Vontobel

Fund Factsheet / 31.07.2026

Vontobel Fund - Credit Opportunities HN (hedged), EUR

Marketing document for retail investors in: CH

Investment objective
This actively managed bond fund aims to achieve a positive absolute return through the credit cycle.

Key features
While respecting risk diversification, the fund invests worldwide across credit ratings predominantly in bonds and similar interest-bearing securities of sovereign and corporate issuers. Specific limits apply for issuers outside the OECD as well as for certain instruments, including distressed, convertible, CoCo, or warrant bonds, notes, ABS, and MBS. The fund may also be exposed to various currencies and to market volatility. It may use derivatives to achieve its investment objective. It uses no benchmark. The investment team has full discretion.

Approach
The investment team continuously assesses markets and issuers based on in-depth economic and credit analyses to allocate risks within the portfolio accordingly and to select securities and instruments whose yield and/or hedging values or performance potential it deems promising. It flexibly adapts the portfolio, striving to capitalize on favorable markets and keep its vulnerability to unfavorable markets low.

Portfolio management	Kai Steffen Hirschlein
Fund domicile, legal structure, SFDR	Luxembourg, UCITS, Art. 6
Currency of the fund / shareclass	USD / EUR
Launch date fund / shareclass	30.06.2015 / 18.11.2024

Risks

Investing in the Sub-Fund implies the following risks which are described in detail in the section “Risks” of the Sales Prospectus. The table below explains which risks are specifically related to the Sub-Fund and could affect an investment in the Sub-Fund.

Investment Fund Risks	Investment Management Risks	Other Risks
– Performance Risk	– Fixed Income Risk	– Volatility Trading Risk
– Market Risk	– Credit Risk	– Sustainability Risk
– Operational Risk	– Interest Rate Risk	
– Liquidity Risk	– High Yield Investment Risk	
	– ABS/MBS/CLO Risk	
	– Contingent Convertible Bond Risk	
	– Financial Derivative Instruments Risks	
	– Absolute Return Strategy Risk	
	– Leverage Risk	
	– Emerging Markets Risk	
	– Currency Risk	
	– Currency Trading Risk	

Any of these risks could cause a Sub-Fund to lose money, to perform less well than similar investments, to experience high volatility of the Share price, or to fail to meet its investment objective over any period of time. It cannot be guaranteed that the investor will recover the capital invested.

Glossary

Average Maturity indicates the length of time until the initial investment amount of a bond is due to be repaid. "Average maturity" is calculated on a bond portfolio by weighting each bond's residual maturity by its relative size. **Average Rating**, or credit rating, assesses a bond issuer's ability to repay on time all its debt (interest and principal). High ratings, like AAA or Aaa, indicate low risk (i.e., low probability of default), while ratings such as BBB- or Baa3 indicate a higher risk. **Coupon** is a payment to holders of bonds on a pre-defined basis, normally with a specific periodicity and percentage. Average Coupon for a bond fund is calculated as capital-weighted average of the coupon rates of all bonds in a portfolio. **Distribution policy** of a fund defines the dividend distribution for its share classes to investors. Accumulating share classes reinvest the income received from the fund holdings back into the fund and do not distribute to shareholders. Distributing shares typically make cash payments to shareholders on a periodic basis. **Effective duration**, also called option-adjusted duration, is used to calculate the interest rate sensitivity of bonds that have uncertain cash flows due to embedded options. **ISIN** (International Securities Identification Number) is a unique code that identifies a specific financial security. It is assigned by a country's respective national numbering agency (NNA). **Management fee** is a fee which covers the costs charged to a fund relating to portfolio

management services and, if applicable, to distribution services. **Net Asset Value** (**NAV**) / **share** also known as the share price of a fund, represents the value per share of the fund. It is calculated by dividing the fund's assets less its liabilities by the number of shares outstanding. For most funds it is calculated and reported daily. **Ongoing charges** expresses the sum of the costs of running a fund on an ongoing basis, like the management fee and various legal and operating costs. It is calculated retroactively over a period of 12 months as a percentage of the fund assets. If the available data is insufficient, for example, for newly launched funds, ongoing charges may be estimated using data from funds with similar characteristics. **Share class** is a compartment of a fund with a distinct client type, distribution policy, fee structure, currency, minimum investment, or other characteristics. The characteristics of each share class are described in the fund prospectus. **Sharpe ratio** measures excess return per unit of risk. The ratio is the average return earned in excess of the risk-free rate per unit of volatility. A portfolio with a higher Sharpe ratio is considered superior relative to its peers. **Swing Pricing eligible** is an industry standard mechanism to protect long term investors in a fund against trading costs occurring when investors enter or exit the fund. This is achieved by adjusting the NAV upwards or downwards respectively so that the additional trading costs caused by subscriptions or redemptions are borne by investors trading in the fund. Full details of the Swing Pricing mechanism are given in the fund prospectus. **VALOR** is an identification number issued by SIX Financial Information and assigned to financial instruments in Switzerland. **Volatility** measures the fluctuation of a fund's performance over a certain period. It is most commonly expressed using the annualized standard deviation. The higher the volatility, the riskier a fund tends to be. **WKN** (or Wertpapierkennummer) is an identification code of securities registered in Germany, issued by its Institute for Issuance and Administration of Securities. **Yield to maturity** (**YTM**) measures the return of the fund if all the bonds in the portfolio of the fund were held to maturity. The ratio is expressed as an annual return in percent.

Important information

This marketing document was produced by one or more companies of the Vontobel Group (collectively "Vontobel") for retail clients for distribution in CH.

This document is for information purposes only and does not constitute an offer, solicitation or recommendation to buy or sell shares of the fund/fund units or any investment instruments, to effect any transactions or to conclude any legal act of any kind whatsoever. Subscriptions of shares of the fund should in any event be made solely on the basis of the fund's current sales prospectus (the "Sales Prospectus"), the Key Information Document ("KID"), its articles of incorporation and the most recent annual and semi-annual report of the fund and after seeking the advice of an independent finance, legal, accounting and tax specialist. Furthermore and before entering into an agreement in respect of an investment referred to in this document, you should consult your own professional and/or investment advisers as to its suitability for you. Furthermore and before entering into an agreement in respect of an investment referred to in this document, you should consult your own professional and/or investment advisers as to its suitability for you.

For products with the ESG SFDR Category Art. 6, the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Past performance is not a reliable indicator of current or future performance. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable. The return of the fund may go down as well as up due to changes in rates of exchange between currencies. The value of the money invested in the fund can increase or decrease and there is no guarantee that all or part of your invested capital can be redeemed.

Interested parties may obtain the above-mentioned documents free of charge from the authorised distribution agencies and from the offices of the fund at 17, Boulevard de Kockelscheuer, L-1821 **Luxembourg**, in **Switzerland**, from the representative Vontobel Fonds Services AG and the paying agent Bank Vontobel AG, both at Gotthardstrasse 43, 8022 Zurich. Refer for more information on the fund to the latest Sales Prospectus, annual and semi-annual reports, available in English and German. The Key Information Document ("KID") is made available in the local language of each European country where the fund is distributed. These documents may also be downloaded from our website at vontobel.com/am. A summary of investor rights is available in English under the following link: www.vontobel.com/vamsa-investor-information. Vontobel may decide to terminate the arrangements made for the purpose of marketing its funds in any country at any given time. Appropriate information will be communicated to investors.
