66
Manufacturing	Manufacture of basic chemicals	1.28
Accommodation and food service activities	Restaurants and mobile food service activities	1.22
Manufacturing	Manufacture of basic iron and steel	1.20
Manufacturing	Manufacture of general-purpose machinery	1.17
Manufacturing	Manufacture of batteries and accumulators	1.10
Real estate activities	Management of real estate on a fee or contract basis	1.09
Manufacturing	Manufacture of household appliances	1.04
total of remaining sectors with a proportion < 1.0%		5.31

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

3.46% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 0.78% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (0.78%) and cash equivalent investments, for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. To support the promotion of environmental and social characteristics, the Investment Manager engages actively in voting and engagement. The Sub-Fund has an engagement coverage of 56% (based on engagement during the reporting period, for holdings from 1 September 2024 to 31 August 2025) of its holdings via the direct engagement of the Investment Manager and its third-party specialist engagement partner. The Investment Manager also has a dedicated process to actively vote on all company ballots following review by financial and ESG analysts, incorporating environmental and social characteristics where relevant. The Sub-Fund thereby voted in 100% (total of 80) of meetings in the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – mtX Emerging Markets Leaders **Legal Entity Identifier:** 529900WCEMQKF4XGP13

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐

YES

☐

It made sustainable investments with an environmental objective: ____%

☐

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

It made sustainable investments with a social objective: ____%

☒

NO

☒

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.00% of sustainable investments

☐

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

with a social objective

☐

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met and all binding criteria complied with.

The Sub-Fund promoted environmental and social characteristics by employing several safeguards and evaluating all equity investments required to be met for inclusion. The Investment Manager further promoted environmental and social criteria with an extensive ESG engagement and voting program. Integrating sustainability criteria is a central pillar in the investment process with the aim of improving the long-term risk-return characteristics of the Sub-Fund’s portfolio and supporting elevated social or environmental practices by the investee companies. The Investment Manager is motivated by the understanding that its investments have the potential to affect society and the environment, and that such investments are affected by society and the environment. The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges, having satisfied minimum pass ESG scores as well as sectoral and norms-based exclusions. It also exceeded its commitments related to carbon emissions.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Vontobel Fund – mtX Emerging Markets Leaders

Page | 1

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in companies that pass the minimum ESG score (as evaluated using the “Minimum Standards Framework”, the Investment Manager’s proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	The Sub-Fund holds Alrosa, which has a below threshold ESG score. Due to sanctions, the position cannot yet be traded and the Investment Manager therefore awaits an opportunity to sell the position. However, as it has no weight in the fund it does not impact the value shown.
Percentage of investments in companies evaluated as having an overriding Fail Score under the “Minimum Standards Framework” or under the “F-Score Framework”, the Investment Manager's proprietary tool for evaluating critical controversies.	0%	
Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities. Such controversies may be related to environmental, social or governance issues.	0%	During the reporting period, there were no new Critical ESG Events. The Sub-Fund continues to hold Tencent, which was flagged by one ESG rater as in breach of UNGC but was cleared by Investment Manager's Delegated Committee who opined that the allegations by the ESG rater were not substantiated.
The Sub-Fund’s carbon footprint relative to the benchmark (evaluated on the basis of each issuer’s scope 1 and 2 GHG emissions normalized by the company’s enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then compared to that of the reference benchmark (MSCI All Country Asia (ex Japan) TR net).	Sub-Fund carbon footprint: 43.05 Benchmark footprint: 105.44 The Sub-Fund's footprint was 59% below that of its reference benchmark	The Sub-fund commits to maintaining a carbon footprint that is at least 20% lower than its reference benchmark.
Companies’ carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund’s percentage of sustainable investments.	26.90%	Threshold required is 15%

Percentage of securities covered by ESG analysis	100%	
Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller sub-set of companies that passed the fundamental, financial assessment.	4.30% of companies were excluded via screening 15.85% of companies failed the ESG screening by Investment Manager's Analysts	4.30% and 15.85% can't be summed as they are taken from different lists. ESG analysis is only conducted on the narrower universe of companies that have passed fundamental screens

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the Sub-Fund's partial sustainable investments strategy is to support climate change mitigation and the transition to the low-carbon economy by identifying issuers that are in the lowest 30% of carbon footprint (sc.1+2) relative to their reference benchmark and maintaining a carbon footprint that is at least 20% lower than that of its reference benchmark. The Sub-Fund exceeded its targets by holding 27% of issuers with lowest (smallest 30%) carbon footprint, as against a commitment of 15%. The Sub-Fund's total carbon footprint was 59% below that of its Benchmark, and thus also exceeded its goal to beat the benchmark by 20%. Calculation approach is provided in the pre-contractual disclosures.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's

own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Manufacture of computer, electronic and optical products	9.23	TAIWAN (PROVINCE OF CHINA)
TENCENT HOLDINGS LTD	Publishing, audiovisual and broadcasting	5.71	CHINA
SAMSUNG ELECTRONICS CO LTD	Manufacture of computer, electronic and optical products	4.43	KOREA (THE REPUBLIC OF)
ALIBABA GROUP HOLDING LTD	Retail trade, except of motor vehicles and motorcycles	3.60	HONG KONG
NAVER CORP	Computer programming activities	2.78	KOREA (THE REPUBLIC OF)
ALDAR PROPERTIES PJSC	Buying and selling of own real estate	2.63	UNITED ARAB EMIRATES (THE)
CIA SANEAMENTO BASICO DE SP	Water collection, treatment and supply	2.57	BRAZIL
INFOSYS LTD	Computer programming activities	2.52	INDIA
AIA GROUP LTD	Insurance, reinsurance and pension funding	2.50	HONG KONG
BYD CO LTD H	Manufacture of motor vehicles	2.45	CHINA
TRIP.COM GROUP LTD ADR	Other information technology and computer service activities	2.37	SINGAPORE
ACCTON TECHNOLOGY CORP	Manufacture of computer, electronic and optical products	2.33	TAIWAN (PROVINCE OF CHINA)
PING AN INSURANCE GROUP CO H	Non-life insurance	2.28	CHINA
GOLD FIELDS LTD	Mining of gold	2.19	SOUTH AFRICA
ELITE MATERIAL CO LTD	Manufacture of computer, electronic and optical products	2.14	TAIWAN (PROVINCE OF CHINA)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 99.29% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	18.13
Financial and insurance activities	Other monetary intermediation	8.44
Information and communication	Publishing, audiovisual and broadcasting	7.60
Manufacturing	Manufacture of motor vehicles	6.05
Information and communication	Computer programming activities	5.89
Manufacturing	Manufacture of electronic components	4.44

Information and communication	Other information technology and computer service activities	3.78
Real estate activities	Buying and selling of own real estate	3.72
Wholesale and retail trade	Retail trade, except of motor vehicles and motorcycles	3.60
Financial and insurance activities	Monetary intermediation	3.29
Mining and quarrying	Extraction of crude petroleum	3.05
Manufacturing	Manufacture of glass and glass products	2.95
Water supply; sewerage, waste management	Water collection, treatment and supply	2.57
Financial and insurance activities	Insurance, reinsurance and pension funding	2.50
Financial and insurance activities	Non-life insurance	2.28
Mining and quarrying	Mining of gold	2.19
Financial and insurance activities	Other financial service activities, except insurance and pension funding	2.10
Information and communication	Computer programming, consultancy and related activities	2.06
Manufacturing	Manufacture of computers and peripheral equipment	1.78
Mining and quarrying	Mining of other non-ferrous metal ores	1.50
Real estate activities	Management of real estate on a fee or contract basis	1.20
Transportation and storage	Passenger air transport	1.19
Accommodation and food service activities	Restaurants and mobile food service activities	1.04
total of remaining sectors with a proportion < 1.0%		8.66

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

7.95% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 0.71% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (0.71%) and cash equivalent investments, for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. To support the promotion of environmental and social characteristics, the Investment Manager engages actively in voting and engagement in areas of sustainability-related risks. The Sub-Fund has an engagement coverage of 56% (based on engagement during the reporting period, for holdings from 1 September 2024 to 31 August 2025) of its holdings via the direct engagement of the Investment Manager and its third-party specialist engagement partner. The Investment Manager also has a dedicated process to actively vote on all company ballots following review by financial and ESG analysts, incorporating environmental and/or social characteristics where relevant. The Sub-Fund thereby voted in 100% (absolute number of 97) of meetings in the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – mtX Emerging Markets Leaders ex China

Legal Entity Identifier: 213800TOBRBHDIXY511

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 23.80% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met and all binding criteria complied with.

The Sub-Fund promoted environmental and social characteristics by employing several safeguards and evaluating all equity investments against sustainability criteria with hard thresholds required to be met for inclusion. The Investment Manager further promoted environmental and social criteria with an extensive ESG engagement and voting program. Integrating sustainability criteria is a central pillar in the investment process with the aim of improving the long-term risk-return characteristics of the Sub-Fund’s portfolio and supporting elevated social or environmental practices by the investee companies. The Investment Manager is motivated by the understanding that its investments have the potential to affect society and the environment, and that such investments are affected by society and the environment. The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges, having satisfied minimum pass ESG scores as well as sectoral and norms-based exclusions. It also exceeded its commitments related to carbon emissions.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in companies that pass the minimum ESG score (as evaluated using the “Minimum Standards Framework”, the Investment Manager’s proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	
Percentage of investments in companies evaluated as having an overriding “Fail Score” under the Minimum Standards Framework or under the “F-Score Framework”, the Investment Manager’s proprietary tool for evaluating critical controversies.	0%	
Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities.	0%	Such controversies may be related to environmental, social or governance issues.
The Sub-Fund’s carbon footprint relative to the benchmark (evaluated on the basis of each issuer’s scope 1 and 2 GHG emissions normalized by the company’s enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then compared to that of the reference benchmark MSCI EM ex China 10/40 Net Index (USD)	Sub-Fund carbon footprint: 49.6 Benchmark footprint: 115.68 The Sub-Fund's footprint was 57% below that of its reference benchmark	Sub-Fund carbon footprint: 49.6 Benchmark footprint: 115.68 The Sub-Fund's footprint was 57% below that of its reference benchmark
Companies’ carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund’s percentage of sustainable investments.	26.90%	The Sub-fund commits to maintaining a carbon footprint that is at least 20% lower than its reference benchmark.
Percentage of securities covered by ESG analysis.	100%	Threshold required is 15%
Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller sub-set of companies that passed the fundamental, financial assessment.	4.30% of companies were excluded via screening 17.31% of companies failed the ESG screening by Investment	4.30% and 17.31% can't be summed as they are taken from different lists. ESG analysis is only conducted on the narrower universe of companies that have passed fundamental screens

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the Sub-Fund's partial sustainable investments strategy is to support climate change mitigation and the transition to the low-carbon economy by identifying issuers that are in the lowest 30% of carbon footprint (sc.1+2) relative to their reference benchmark and maintaining a carbon footprint that is at least 20% lower than that of its reference benchmark. The Sub-Fund exceeded its targets by holding 23.8% of issuers with lowest (smallest 30%) carbon footprint, as against a commitment of 15%. The Sub-Fund's total carbon footprint was 57% below that of its Benchmark, and thus also exceeded its goal to beat the benchmark by 20%. Calculation approach is provided in the pre-contractual disclosures.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Manufacture of computer, electronic and optical products	5.92	TAIWAN (PROVINCE OF CHINA)
SAMSUNG ELECTRONICS CO LTD	Manufacture of computer, electronic and optical products	5.92	KOREA (THE REPUBLIC OF)
NAVER CORP	Computer programming activities	3.61	KOREA (THE REPUBLIC OF)
ALDAR PROPERTIES PJSC	Buying and selling of own real estate	3.32	UNITED ARAB EMIRATES (THE)
NASPERS LTD N SHS	Publishing, audiovisual and broadcasting	3.22	SOUTH AFRICA
TAIWAN SEMICONDUCTOR SP ADR	Manufacture of electronic components	3.20	TAIWAN (PROVINCE OF CHINA)
HDFC BANK LIMITED	Other monetary intermediation	3.12	INDIA
CIA SANEAMENTO BASICO DE SP	Water collection, treatment and supply	2.98	BRAZIL
BAJAJ FINANCE LTD	Other financial service activities, except insurance and pension funding	2.88	INDIA
ACCTON TECHNOLOGY CORP	Manufacture of computer, electronic and optical products	2.87	TAIWAN (PROVINCE OF CHINA)
RIYAD BANK	Monetary intermediation	2.80	SAUDI ARABIA
GOLD FIELDS LTD	Mining of gold	2.77	SOUTH AFRICA
GRUPO FINANCIERO BANORTE O	Other monetary intermediation	2.61	MEXICO
ELITE MATERIAL CO LTD	Manufacture of computer, electronic and optical products	2.56	TAIWAN (PROVINCE OF CHINA)
GRUPO MEXICO SAB DE CV SER B	Mining of other non-ferrous metal ores	2.54	MEXICO

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.10% (assets also aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	17.27
Financial and insurance activities	Other monetary intermediation	11.84
Information and communication	Computer programming activities	8.32
Financial and insurance activities	Monetary intermediation	5.49
Manufacturing	Manufacture of electronic components	4.64
Manufacturing	Manufacture of motor vehicles	4.45

Real estate activities	Buying and selling of own real estate	4.16
Mining and quarrying	Extraction of crude petroleum	3.55
Information and communication	Publishing, audiovisual and broadcasting	3.22
Water supply; sewerage, waste management	Water collection, treatment and supply	2.98
Financial and insurance activities	Other financial service activities, except insurance and pension funding	2.88
Mining and quarrying	Mining of gold	2.77
Mining and quarrying	Mining of other non-ferrous metal ores	2.54
Information and communication	Computer programming, consultancy and related activities	2.46
Manufacturing	Manufacture of computers and peripheral equipment	2.46
Mining and quarrying	Support activities for petroleum and natural gas extraction	2.33
Manufacturing	Manufacture of pharmaceutical preparations	1.95
Manufacturing	Manufacture of general-purpose machinery	1.81
Manufacturing	Manufacture of wiring devices	1.81
Transportation and storage	Passenger air transport	1.68
Information and communication	Other information technology and computer service activities	1.58
Real estate activities	Management of real estate on a fee or contract basis	1.57
Manufacturing	Manufacture of basic iron and steel	1.50
Manufacturing	Manufacture of chemicals and chemical products	1.14
total of remaining sectors with a proportion < 1.0%		3.22

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

12.11% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23.8% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.9% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (1.9%) and cash equivalent investments, for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. To support the promotion of environmental and social characteristics, the Investment Manager engages actively in voting and engagement in areas of sustainability-related risks. The Sub-Fund has an engagement coverage of 55% (based on engagement during the reporting period, for holdings from 1 September 2024 to 31 August 2025) of its holdings via the direct engagement of the Investment Manager and its third-party specialist engagement partner. The Investment Manager also has a dedicated process to actively vote on all company ballots following review by financial and ESG analysts, incorporating environmental and/or social characteristics where relevant. The Sub-Fund thereby voted in 100% (total of 69) of meetings in the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES	☒ ☐ NO
☐ It made sustainable investments with an environmental objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.75% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund adhered to its exclusion criteria, maintaining no exposure (0%) to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities, and no exposure (0%) to sovereign issuers excluded based on the Sub-Fund’s criteria. The Sub-Fund also had no exposure (0%) to issuers in violation of global norms or involved in critical controversies. 97.14% of the total portfolio was invested in securities of corporate issuers assessed based on the Investment Manager’s ESG framework, which includes a combination of Sustainalytics scores and qualitative assessments. Additionally, 10.75% of the portfolio was allocated to securities of issuers addressing actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment, and that qualify as sustainable investments. The Sub-Fund achieved a combined weighted average ESG rating of 104.5% compared to the benchmark, with 114.7% of the corporate benchmark and 95.6% of the sovereign benchmark.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager's Exclusion Framework.
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment)	97.14%	13,77% of corporate issuers had a Sustainalytics score below 25. For these issuers, an additional qualitative analysis was conducted. The issuers and their respective scores are as follows: COMISION FED DE ELECTRIC (20.03), UZBEK INDUSTRIAL AND CON (20.94), AFRICAN EXPORT IMPORT BA (21.26), BANQUE OUEST AFRICAINE D (14.86), TRINIDAD GEN UNLTD (21.51), EASTERN + SOUTHERN AFRIC (22.65), GEORGIAN RAILWAY JSC (19.42), OHI GROUP SA (14.28), HERITAGE PETROL CO LTD (14.64), MDGH GMTN RSC LTD (23.48), UZAUTO MOTORS AJ (8.61), and RONGCHANGDA DEVL P BVI COMPANY (15.14).

Percentage of securities covered by ESG analysis	N/A	81.97%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments made by the Sub-Fund was to invest in securities of issuers that provide solutions to environmental and social challenges, contributing to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager conducted assessments based on quantitative ESG indicators and qualitative evaluations of the issuer's products, technologies, services, or projects. The qualitative assessment considered research related to peer groups and scientific studies. To qualify as a sustainable investment, issuers were required to have a significant part of their activities linked to these solutions, meeting a minimum threshold of 20% in revenues, capital expenditure, operational expenditure, or allocated funding, depending on the nature of their activities. If this minimum requirement was met, the entire investment was considered a sustainable investment, provided it complied with the "do no significant harm" principle and, where applicable, good governance criteria. During the reporting period, the Sub-Fund allocated 10.75% of its portfolio to securities of issuers meeting these criteria, contributing to both environmental objectives such as climate change mitigation and responsible use of natural resources, and social objectives such as addressing basic needs and empowerment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
SAUDI ARABIAN OIL CO	Extraction of crude petroleum and natural gas	2.06	SAUDI ARABIA
ECOPETROL SA	Extraction of crude petroleum and natural gas	1.81	COLOMBIA
IVORY COAST	General public administration activities	1.77	COTE D'IVOIRE
BANQUE OUEST AFRICAINE D	Central banking	1.70	TOGO
ROMANIA	General public administration activities	1.66	ROMANIA

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

MC BRAZIL DWNSTRM	Manufacture of refined petroleum products	1.55	LUXEMBOURG
GABON BLUE BOND MASTER	General public administration activities	1.33	UNITED STATES OF AMERICA (THE)
PETROLEOS MEXICANOS	Extraction of crude petroleum and natural gas	1.28	MEXICO
VONTOBEL FUND EMERGING MARKETS BLEND	Fund management activities	1.27	LUXEMBOURG
REPUBLIC OF INDONESIA	General public administration activities	1.22	INDONESIA
BLACK SEA TRADE AND DEVE	Other financial service activities	1.21	GREECE
GREENSAIF PIPELINES BIDC	Water collection, treatment and supply	1.18	LUXEMBOURG
ISHARES J.P. MORGAN USD EM BON	Fund management activities	1.13	IRELAND
REPUBLIC OF POLAND	General public administration activities	1.12	POLAND
REPUBLIC OF SOUTH AFRICA	General public administration activities	1.11	SOUTH AFRICA

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 87.08% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	47.43
Mining and quarrying	Extraction of crude petroleum and natural gas	9.38
Financial and insurance activities	Other financial service activities	5.64
Financial and insurance activities	Financial service activities	3.70
Financial service activities, except insurance and pension funding	Fund management activities	2.95

Electricity, gas, steam and air conditioning supply	Production of electricity	2.82
Mining and quarrying	Mining of crude petroleum and natural gas	2.79
Financial and insurance activities	Central banking	2.76
Manufacturing	Manufacture of refined petroleum products	1.55
Mining and quarrying	Support activities for petroleum and natural gas extraction	1.48
Water collection, treatment and supply	Water collection, treatment and supply	1.31
Financial service activities, except insurance and pension funding	Other financial service activities	1.26
Construction	Civil engineering	1.18
total of remaining sectors with a proportion < 1.0%		12.64

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

20.27% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 8.35% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.40% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 12.92% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (4.38%) for liquidity management purposes.
- UCITS/UCIs (3.11%) for investment/diversification purposes. Minimum environmental and social safeguards applied to four SFDR Art. 8 funds (1.91%).
- Investments not covered by ESG research (5.43%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Sustainable Emerging Markets Debt

Legal Entity Identifier: 2221005QVB48OVS2VY35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 66.48% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers assessed as well-prepared to address financially material environmental and social challenges, as determined by the Investment Manager's ESG framework. As at the end of the reporting period, the Sub-Fund maintained 0% exposure to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities and 0% exposure to issuers in violation of global norms or involved in critical controversies. The Sub-Fund allocated 66.48% of its portfolio to sustainable investments, addressing actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. Furthermore, 81.81% of the securities in the portfolio were covered by ESG analysis, and the Sub-Fund's ESG rating was 113.9% of the corporate benchmark and 101.9% of the sovereign benchmark, with a weighted average ESG rating of 105.8% compared to the benchmark universe.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0.01%	As at 31 August 2025, the Sub-Fund held a position of 1.02% of its net assets in the ETF iShares JPM Advanced USD EM Bd A (ISIN: IE00BF553838), resulting in an indirect exposure of 0.01% which was found to be non-compliant with Article 12(1)(e) and Article 12(1)(f) of the Commission Delegated Regulation (EU) 2020/1818. Consequently, the entire position was divested, effective 27 October 2025.
Percentage of investments in securities of corporate issuers that pass the minimum ESG rating that has been set for this Sub-Fund (determined based on the lowest decile, based on a proprietary methodology)	92.69%	Issuers with failing scores were: UZBEK INDUSTRIAL AND CON (20.94), AFRICAN EXPORT IMPORT BA (21.26), BANQUE OUEST AFRICAINE D (14.86), EASTERN + SOUTHERN AFRIC (22.65), and MDGH GMTN RSC LTD (23.48).
Percentage of investments in securities of sovereign issuers that pass the minimum ESG rating that has been set for this Sub-Fund (determined based on the lowest decile, based on a proprietary methodology)	100%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of issuers that qualify as sustainable investments according to the Investment Manager’s methodology described in the pre-contractual disclosure annex	66.48%	
Sub-Fund's ESG rating compared to its Benchmark (J.P. Morgan ESG EMBI Global Diversified Index), based on the proprietary ESG scoring model and based on third-party ESG research provider	The Sub-Funds score is 113.9% of the corporate benchmark and 101.9% of the sovereign benchmark. The weighted average ESG rating of securities of corporate and

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund allocated 66.48% of its portfolio to sustainable investments as at the end of the reporting period. These investments aim to address environmental and social challenges by focusing on actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager evaluates corporate and supranational issuers based on quantitative ESG indicators and qualitative assessments, requiring a minimum threshold of 20% of revenues, capital expenditure, operational expenditure, or allocated funding to be linked to these actionable themes. For sovereign issuers, the Sub-Fund invests in countries that efficiently utilize their natural and financial resources to improve the quality of life for their populations. Sovereign issuers are assessed using a proprietary model that evaluates factors such as gross national income per capita, life expectancy, ecological footprint, income distribution, and human rights, provided they meet the "do no significant harm" and good governance criteria. The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
DOMINICAN REPUBLIC	General public administration activities	2.52	DOMINICAN REPUBLIC (THE)
REPUBLIC OF POLAND	General public administration activities	2.21	POLAND
REPUBLIC OF COLOMBIA	General public administration activities	2.16	COLOMBIA
BANQUE OUEST AFRICAINE D	Central banking	2.08	TOGO
REPUBLIC OF COLOMBIA	General public administration activities	1.89	COLOMBIA
AFRICA FINANCE CORP	Other financial service activities	1.77	NIGERIA
REPUBLIC OF SOUTH AFRICA	General public administration activities	1.68	SOUTH AFRICA

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

EASTERN + SOUTHERN AFRIC	General public administration activities	1.61	BURUNDI
FED REPUBLIC OF BRAZIL	General public administration activities	1.46	BRAZIL
REPUBLIC OF POLAND	General public administration activities	1.39	POLAND
BANCO DEL ESTADO CHILE	Banking	1.36	CHILE
HUNGARY	General public administration activities	1.32	HUNGARY
NORTH MACEDONIA	General public administration activities	1.24	NORTH MACEDONIA
GACI FIRST INVESTMENT	Activities of head offices	1.24	CAYMAN ISLANDS (THE)
REPUBLIC OF CHILE	General public administration activities	1.24	CHILE

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 90.74% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● **In which economic sectors were the investments made?**

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	63.11
Financial and insurance activities	Banking	9.60
Financial and insurance activities	Other financial service activities	4.38
Financial and insurance activities	Central banking	3.12
Electricity, gas, steam and air conditioning supply	Production of electricity	2.19
Information and communication	Telecommunications	1.92
Financial and insurance activities	Financial service activities	1.25
Activities of head offices; management consultancy activities	Activities of head offices	1.24
Manufacturing	Manufacture of basic metals	1.21
Water supply; sewerage, waste management and remediation activities	Water collection, treatment and supply	1.14
total of remaining sectors with a proportion < 1.0%		7.68

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

5.24% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	1.33	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 57.21% for this Sub-Fund.

The investment manager removed the commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 9.27% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 9.26% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (4.66%), for liquidity management purposes.
- UCITS/UCIs (1.02%) for investment/diversification purposes. Minimum environmental and social safeguards did not apply (SFDR Art. 8 fund);
- Investments not covered by ESG research (3.58%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Global Bond

Legal Entity Identifier: 222100JNJJJKXSKPUV60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 8.40% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☒ with a social objective
☐ It promoted E/S characteristics, but did not make any sustainable investments	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges, selected based on the Investment Manager's ESG framework. The Sub-Fund adhered to its exclusion criteria, maintaining no exposure (0%) to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities. The Sub-Fund invested 99.39% of its portfolio in securities of corporate issuers assessed based on the Investment Manager's ESG framework, with 3.65% of corporate issuers having a Sustainalytics score below 25, which underwent additional qualitative analysis. Additionally, 100% of sovereign issuers in the portfolio were assessed based on scores provided by MSCI ESG and the Investment Manager's qualitative assessment. The Sub-Fund allocated a minimum of 5% of its net assets to sustainable investments, with 8.40% of its portfolio invested in securities of issuers providing solutions to actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Taxonomy alignment of sustainable investments was established based on reports provided by the issuers. The Sub-Fund also invested in environmentally sustainable investments that were not Taxonomy-aligned because the Investment Manager only used reported alignment data from issuers, not considering estimates provided by third-party data providers; the EU Taxonomy technical screening was still incomplete for climate change mitigation and adaptation and did not cover all environmental objectives (the remaining 4 objectives) as of the reporting date, the Investment Manager therefore performed additional analysis of the issuers.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager's Exclusion Framework.
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment.	99.39%	
Percentage of investments in securities of sovereign issuers based on the Investment Manager's assessment (based on a score provided by MSCI ESG, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment.	100%	3.65% of corporate issuers had a Sustainalytics score below 25. For these issuers, an additional qualitative analysis was conducted. The issuers and their respective scores are as follows: TOYOTA MOTOR CREDIT CORP (22.22), CAISSE D AMORT DETTE SOC (7.59), PROVINCE OF QUEBEC (2.69), and HCA INC (22.09).
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments.	8.40%	
Percentage of securities covered by ESG analysis	99.68%	Some issuers were not covered by Sustainalytics for the ESG rating and some corporate issuers were not covered by MSCI or Sustainalytics regarding controversies and UNGC compliance. The Investment Manager conducted additional research to ensure that the issuers did not have unmanaged material ESG risks and were not involved in any controversies or violation of UNGC.

Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions *	N/A	0%	0%

*Indicator deleted as covered by the Investment Manager's Exclusion Framework.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund allocated 8.40% of its portfolio to sustainable investments as at the end of the reporting period. The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
BONOS Y OBLIG DEL ESTADO	General public administration activities	4.39	SPAIN
US TREASURY N/B	General public administration activities	3.10	UNITED STATES OF AMERICA (THE)

VMWARE LLC	Software publishing	1.00	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 95.72% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	46.70
Financial and insurance activities	Banking	6.35
Financial and insurance activities	Insurance	3.22
Information and communication	Telecommunications	2.69
Manufacturing	Chemicals	1.95
Financial and insurance activities	Banking activities	1.71
Financial and insurance activities	Insurance and pension funding	1.58
Information and communication	Technology services	1.58
Information and communication	Software	1.44
Transportation and storage	Toll roads	1.37
Information and communication	Technology hardware	1.34
Electricity, gas, steam and air conditioning supply	Electricity transmission	1.23
Manufacturing	Packaging	1.12
Information and communication	Software publishing	1.11
Manufacturing	Pharmaceuticals	1.09
Financial and insurance activities	Financial leasing	1.01
total of remaining sectors with a proportion < 1.0%		20.27

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

4.02% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
4.90	1.80	7.00

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0.72% for this Sub-Fund.

For these issuers, the economic activity was not yet covered under the EU Taxonomy, the positive contribution was not (fully) aligned with the criteria for environmentally sustainable economic activities under the EU Taxonomy, or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.78% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 4.28% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (3.97%), for liquidity management purposes.
- Investments not covered by ESG research (0.31%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Global Corporate Bond

Legal Entity Identifier: 222100EB6D3KIX3FMQ70

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒

☐

YES

☐

It made **sustainable investments with an environmental objective:** ____%

☐

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

It made **sustainable investments with a social objective:** ____%

☒

☒

NO

☐

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐

with a social objective

☒

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considers well-prepared to handle financially material environmental and/or social challenges, selected based on the Investment Manager’s ESG framework. The Sub-Fund adhered to its exclusion criteria, maintaining no exposure (0.00%) to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities. The Sub-Fund invested 36.43% of its portfolio in securities of corporate issuers assessed as performing well in pre-defined climate change-related indicators, 30.33% in corporate issuers on their way to performing well in these indicators, and 15.88% in corporate issuers where potential for improvement has been identified, based on the Investment Manager’s analysis. Additionally, the Sub-Fund had no exposure (0.00%) to issuers in violation of certain global norms and standards promoted by the Sub-Fund or issuers exposed to critical controversies. The Sub-Fund’s weighted average UN Global Compact profile was 93.25, compared to the investment universe (global investment-grade corporate debt market) average of 88.47. Furthermore, 82.64% of the securities in the Sub-Fund’s portfolio were covered by ESG analysis conducted by the Investment Manager.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in securities of corporate issuers that, in respect to the pre-defined climate change related indicators (i.e. greenhouse gas intensity, carbon reduction path, exposure to fossil fuel), (i) perform well, or (ii) are on their way to perform well in these indicators, or (iii) where potential for improvement has been identified, based on the Investment Manager's analysis	(i): 36.43% (ii): 30.33% (iii): 15.88%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
CVS HEALTH CORP	Healthcare services	0.87	UNITED STATES OF AMERICA (THE)
AVOLON HOLDINGS FNDG LTD	Air transport	0.79	IRELAND
CENTERPOINT ENERGY RES	Utilities	0.75	UNITED STATES OF AMERICA (THE)
PLAINS ALL AMER PIPELINE	Pipeline transport	0.73	UNITED STATES OF AMERICA (THE)
VODAFONE GROUP PLC	Telecommunications	0.73	UNITED KINGDOM
MIZUHO FINANCIAL GROUP	Financial service activities	0.71	JAPAN

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

CITIGROUP INC	Banking	0.70	UNITED STATES OF AMERICA (THE)
AEROPORTI DI ROMA SPA	Air transport	0.69	ITALY
MOLSON COORS BEVERAGE	Beverages	0.68	UNITED STATES OF AMERICA (THE)
DELL INT LLC / EMC CORP	IT services	0.66	UNITED STATES OF AMERICA (THE)
HCA INC	Hospitals	0.65	UNITED STATES OF AMERICA (THE)
CENCOSUD SA	Retail sale in non-specialised stores	0.62	CHILE
SOCIETE GENERALE	Banking	0.62	FRANCE
STATE BANK INDIA/LONDON	Banking	0.62	UNITED KINGDOM
MORGAN STANLEY	Financial services	0.60	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 96.94% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Banking	27.06
Electricity, gas, steam and air conditioning supply	Utilities	7.34
Information and communication	Telecommunications	6.27
Financial and insurance activities	Financial service activities	4.63
Financial and insurance activities	Financial service	4.23
Transportation and storage	Air transport	3.23

Human health and social work activities	Healthcare services	2.49
Transportation and storage	Pipeline transport	2.30
Financial and insurance activities	Insurance	2.10
Mining and quarrying	Oil & gas	1.66
Human health and social work activities	Hospitals	1.63
Manufacturing	Pharmaceuticals	1.30
Manufacturing	Beverages	1.30
Real estate activities	Real estate activities	1.26
Electricity, gas, steam and air conditioning supply	Electricity supply	1.23
Manufacturing	Automotive	1.11
Wholesale and retail trade	Retail	1.11
Mining and quarrying	Mining of metal ores	1.04
Information and communication	Telecom	1.00
total of remaining sectors with a proportion < 1.0%		25.01

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

14.18% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 3.06% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (2.53%), for liquidity management purposes.
- Investments not covered by ESG research (0.53%) for diversification purposes, environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Emerging Markets Blend

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES	☒ ☐ NO
☐ It made sustainable investments with an environmental objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 13.86% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund invested in issuers assessed as well-prepared to address material environmental and social challenges, based on the Investment Manager’s ESG framework, which considers factors such as greenhouse gas emissions, biodiversity, waste, inequality, labor relations, and human capital. The Sub-Fund adhered to its exclusion criteria, maintaining no exposure to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities, no exposure to sovereign issuers excluded based on the Sub-Fund’s criteria, and no exposure to issuers in violation of global norms or involved in critical controversies. The Sub-Fund achieved 13.86% of its portfolio in securities of issuers addressing actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment, and that qualify as sustainable investments. 88.29% of securities in the portfolio were covered by ESG analysis. The Sub-Fund also achieved a combined weighted average ESG rating of 90.2% compared to corporate and sovereign benchmarks. Modest increases were observed in ESG coverage and investments aligned with the Investment Manager’s ESG assessment, reflecting the Sub-Fund’s enhanced focus on ESG integration and sustainable practices.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager’s qualitative assessment).	88.29%	12.30% of corporate issuers had a Sustainalytics score below 25. For these issuers, an additional qualitative analysis was conducted. The issuers and their respective scores are as follows: BANQUE OUEST AFRICAINE D (14.86), EMIRATES REIT SUSUK III (6.39), GEORGIAN RAILWAY JSC (19.42), HERITAGE PETROL CO LTD (14.64), OHI GROUP SA (14.28), RONGCHANGDA DEVL P BVI COMPANY (15.14), and UZBEK INDUSTRIAL AND CON (20.94).

Percentage of securities covered by ESG analysis	79.75%	78.09%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments made by the Sub-Fund was to invest in securities of issuers that provide solutions to environmental and social challenges, contributing to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. These investments were selected by the Investment Manager based on a combination of quantitative ESG indicators and a qualitative assessment of the issuer's products, technologies, services, or projects. The qualitative assessment also considered peer group research and scientific studies. To qualify as a sustainable investment, issuers were required to have a significant part of their activities measured by a minimum threshold of revenues, capital expenditure, operational expenditure, or allocated funding linked to at least one actionable theme. During the reporting period, 13.86% of the Sub-Fund's portfolio was allocated to securities of issuers meeting these criteria, contributing to environmental objectives such as climate change mitigation and responsible use of natural resources and social objectives such as addressing basic needs and empowerment, while ensuring compliance with the "do no significant harm" and good governance principles.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
SAUDI ARABIAN OIL CO	Extraction of crude petroleum and natural gas	2.53	SAUDI ARABIA
GABON BLUE BOND MASTER	General public administration activities	2.43	UNITED STATES OF AMERICA (THE)
BANCO ACTINVER SA	Other financial service activities	2.40	MEXICO
GOVERNMENT OF GRENADA	General public administration activities	2.37	GRENADA
ECOPETROL SA	Extraction of crude petroleum and natural gas	1.93	COLOMBIA

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

REPUBLIC OF CONGO	General public administration activities	1.90	CONGO (THE)
PA AUTOPISTA RIO MAGDA	Civil engineering	1.69	COLOMBIA
ROMANIA	General public administration activities	1.65	ROMANIA
BLACK SEA TRADE AND DEVE	Other financial service activities	1.62	GREECE
MC BRAZIL DWNSTRM	Manufacture of coke and refined petroleum products	1.55	LUXEMBOURG
BANQUE OUEST AFRICAINE D	Other financial service activities	1.55	TOGO
GALAXY PIPELINE ASSETS	Transport via pipelines	1.53	JERSEY
GREENSAIF PIPELINES BIDC	Construction of utility projects	1.46	LUXEMBOURG
REPUBLIC OF CAMEROON	General public administration activities	1.42	CAMEROON
POINSETTIA FINANCE LTD	Other financial service activities	1.33	UNITED STATES OF AMERICA (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 82.94% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	42.99
Financial and insurance activities	Other financial service activities	19.08
Mining and quarrying	Extraction of crude petroleum and natural gas	8.95
Electricity, gas, steam and air conditioning supply	Electricity generation	2.74

Manufacturing	Manufacture of coke and refined petroleum products	2.16
Construction	Construction of utility projects	1.94
Mining and quarrying	Extraction of crude petroleum	1.82
Construction	Civil engineering	1.69
Electricity, gas, steam and air conditioning supply	Transport via pipelines	1.53
Financial and insurance activities	Banking	1.42
Manufacturing	Manufacture of basic chemicals	1.41
Electricity, gas, steam and air conditioning supply	Production of electricity	1.27
total of remaining sectors with a proportion < 1.0%		10.38

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

19.18% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10.33% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 3.53% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 17.06% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (6.06%) for liquidity management purposes.
- Investment in one target fund (0.93%) classified under Art. 6 SFDR.
- Investments not covered by ESG research (10.07%) for diversification purposes; minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Emerging Markets Corporate Bond

Legal Entity Identifier: 2221008YRFVPYPFT7234

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES	☐ ☒ NO
☐ It made sustainable investments with an environmental objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers assessed to be well-prepared to address material environmental and social challenges, based on the Investment Manager’s ESG framework. This framework considers factors such as greenhouse gas emissions, biodiversity, waste, inequality, labor relations, and human capital. The Sub-Fund adhered to its exclusion criteria, maintaining no exposure to corporate issuers deriving revenues from excluded products or activities, no exposure to excluded sovereign issuers, but had 0.97% exposure to issuers in violation of global norms or involved in critical controversies. This exposure was due to a position being temporarily flagged by a third-party ESG data provider while the issuer was under review by the Investment Manager. The Sub-Fund invested 86.58% of its total portfolio in securities of corporate issuers assessed using the Investment Manager’s ESG framework and allocated 9.20% of its portfolio to securities of issuers addressing actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment, and that qualify as sustainable investments. The Sub-Fund also achieved a combined weighted average ESG rating of 89.9% compared to the benchmark, with 88.6% of the corporate benchmark and 95.1% of the sovereign benchmark.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund for sovereigns	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0.97%	For OCP, a critical controversy was confirmed by the Vontobel Process for Critical ESG Events (PCEE). At the time of the report, the position had been flagged by a 3rd party data provider.
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment).	86.58%	7.15% of corporate issuers had a Sustainalytics score below 25. For these issuers, an additional qualitative analysis was conducted. The issuers and their respective scores are as follows: UZBEK INDUSTRIAL AND CON (20.94), AFRICAN EXPORT IMPORT BA (21.26), BANQUE OUEST AFRICAINE D (14.86), TRINIDAD GEN UNLTD (21.51), GEORGIAN RAILWAY JSC (19.42), KASPI.KZ JSC (18.82), OHI GROUP SA (14.28), ALFA DESARROLLO SPA (5.49), RONGCHANGDA DEVL P BVI COMPANY (15.14), FORESEA HOLDING SA (5.11), and EMIRATES REIT SUSUK III (6.39).

Percentage of securities covered by ESG analysis	86.56%	79.80%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments made by the Sub-Fund was to invest in securities of issuers that provide solutions to environmental and social challenges, contributing to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager conducted assessments based on quantitative ESG indicators and qualitative evaluations of the issuer's products, technologies, services, or projects. The qualitative assessment considered research related to peer groups and scientific studies. To qualify as a sustainable investment, issuers were required to have a significant part of their activities linked to these solutions, meeting a minimum threshold of 20% in revenues, capital expenditure, operational expenditure, or allocated funding, depending on the nature of their activities. If this minimum requirement was met, the entire investment was considered a sustainable investment, provided it complied with the "do no significant harm" principle and, where applicable, good governance criteria. During the reporting period, the Sub-Fund allocated 9.20% of its portfolio to securities of issuers meeting these criteria, contributing to both environmental objectives such as climate change mitigation and responsible use of natural resources, and social objectives such as addressing basic needs and empowerment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
VONTOBEL FUND – EMERGING MARKETS INVESTMENT GRADE	Fund management activities	1.56	LUXEMBOURG
POINSETTIA FINANCE LTD	Financial service activities	1.55	UNITED STATES OF AMERICA (THE)
MX REMIT FUND FIDUC EST	Financial service activities	1.29	LUXEMBOURG
GDZ ELEKTRIK DAGITIM AS	Distribution of electricity	1.22	TURKEY
FED REPUBLIC OF BRAZIL	General public administration activities	1.21	BRAZIL

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

ZORLU ENERJI ELEKTRIK	Electric power generation	1.12	TURKEY
VONTOBEL FUND ASIAN BOND	Fund management activities	1.11	LUXEMBOURG
ICA ICTAS ALTYAPI YAVUZ	Civil engineering	1.08	TURKEY
SAUDI ARABIAN OIL CO	Mining of crude petroleum and natural gas	1.07	SAUDI ARABIA
FIDEICOMISO PA PACIFICO	Financial service activities	1.07	COLOMBIA
ECOPETROL SA	Extraction of crude petroleum and natural gas	1.04	COLOMBIA
PETROLEOS MEXICANOS	Mining of crude petroleum and natural gas	1.02	MEXICO
CIMA FINANCE LTD	Financial service activities	1.00	IRELAND
REPUBLIC OF COLOMBIA	General public administration activities	0.93	COLOMBIA
ARAGVI FINANCE INTL	Financial service activities	0.90	IRELAND

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 78.63% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	18.86
Financial and insurance activities	Financial service activities	8.72
Mining and quarrying	Mining of crude petroleum and natural gas	7.30
Construction	Construction of buildings	4.64
Financial and insurance activities	Other financial service activities	4.14

Financial and insurance activities	Financial service activities, except insurance and pension funding	3.58
Electricity, gas, steam and air conditioning supply	Electricity generation	3.39
Financial and insurance activities	Banking	3.23
Electricity, gas, steam and air conditioning supply	Electric power generation	3.13
Financial and insurance activities	Fund management activities	2.75
Mining and quarrying	Support activities for petroleum and natural gas extraction	2.47
Mining and quarrying	Extraction of crude petroleum and natural gas	2.26
Extraction of crude petroleum and natural gas	Extraction of crude petroleum	2.12
Manufacturing	Manufacture of chemicals and chemical products	2.05
Manufacturing	Manufacture of coke and refined petroleum products	1.58
Construction	Civil engineering	1.35
Electricity, gas, steam and air conditioning supply	Distribution of electricity	1.31
Mining and quarrying	Mining of metal ores	1.25
Financial and insurance activities	Other monetary intermediation	1.16
Mining and quarrying	Mining support service activities	1.10
total of remaining sectors with a proportion < 1.0%		18.82

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

26.69% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 7.40% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 1.80% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 21.37% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (6.27%) for liquidity management purposes.
- UCITS/UCIs (2.89%) for investment/diversification purposes of which one SFDR Art. 8 fund (1.86%) with minimum environmental and social safeguards applied.
- Investments not covered by ESG research (12.21%) for diversification purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – TwentyFour Absolute Return Credit Fund

Legal Entity Identifier: 2221001GZCYJRGNFVI77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ ☐ NO ☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.31% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considers well-prepared to handle financially material environmental and social challenges. Issuers were screened in accordance with the Investment Manager’s view of appropriate sustainability parameters as measured in the Investment Manager’s proprietary Environmental (“E”) and Social (“S”) scoring model. Information on the scoring model is available in the Fund Sales Prospectus, in the Annex “Environmental and/or social characteristics” to this Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment.

In addition, the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contribute to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment.

As at the Financial year end 31 August 2025, 97.07% of the Sub-Fund's net asset value was invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 77.31% of its net assets in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex.	97.07%	
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 77.31% E: 71.84% S: 5.47%	

... And compared to previous periods?

Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 77.31% E: 71.84% S: 5.47%	SI: 75.65% E: 73.19% S: 2.46%	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental or a social objective, as detailed above. In addition to following good governance, the investment must not have been classified as “Significant Harm” and must have been classified as “In transition” (which includes a commitment to transition) or “Positive contribution”, based on an evaluation conducted by the Investment Manager.

If a security complied with these requirements, the entire investment was considered a sustainable investment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	12	Unadjusted gender pay gap
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
US TREASURY N/B	General public administration activities	3.79	UNITED STATES OF AMERICA (THE)
BUNDESOBLIGATION	General public administration activities	3.72	GERMANY
BUNDESOBLIGATION	General public administration activities	2.53	GERMANY

VOLKSWAGEN FIN SERV NV	Consumer credit and auto finance	1.06	NETHERLANDS (THE)
NIE FINANCE PLC	Electricity transmission and distribution	1.04	UNITED KINGDOM

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 97.07% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Banking activities	19.59
Public administration and defence; compulsory social security	General public administration activities	15.06
Financial and insurance activities	Insurance and pension funding	8.66
Financial and insurance activities	Building society and mortgage lending	5.49

Financial and insurance activities	Other monetary intermediation	5.11
Information and communication	Telecommunications services	4.97
Financial and insurance activities	Structured finance / securitisation	4.31
Financial and insurance activities	Mortgage-backed securities	2.50
Electricity, gas, steam and air conditioning supply	Electricity generation and distribution	2.12

Information on the scoring model is available in the Fund Sales Prospectus, in the Annex “Environmental and/or social characteristics” to this Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment.

In addition, the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contribute to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment.

As at the Financial year end 31 August 2025, 98.12% of the Sub-Fund's net asset value has been invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 38.90% of its net assets in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and / or activities please refer to the Sustainability Related Disclosures.
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 12 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex	98.12%	
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 38.90% E: 38.58% S: 0.32%	

... And compared to previous periods?

Financial year of the Fund ending on 31 August	2025	2024	2023
Sustainability Indicators	Value	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 12 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex	98.12%	94.65%	96.46%
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 38.90% E: 38.58% S: 0.32%	SI: 38.81% E: 37.73% S: 1.08%	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental or a social objective, as detailed above. In addition to following good governance, the investment must not have been classified as “Significant Harm” and must have been classified as “In transition” (which includes a commitment to transition) or “Positive contribution”, based on an evaluation conducted by the Investment Manager.

If a security complied with these requirements, the entire investment was considered a sustainable investment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
BUNDESREPUB. DEUTSCHLAND	General public administration activities	3.79	GERMANY
BUNDESREPUB. DEUTSCHLAND	General public administration activities	3.39	GERMANY
US TREASURY N/B	General public administration activities	2.56	UNITED STATES OF AMERICA (THE)

COVENTRY BLDG SOCIETY	Building society and mortgage lending	0.76	UNITED KINGDOM
PHOENIX GRP HLD PLC	Insurance and pension funding	0.75	UNITED KINGDOM
BUNDESREPUB. DEUTSCHLAND	General public administration activities	0.73	GERMANY
ACHMEA BV	Insurance and pension funding	0.72	NETHERLANDS (THE)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.12% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence	General public administration activities	22.83
Financial and insurance activities	Banking activities	22.48
Financial and insurance activities	Structured finance / securitisation	13.37
Financial and insurance activities	Insurance and pension funding	7.71

Financial and insurance activities	Building society and mortgage lending	3.16
Financial and insurance activities	Securitisation vehicles	2.28
Financial and insurance activities	Corporate finance / secured lending	1.81
Financial and insurance activities	Pension insurance services	1.56
Financial and insurance activities	Other financial service activities, except insurance and pension funding n.e.c.	1.50
Information and communication	Telecommunications services	1.17
Financial and insurance activities	Corporate finance / unsecured lending	1.10
total of remaining sectors with a proportion < 1.0%		18.81

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

3.01% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38.58% for this Sub-Fund.

What was the share of socially sustainable investments?

The Sub-Fund invested 0.32% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.88% of the Sub-Fund’s Net Asset Value and consisted of:

-Cash (1.88%) for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – TwentyFour Sustainable Strategic Income Fund

Legal Entity Identifier: 213800GWCMTLGFZXVO57

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.40% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considers well-prepared to handle financially material environmental and social challenges. Issuers were screened in accordance with the Investment Manager’s view of appropriate sustainability parameters as measured in the Investment Manager’s proprietary Environmental (“E”) and Social (“S”) scoring model. Information on the scoring model is available in the Fund Sales Prospectus, in the Annex “Environmental and/or social characteristics” to this Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment.

In addition, the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contribute to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment.

As at the Financial year end 31 August 2025, 96.38% of the Sub-Fund’s net asset value has been invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 52.40% of its net assets in sustainable investments.

With effect from May 2025, the Sub-Fund increased its commitment to invest at least 50% (previously 20%) of its net assets in Sustainable Investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and / or activities please refer to the Sustainability Related Disclosures.
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) and the minimum ESG score (set at 34 out of 100)	96.38%	
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental ("E", climate change mitigation, climate change adaptation) objective or social ("S", empowerment) objective	SI: 52.40% E: 51.64% S: 0.76%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2025	2024	2023

Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) and the minimum ESG score (set at 34 out of 100)	96.38%	95.84%	95.71%
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental ("E", climate change mitigation, climate change adaptation) objective or social ("S", empowerment) objective	SI: 52.40% E: 51.64% S: 0.76%	SI: 43.76% E: 43.76% S: 0%	N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental or a social objective, as detailed above. In addition to following good governance, the investment must not have been classified as "Significant Harm" and must have been classified as "In transition" (which includes a commitment to transition) or "Positive contribution", based on an evaluation conducted by the Investment Manager.

If a security complied with these requirements, the entire investment was considered a sustainable investment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
EUROPEAN INVESTMENT BANK	Supranational institutions	3.72	LUXEMBOURG
BUNDESREPUB. DEUTSCHLAND	General public administration activities	2.88	GERMANY

The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 51.64% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 0.76% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 3.62% of the Sub-Fund’s Net Asset Value and consisted of:

-Cash (3.62%) for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. Did this financial product have a sustainable investment objective?	
☐ YES	☒ NO
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 18.08% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considers well-prepared to handle financially material environmental and social challenges. Issuers were screened in accordance with the Investment Manager’s view of appropriate sustainability parameters as measured in the Investment Manager’s proprietary Environmental (“E”) and Social (“S”) scoring model. Information on the scoring model is available in the Fund Sales Prospectus, in the Annex “Environmental and/or social characteristics” to this Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment.

In addition, the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contribute to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment.

As at the Financial year end 31 August 2025, 97.27% of the Sub-Fund's net asset value was invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 18.08% of its net assets in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and / or activities please refer to the Sustainability Related Disclosures.
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 25 out of 100) and the minimum ESG score (set at 34 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex.	97.27%	
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 18.08% E: 5.62% S: 12.46%	

... And compared to previous periods?

Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 25 out of 100) and the minimum ESG score (set at 34 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex.	97.27%	96.05%	91.61%
Percentage of sustainable investments (SI) by investing in securities of corporate issuers that contribute to either an environmental (“E”, climate change mitigation, climate change adaptation) objective or social (“S”, empowerment) objective	SI: 18.08% E: 5.62% S: 12.46%	SI: 23.71% E: 10.32% S: 13.39%	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental or a social objective, as detailed above. In addition to following good governance, the investment must not have been classified as “Significant Harm” and must have been classified as “In transition” (which includes a commitment to transition) or “Positive contribution”, based on an evaluation conducted by the Investment Manager.

The securities that will be considered eligible for sustainable investment are securities of corporate issuers and asset-backed securities (“ABS”). For ABS, the assessment will be based on the sponsor of the ABS or on the collateral backing the ABS.

If a security complied with these requirements, the entire investment was considered a sustainable investment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Total GHG emissions (Scope 1 and 2)
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	17	Share of investments in real estate assets involved in the extraction, storage, transport or manufacture of fossil fuels
1	18	Share of investments in energy-inefficient real estate assets

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
HOLMES MASTER ISSUER PLC	Mortgage-backed securities	1.89	UNITED KINGDOM
CARDIFF AUTOMOBILE RECEIVABLES	Auto loan securitisation	1.84	UNITED KINGDOM
BARLEY HILL PLC	Structured finance / securitisation	1.80	UNITED KINGDOM
RRE LOAN MANAGEMENT	Structured finance / securitisation	1.54	IRELAND
TWIN BRIDGES	Mortgage-backed securities	1.52	UNITED KINGDOM
FIRSTMAC MORTGAGE FUNDING TRUS	Mortgage-backed securities	1.42	AUSTRALIA
GOLUB CAPITAL PARTNERS CLO, LT	Structured finance / securitisation	1.36	CAYMAN ISLANDS (THE)
PROVIDUS CLO	Structured finance / securitisation	1.29	IRELAND
ARBOUR CLO	Structured finance / securitisation	1.28	IRELAND
SC GERMANY CONSUMER	Consumer loan securitisation	1.28	LUXEMBOURG
MILTONIA MORTGAGE FINANCE	Residential mortgage-backed securities	1.27	ITALY
TOGETHER ASSET BACKED SECURITI	Asset-backed securities	1.23	UNITED KINGDOM
LONDON CARDS PLC	Credit card securitisation	1.23	UNITED KINGDOM
CARDIFF AUTOMOBILE RECEIVABLES	Auto loan securitisation	1.23	UNITED KINGDOM

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

NEUBERGER BERMAN CLO LTD	Structured finance / securitisation	1.22	CAYMAN ISLANDS (THE)

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

Due to limitations in the coverage and accuracy of NACE classifications for asset-backed securities, the sector classifications used for the Sub-Fund represent the specific pool of underlying loan or credit assets for each asset-backed security in order to better reflect exposure to that asset class.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 97.27% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Structured finance / securitisation	44.30
Financial and insurance activities	Mortgage-backed securities	18.80
Financial and insurance activities	Auto loan securitisation	10.93
Financial and insurance activities	Asset-backed securities	4.41
Financial and insurance activities	Other financial service activities, except insurance and pension funding	3.87
Financial and insurance activities	Consumer loan securitisation	2.87
Financial and insurance activities	Residential mortgage-backed securities	2.69
Financial and insurance activities	Securitisation vehicles	1.64
Financial and insurance activities	Credit card securitisation	1.23
Financial and insurance activities	Equity release mortgage securitisation	1.02
total of remaining sectors with a proportion < 1.0%		4.10

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?***¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 5.32% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 12.46% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 2.73% of the Sub-Fund’s Net Asset Value and consisted of:

-Cash (2.73%) for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Multi Asset Solution

Legal Entity Identifier: 2221002PGFRDROWH6H93

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES	☐ ☒ NO
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework. The ESG approach was applied to the Sub-Fund’s securities portfolio and target funds. For the avoidance of doubt, where the exposure to an asset class was built up via derivatives, a part or all of the securities portfolio may have served as collateral for such derivative transactions.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
The Sub-Fund invests in selected target funds that pass the Investment Manager’s ESG assessment	N	
Percentage of investments in securities of issuers that pass the minimum ESG Rating that has been set for this Sub-Fund (based on a proprietary methodology, minimum is set at E from A-G, G being the lowest). If the issuer cannot be rated by proprietary methodology a minimum MSCI ESG rating of BB is used.	85,22%	
Percentage of investments in securities of issuers that pass the minimum climate score that has been set for this Sub-Fund (based on a proprietary methodology, minimum is set at 10 from 0-100, 0 being the lowest)	80,95%	
Percentage of investments in securities of issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). ● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

----- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

----- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
US TREASURY N/B	General public administration activities	5.54	UNITED STATES OF AMERICA (THE)
FRANCE (GOVT OF)	General public administration activities	3.77	FRANCE
BONOS Y OBLIG DEL ESTADO	General public administration activities	2.84	SPAIN
INVESCO PHYSICAL GOLD ETC	Financial service activities	2.78	IRELAND
VONTOBEL FUND GLOBAL HIGH YI	Fund management activities	2.09	LUXEMBOURG

* Indirect investment not aligned with E/S characteristics.

The portfolio proportions of investments presented above are based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 81.92% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	31.96
Financial and insurance activities	Banking	6.97
Financial and insurance activities	Financial service activities	6.01
Financial and insurance activities	Fund management activities	4.20
Manufacturing	Manufacture of computer, electronic and optical products	3.92
Financial and insurance activities	Monetary intermediation	2.66
Financial and insurance activities	Insurance	2.64
Public administration and defence; compulsory social security	Public administration	2.58
Information and communication	Telecommunications	1.60
Wholesale and retail trade	Retail trade	1.54
Financial and insurance activities	Trusts, funds and similar financial entities	1.06
total of remaining sectors with a proportion < 1.0%		29.65

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

3.76% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**¹*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 18.08% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (5.09%) and cash equivalent investments, for liquidity management purposes.
- Direct investments not aligned with E/S characteristics (0.19%). For Diversification purposes; Vontobel’s good governance process has been applied.
- Direct investments with ESG data gaps (3.77%). For Diversification purposes; Vontobel’s good governance process has been applied.
- Indirect investments not aligned with E/S characteristics (9.03%). For Diversification purposes, for indirect investments in other Vontobel Fund sub-funds, Vontobel’s good governance process has been applied. For other indirect investments, the Sub-Fund invests only in securities of reputable managers.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. In addition, the Sub-Fund was part of the pooled engagement activities by an external partner.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Active Beta Opportunities Plus **Legal Entity Identifier:** 222100V71MIVL749S743

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ____%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 23.93% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework. The ESG approach was applied to the Sub-Fund’s securities portfolio and target funds. For the avoidance of doubt, where the exposure to an asset class was built up via derivatives, a part or all of the securities portfolio may have served as collateral for such derivative transactions.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Vontobel Fund – Active Beta Opportunities Plus

Page | 1

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	For excluded products and/or activities please refer to the Investment Manager’s Exclusion Framework.
Percentage of target funds that pass the Investment Manager’s ESG assessment	0%	
Percentage of investments in securities of issuers that pass the minimum ESG rating that has been set for this Sub-Fund (based on a proprietary methodology, minimum set at E from A-G, G being the lowest). If the issuer cannot be rated by proprietary methodology a minimum MSCI ESG rating of BB is used.	93,08%	
Percentage of investments in securities of issuers that pass the minimum climate score that has been set for this Sub-Fund (based on a proprietary methodology, minimum is set at 10 from 0-100, 0 being the lowest).	93,08%	
Percentage of investments in securities of issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in green, social or sustainability bonds in the securities portfolio or in investment funds that invest mainly in such bonds.	23,93%

*Indicator deleted as covered by the Investment Manager's Exclusion Framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund invested 16.06% in green bonds and 7.87% in social bonds through direct investments in such bonds. These investments were qualified as sustainable investments. The direct investments are bonds categorized as green or social bonds based on international standards such as the International Capital Market Association (ICMA). The green bonds' objective was to enable capital-raising and investment for new and existing sound and sustainable projects with environmental benefits, that foster a net-zero emissions economy and protect the environment (example: renewable energy, pollution prevention and control, environmentally sustainable management of living natural resources and land use). Social bonds are use of proceeds bonds that raise funds for new and existing projects with positive social outcomes (example: direct emergency relief such as food, shelter and healthcare and specific projects designed to alleviate unemployment of affected populations).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

----- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

----- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
LAND NIEDERSACHSEN	Public administration and defence; compulsory social security	16.45	GERMANY
NRW.BANK	Public administration and defence; compulsory social security	7.84	GERMANY
LAND BADEN WUERTTEMBERG	Public administration and defence; compulsory social security	7.14	GERMANY
EUROPEAN UNION	Fund management activities	6.69	BELGIUM
FREIE HANSESTADT BREMEN	Public administration and defence; compulsory social security	6.67	GERMANY
LAND BERLIN	Public administration and defence; compulsory social security	6.07	GERMANY

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

VONTOBEL FUND NON FOOD COMMO	Fund management activities	5.75	LUXEMBOURG
LB BADEN WUERTTEMBERG	Monetary intermediation	4.98	GERMANY
LAND BERLIN	Public administration and defence; compulsory social security	4.79	GERMANY
UNICREDIT BANK GMBH	Monetary intermediation	4.32	GERMANY
FREIE HANSESTADT HAMBURG	Public administration and defence; compulsory social security	4.11	GERMANY
KFW	Public administration and defence; compulsory social security	2.61	GERMANY
NORDDEUTSCHE LANDESBANK	Monetary intermediation	1.60	GERMANY
LAND RHEINLAND PFALZ	Public administration and defence; compulsory social security	1.56	GERMANY
FREIE HANSESTADT HAMBURG	Public administration and defence; compulsory social security	1.50	GERMANY

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 93.08% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	Public administration and defence; compulsory social security	61.03
Financial and insurance activities	Monetary intermediation	14.33
Financial and insurance activities	Fund management activities	13.87

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and

quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23.93% for this Sub-Fund.

The issuers did not fall under the reporting scope of the EU Taxonomy and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 7.87% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 6.92% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (5.15%), for liquidity management purposes.
- Indirect investments in one other Vontobel Fund sub-fund (1.77%) for diversification purposes, Vontobel’s good governance process has been applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

* Indirect investment not aligned with E/S characteristics.

The portfolio proportions of investments presented above are based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 80.95% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	General public administration activities	31.96
Financial and insurance activities	Banking	6.97
Financial and insurance activities	Financial service activities	6.01
cash	cash	5.21
Financial and insurance activities	Fund management activities	4.20
Manufacturing	Manufacture of computer, electronic and optical products	3.92
Financial and insurance activities	Monetary intermediation	2.66
Financial and insurance activities	Insurance	2.64
Public administration and defence; compulsory social security	Public administration	2.58
Information and communication	Telecommunications	1.60
Wholesale and retail trade	Retail trade	1.54
Financial and insurance activities	Trusts, funds and similar financial entities	1.06
total of remaining sectors with a proportion < 1.0%		19.08

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

7.66% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**¹*

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund did not make any sustainable investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 19.05% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.77%) and cash equivalent investments, for liquidity management purposes.
- Direct investments not aligned with E/S characteristics (0.45%). For Diversification purposes; Vontobel’s good governance process has been applied.
- Direct investments with ESG data gaps (5.47%). For Diversification purposes; Vontobel’s good governance process has been applied.
- Indirect investments not aligned with E/S characteristics (9.36%). For Diversification purposes, for indirect investments in other Vontobel Fund sub-funds, Vontobel’s good governance process has been applied. For other indirect investments, the Sub-Fund invested only in securities of reputable managers.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. In addition, the Sub-Fund was part of the pooled engagement activities by an external partner.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Emerging Markets Investment Grade **Legal Entity Identifier:** 2221009H4R7WPT2OHN79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ YES ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ ☒ NO ☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.59% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund adhered to its exclusion criteria, maintaining no exposure (0%) to corporate issuers deriving a non-negligible part of their revenues from excluded products or activities and no exposure (0%) to sovereign issuers excluded based on the Sub-Fund’s criteria. The Sub-Fund had 7.10% exposure to issuers in violation of global norms or involved in critical controversies. This exposure was due to a critical controversy confirmed for OCP through the Vontobel Process for Critical ESG Events (PCEE), and at the time of the report, the position had been flagged by a third-party data provider. 87.85% of the total portfolio was invested in securities of corporate issuers assessed using the Investment Manager’s ESG framework, with 7.11% of corporate issuers having a Sustainalytics score below 25, which underwent additional qualitative analysis. Furthermore, 16.59% of the portfolio was allocated to securities of issuers addressing actionable themes such as climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment, and that qualify as sustainable investments. The Sub-Fund achieved a combined minimum weighted average ESG rating of 99.6% compared to the benchmark, with 97.6% of the corporate benchmark and 107.4% of the sovereign benchmark. Additionally, 88.06% of the securities in the portfolio were covered by ESG analysis, with additional research conducted by the Investment Manager for issuers not covered by MSCI or Sustainalytics to ensure no involvement in controversies or violations of UNGC principles.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	7.10%	For OCP, a critical controversy was confirmed by the Vontobel Process for Critical ESG Events (PCEE). At the time of the report, the position had been flagged by a 3rd party data provider.
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment)	87.85%	7.11% of corporate issuers had a Sustainalytics score below 25. The issuers and their respective scores are as follows: AFRICAN EXPORT IMPORT BA (21.26), INTERCORP PERU LTD (10.43), BANQUE OUEST AFRICAINE D (14.86), AEROPUERTO INTL TOCUMEN (20.50), LHV GROUP (23.50), KASPI.KZ JSC (18.82), ALFA DESARROLLO SPA (5.49), and SITIOS LATINOAMERICA (24.19).
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	16.59%	
Sub-Fund's combined minimum weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark (J.P. Morgan EMBI Global Diversified or CEMBI Broad Diversified)	The Sub-Funds score is 97.6% of the corporate benchmark and 107.4% of the sovereign benchmark. The weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark is 99.6%	The weighted average ESG score (corporate and sovereign issuers combined) of the portfolio must be at least 75% the one of the benchmark.

Percentage of securities covered by ESG analysis	88.06%	Some issuers were not covered by MSCI or Sustainalytics regarding controversies and ESG rating. [The Investment Manager conducted additional research to ensure that the issuers were not involved in any controversies or violation of UNGC.]

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2025	2024
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	0%
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	7.10%	0%
Percentage of investments in securities of corporate issuers based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider and/or subject to the Investment Manager's qualitative assessment).	87.85%	85.24%
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	16.59%	8.49%
Sub-Fund's combined minimum weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark (J.P. Morgan EMBI Global Diversified or CEMBI Broad Diversified)	The Sub-Funds score is 97.6% of the corporate benchmark and 107.4% of the sovereign benchmark. The weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark is 99.6%	Sub-Fund: 49.33 Benchmark: 52.72 The Sub-Fund's score is 93.57% of the one of the benchmark
Percentage of securities covered by ESG analysis	88.06%	90.08%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments made by the Sub-Fund was to invest in securities of issuers that provide solutions to environmental and social challenges, contributing to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, and empowerment. The Investment Manager conducted assessments based on quantitative ESG indicators and qualitative evaluations of the issuer's products, technologies, services, or projects. The qualitative assessment considered research related to peer groups and scientific studies. To qualify as a sustainable investment, issuers were required to have a significant part of their activities linked to these solutions, meeting a minimum threshold of 20% in revenues, capital expenditure, operational expenditure, or allocated funding, depending on the nature of their activities. If this minimum requirement was met, the entire investment was considered a sustainable investment, provided it complied with the "do no significant harm" principle and, where applicable, good governance criteria. During the reporting period, the Sub-Fund allocated 16.59% of its portfolio to securities of issuers meeting these criteria, contributing to both environmental objectives such as climate change mitigation and responsible use of natural resources, and social objectives such as addressing basic needs and empowerment.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, which takes into account, among other things, the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
GABON BLUE BOND MASTER	General public administration activities	1.30	UNITED STATES OF AMERICA (THE)
SAUDI ARABIAN OIL CO	Extraction of crude petroleum and natural gas	1.22	SAUDI ARABIA
QIC CAYMAN LTD	Financial service activities	1.14	CAYMAN ISLANDS (THE)
CIMA FINANCE LTD	Financial service activities	1.06	IRELAND
LA CONSTRUCCION SA	Construction of buildings	1.04	CHILE

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2024-31/08/2025

ALFA DESARROLLO SPA	Construction of buildings	1.01	CHILE
ROMANIA	General public administration activities	0.99	ROMANIA
GACI FIRST INVESTMENT	Activities of head offices	0.93	CAYMAN ISLANDS (THE)
PT PERTAMINA (PERSERO)	Production of electricity	0.91	INDONESIA
GREENSAIF PIPELINES BIDC	Water collection, treatment and supply	0.87	LUXEMBOURG
STANDARD CHARTERED PLC	Financial service activities	0.83	UNITED KINGDOM
QATAR ENERGY	Extraction of crude petroleum and natural gas	0.79	QATAR
MINEJESA CAPITAL BV	Power generation	0.77	NETHERLANDS (THE)
NATIONAL GAS CO	Mining of crude petroleum and natural gas	0.73	TRINIDAD AND TOBAGO
AFRICA FINANCE CORP	Other financial service activities	0.73	NIGERIA

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 85.48% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Financial service activities	18.95
Public administration and defence; compulsory social security	General public administration activities	17.33
Financial service activities, except insurance	Other financial service activities	5.92
Electricity, gas, steam and air conditioning supply	Production of electricity	4.12
Financial and insurance activities	Other financial service activities	3.67

Financial and insurance activities	Banking	2.43
Mining and quarrying	Extraction of crude petroleum and natural gas	2.31
Mining and quarrying	Extraction of crude petroleum and gas	2.26
Construction	Construction of buildings	2.05
Manufacturing	Manufacture of coke and refined petroleum products	2.03
Mining and quarrying	Mining of crude petroleum and natural gas	1.85
Mining and quarrying	Mining of other non-ferrous metal ores	1.71
Mining and quarrying	Mining of metal ores	1.70
Mining and quarrying	Support activities for petroleum and natural gas extraction	1.25
Manufacturing	Manufacture of chemicals and chemical products	1.17
Electricity, gas, steam and air conditioning supply	Electricity generation	1.12
Financial and insurance activities	Financial service activities, except insurance and pension funding	1.04
Electricity, gas, steam and air conditioning supply	Electric power generation	1.03
total of remaining sectors with a proportion < 1.0%		25.69

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

22.48% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

None of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy		
2025	2024	2023
0	0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.02% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 5.57% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 14.52% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (2.93%) and cash equivalent investments for liquidity management purposes.
- Investments (sovereign issuers) not covered by ESG research (11.59%) for diversification purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.
